Needs and Uses: The Coastal Zone Management Act of 1972, as amended (CZMA; 16 U.S.C. 1451 *et seq.*) requires that state coastal management programs and national estuarine research reserves developed pursuant to the CZMA and approved by the Secretary of Commerce be evaluated periodically. This request is for collection of information to accomplish those evaluations.

NOAA's Office for Coastal Management (OCM) conducts periodic evaluations of the 34 coastal management programs and 29 research reserves and produces written findings for each evaluation. OCM has access to documents submitted in cooperative agreement applications, performance reports, and certain documentation required by the CZMA and implementing regulations. However, additional information from each coastal management program and research reserve, as well as information from the program and reserve partners and stakeholders with whom each works, is necessary to evaluate against statutory and regulatory requirements. SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

Participants in most federally-managed fisheries in the NMFS Southeast Region are currently required to keep and submit catch and effort logbooks from their fishing trips. A subset of these vessels also provides information on the species and

quantities of fish, shellfish, marine turtles, and marine mammals that are caught and discarded or have interacted with the vessel's fishing gear. A subset of these vessels also provides information about dockside prices, trip operating costs, and annual fixed costs.

The data are used for scientific analyses that support critical conservation and management decisions made by national and international fishery management organizations. Interaction reports are needed for fishery management planning and to help protect endangered species and marine mammals. Price and cost data will be used in analyses of the economic effects of proposed regulations.

II. Method of Collection

The information is submitted on paper forms and electronic transmissions. Logbooks are completed daily and submitted on either a by-trip, weekly, or monthly basis, depending on the fishery. Fixed costs are submitted on an annual basis. Other information is submitted on a trip basis.

III. Data
