Million Hearts® Hospital/Health System Recognition program

Supporting Statement: Part B

Program Official/Contact

Judith Hannan, RN, MPH
National Center for Chronic Disease Prevention and Health Promotion
Division for Heart Disease and Stroke Prevention
Centers for Disease Control and Prevention
Atlanta, Georgia
Phone: 770-488-4572
Fax: 770-488-5199
Email: jat5@cdc.gov

June 24, 2019

Table of Contents

- B.1. Respondent Universe and Sampling Methods
- B.2. Methods to Maximize Response Rates and Deal with No Response
- B.3. Tests of Procedures or Methods to be Undertaken
- B.4. Individuals Consulted on Statistical Aspects and Individuals Collecting and/ or Analyzing data
- B.5. Individuals Consulted on Statistical Aspects and Individuals Collecting and/ or Analyzing data

ATTACHMENTS

- Attachment 2a: Million Hearts® Hospital / Health System Recognition Program Application
- Attachment 2b: Interview Guide: Million Hearts® Hospital/Health System Recognition Program
- Attachment 4a: Dear Colleague Letter

1. Respondent Universe and Sampling Methods

Statistical sampling methods do not apply. One hundred applications are anticipated out of a respondent universe of 5,500, and applying is voluntary. Expected respondents are medical & health service managers. On an annual basis, CDC estimates receipt of 100 Million Hearts® Hospital/Health System Recognition Program application forms (**Attachment 2a**). The table below shows the expected response rate for this application form.

Type of Respondent	Form Name	No. of Respondents in Respondent Universe	No. of Anticipated Respondents
Medical & Health Service Manager	Recognition Program Application	5,500	100

2. Procedures for the Collection of Information

- Statistical methods for stratification and sample selection do not apply.
- One hundred applications are anticipated out of a respondent universe of 5,500. Million Hearts® anticipates 100 applications per year since this program will be promoted through the same channels as the Million Hearts® Hypertension Control Challenge.
- There are no unusual problems requiring specialized sampling procedures.
- There are no periodic data collection cycles in place to reduce burden. Application to the Million Hearts® Hospital / Health System Recognition Program is voluntary.

One hundred percent of responses will be collected electronically via an online platform by a funded partner. The application will be hosted through a unique URL. All applicants with reported outcomes and a select number of those who are committing to implement or are implementing Million Hearts® strategies will be asked to participate in a semi-structured, qualitative interview with this funded partner. The funded partner will administer the interview by following the interview guide (**Attachment 2b**). Average burden for this interview guide is 30 minutes for the respondent. Applicants who are selected for this interview will be contacted in advance to schedule the interview.

3. Methods to Maximize Response Rates and Deal with No Response

This program will be promoted through similar channels as the Million Hearts® Hypertension Control Challenge, (**OMB No. 0920-0976**) including the Dear Colleague Letter (**Attachment 4a**), the Million Hearts® E-update, social media platforms and Challenge.gov. The program will be promoted continuously since applications are accepted throughout the year. Because this is a recognition program that is being promoted through similar channels as the Hypertension Control Challenge, Million Hearts® anticipates a response rate similar to that of the Hypertension Control Challenge. One hundred applications are anticipated out of a respondent universe of 5,500. Because the Million Hearts® Hospital/Health System Recognition program is a recognition program and not an empirical study, it is not subject to non-response bias.

4. Tests of Procedures or Methods to be Undertaken

The main survey instruments, including the application form (**Attachment 2a**) and the interview guide (**Attachment 2b**) were used in pilot testing. Individuals from Leavitt Partners and a doctoral cardiac rehab nurse from Rush University College of Nursing participated in the pilot testing of the application form (**Attachment 2a**). Since the submission of the 60-Day package, the wording of some questions in the application form (**Attachment 2a**) have been revised.

5. Individuals Consulted on Statistical Aspects and Individuals Collecting and/ or Analyzing data

The individuals listed below are were involved in the design of this program:

CDC Points of Contact

Judy Hannan, MPH, RN, Senior Advisor to Director on Million Hearts
Division for Heart Disease and Stroke Prevention, CDC
Telephone (770) 488-4572, jat5@cdc.gov

Hilary Wall, MS, Million Hearts Science Lead
Division for Heart Disease and Stroke Prevention, CDC
Telephone (770) 488-8172, ifx0@cdc.gov

Matthew Ritchey, PT, DPT, OCS, MPH, Epidemiologist
Division for Heart Disease and Stroke Prevention, CDC
Telephone (770) 488-7232, hha7@cdc.gov

These individuals are involved in the data collection of this program:

NACDD Points of Contact

Susan Svencer, MPH
Public Health Consultant, Cardiovascular Health Team
National Association of Chronic Disease Directors
Telephone (508)-982-7560, ssvencer@chronicdisease.org

Julia Schneider
National Association of Chronic Disease Directors
Telephone (410)-804-6270, jschneider@chronicdisease.org

Miriam Patanian
National Association of Chronic Disease Directors
Telephone (678)-373-1487, mpatanian@chronicdisease.org
