**Special Instructions:** The household roster should display all persons on the roster, whether household members or not.

Displaying nonmembers should help decrease the instances of FRs adding a duplicate person to the roster because the person who was a nonmember last enumeration is now back as a household member. If the FR cannot see that this person is already on the roster (as a nonmember), then they will add the person as a duplicate. This goes against survey procedures and lessens our ability to track victims across the time the household is in sample.

**Skip Instructions:** Back to the item where the FR left off (on the main path).

## VALIDHHR\_CHK

Check

Control Card.BDemoTable.VALIDHHR\_CHK

---

**Description:** Hard edit check for when RESPLINE is a line number for a person who is not an eligible Household Respondent. It should be onpath after FR completes the BDemoDetailed block and before exiting out of the Control Card block.

**Inherited Universe:** WEBEC ne 1 and SKIPMID ne 1

**Universe:** (RESPLINE AND \  
MEMBER eq 2 or\  
MEMBER eq 1 AND (AGE lt 17 or AGER le 3) or\  
MEMBER eq 1 AND AGE eq 17 AND REL ne 11 or 12)\

**Universe Description:** FR has completed collecting/updating the demographic information for the household and the HHR is not valid because they are not a household member or not eligible (i.e. under 18 and do not meet the requirements).

**Text:** \* You have not selected a valid household respondent. The current household respondent is either not a member or does not meet the age requirements to be the household respondent.

\* Click on the "Suppress" button and return to question 'Pick HHResp' and select a valid Household Respondent

**Check Instructions:** These specs may need to be modified based on the functionality in the instrument. When the FR completes updating the roster in the "BDemoDetailed" block and RESPLINE is not valid, this hard edit check should appear. I think ideally, the "Goto" button would take the respondent to the New\_HHR tab to select a valid HHR.

However, if this is not possible then we'll need to modify the FR instructions to inform them that they will need to manually click on the New\_HHR tab to fix this error.

04.24.09 modified specs to have the FR manually goto New\_HHR Tab.

**Type:** Hard

**Skip Instructions:** The FR will need to go back to 'Pick HHResp' in order to fix the problem.

**Question Text:** Thank you. Based on the answers you've provided, it looks like you, **[LIST ALL NONHHRNAME\_CC AGE 12+]** are eligible to participate in this study. Let me tell you a little more about it. The study is called the National Survey of Crime and Safety and is sponsored by the Bureau of Justice Statistics at the US Department of Justice. It asks for information about people's perceptions of community safety, their local police, and their experiences with victimization and crime in the past year. The results will be used to help improve the way the government measures crime.

I'd like to get contact information for you and the other adults in your household in case we need to follow-up to complete [your/each person's] survey .
