This is a summary document about MSSICS Appeals screens. It contains screen facsimiles and notes about each screen.

The screens are shown in full path order, as if every possible screen could be present for an appeal iteration. Most appeal iterations are very short. For example, a typical request for reconsideration for an initial disability issue contains only five screens.

The screen facsimiles are from the MSSICS Detailed Functional Requirements. The key to the screen values is:

Χ	User can enter alpha/numeric characters
9	User can enter numeric characters only
S	Prefilled by the system and cannot be overkeyed
Р	Prefilled by the system and can be overkeyed
В	Sometimes prefilled by the system and if so, cannot be overkeyed
V	Sometimes prefilled by the system and may or may not be overkeyed. Sometimes completed by the
	user.
