NIOSH Engineered Nanomaterials Survey (Screenshots)

NIOSH Engineered Nanomaterials Survey

National Institute for Occupational Safety and Health (NIOSH) | CDC

Thank you in advance for participating in this survey.

The National Institute for Occupational Safety and Health (NIOSH) is sponsoring the survey. The purpose is to learn about how companies in engineered nanomaterials industries are using research findings, guidance documents, and other information developed by NIOSH and how that information is influencing occupational safety and health. NIOSH is part of the Centers for Disease Control and Prevention (CDC), and is not a regulatory agency. Our mission is to eliminate work-related illnesses and injuries through a focused program of research and prevention. RTI International is conducting the survey on behalf of NIOSH. RTI is a private, not-for-profit research organization based in North Carolina.

The information gathered from this survey will be used by NIOSH to enhance our understanding of how our efforts are influencing occupational safety and health across a range of engineered nanomaterial-related businesses.

The survey is voluntary and should take no longer than 20 minutes to complete. The information we collect will be summarized in an internal document. We will not identify you or your company in any documents or reports without your prior approval.

If you have questions about this survey, please do not hesitate to contact the RTI survey manager, Ryan Weber, at 1-800-123-4567 or our Help Desk at nioshsurvey@rti.org.

This survey should be completed by the person in your company/organization who is the most knowledgeable about the safety and health programs at this location. This may be the environmental safety and health manager, for example, or a senior manager at this location.

LOCATION: "ABC Institute of Nanotechnology"

If there is someone else in your company/organization who would be a more knowledgeable respondent for this survey, please forward this survey to that individual. If more than one individual is needed to complete the survey, we ask that you work together to provide as much information as possible.

Progress  5%

1. Does your company develop, manufacture, use, handle, distribute, analyze, or provide services related to engineered nanomaterials?

For the purpose of this survey, the term "engineered nanomaterials" refers to a variety of purposefully engineered materials and structures that have at least one dimension that is in the order of 100 nanometers or less.

If you are not sure if the material is an engineered nanomaterial, you may need to consult with others (e.g., product manager, process engineer, purchasing agent, supplier or review product information (e.g., Safety Data Sheets)).

(Check one.)

- Yes
- No
- Don't Know

Previous

Progress  7%

2. Please indicate the commercial sector(s) where the engineered nanomaterials or the engineered nanomaterials-enabled products or services that your company provides are intended to be used.

(Check all that apply.)

- Manufacturing the following products. Please specify:
- Agriculture, Forestry, Fishing, or Hunting (e.g., farming, crop production, animal production)
- Mining, Quarrying, or Oil and Gas Extraction
- Utilities (e.g., electric power [including solar], natural gas, water and sewage systems)
- Professional, Scientific, or Technical Services (e.g., R&D physical, engineering, life sciences, biotechnology)
- Waste Management and Remediation Services (e.g., land, site or building remediation)
- Other, please specify:

Progress  10%

3. Your organization or company may have multiple locations (i.e. worksite, building, facility, plant, etc.).

Please respond only for the location or locations for which you have knowledge of safety and health programs. Throughout the survey we refer to these sites as "your location(s)."

What is the total number of individuals (employees and contractors) who work at your location(s)?

(Check one.)

- 1-10
- 11-50
- 51-250
- 251-500
- 501-1,000
- 1,001-5,000
- More than 5,000

Previous

Save and Continue

Progress  13%

4. How many individuals have any contact with engineered nanomaterials at your location(s)? Include both employees and contractors with either regular or occasional contact with engineered nanomaterials.

Regular Contact - Include employees that regularly handle or use engineered nanomaterials as a matter of routine during the course of their average work day.

Occasional Contact - Include employees that may have infrequent, short contact with engineered nanomaterials over the course of an average work day (i.e., an employee that moves through a space where engineered nanomaterials are being handled or used such as maintenance or janitorial staff).

(Check one.)

- None
- 1-10
- 11-50
- 51-250
- 251-500
- 501-1,000
- 1,001-5,000
- More than 5,000

Progress  15%

5. Which of the following describes how your company handles or relates to engineered nanomaterials at this location(s)?

(Check all that apply.)

- Develop engineered nanomaterials
- Manufacture engineered nanomaterials
- Incorporate engineered nanomaterials into our products
- Develop applications or products that use engineered nanomaterials
- Repackage/distribute engineered nanomaterials
- Conduct laboratory scale-up of engineered nanomaterials
- Perform nanomaterials characterization
- Provide services using products containing engineered nanomaterials
- Conduct site visits to determine exposure to engineered nanomaterials
- Produce instruments for manufacturing, characterizing, and detection of engineered nanomaterials
- Dispose engineered nanomaterials
- Other, please specify:

Previous

Progress  18%

6. In what physical forms are engineered nanomaterials handled at your location(s)?

(Check all that apply.)

View their online medical record?

- Solid, freely mobile (e.g., dry powder)
- Contained in an aerosol
- Suspended in a liquid (e.g. water, solvent)
- Suspended in a matrix (e.g. polymer, paste)
- Solid, embedded, bound, or fixed in a material or product
- Other, please specify:

Previous

Save and Continue

Progress  21%

7. On a typical day, what is the approximate quantity of engineered nanomaterials handled at your location(s)?

(Check one.)

- Less than a kilogram (2.2 pounds)
- More than a kilogram (2.2 pounds)

Previous

Save and Continue

Progress  23%

8. What are the different types of engineered nanomaterials at your location(s)?

(Check all that apply.)

- Nanoparticles. Please specify:
- Nanotubes, nanofibers, nanorods, or nanowires. Please specify:
- Nanosheets. Please specify:
- Nanofibrils cellulous
- Nanocrystalline cellulous
- Nanoclays
- Dendrimer
- Polymers
- Other, please specify:
- Don't know

Progress  36%

13. Which of the following resources have you used to acquire information about how to safely handle engineered nanomaterials?

(Check all that apply.)

- Government publications/materials. Please specify. (Check all that apply.)
- Industry, scientific, or professional meetings, conferences, or tradeshows, please specify:
- Scientific articles, professional or industry publications, please specify:
- International publications (e.g. Safe Work Australia), please specify:
- Websites, blogs, and Internet search engines (e.g. Google, Bing)
- Informal discussions with professional contacts or peers
- Materials or publications developed by your
- Product manufacturer information (e.g.: Safety Data Sheets (SDS) or Pre-manufacturing Notices (PMN))
- Other, please specify:

Previous

Save and Continue

Progress  39%

14. How has the information you acquired from any source about engineered nanomaterials been used?

(Check all that apply.)

- Informed safety and health practices
- Informed policies for handling of engineered nanomaterials
- Incorporated into training materials
- Incorporate into product information (e.g., SDS)
- Modifications to products
- Modifications to processes
- Other, please specify:

Previous

Progress  60%

Q22. For this question, employees are categorized by their level of possible contact with engineered nanomaterials.

Regular Contact - Employees regularly handle or use engineered nanomaterials as a matter of routine during the course of their average work day.

Occasional Contact - Employees may have infrequent, short contact with engineered nanomaterials over the course of an average work day (i.e., an employee that moves through a space where engineered nanomaterials are being handled or used such as maintenance or janitorial staff).

No contact - Employees do not have any type of contact with engineered nanomaterials

For each level of employee at your location(s), indicate if they receive training on the following practices regarding the safe use or handling of engineered nanomaterials. Include full-time staff, part-time staff, contractors working onsite, and/or temporary staff.

	Employees with...			Training not provided
	Regular Contact	Occasional Contact	No Contact	
Types of engineered nanomaterials and general engineered nanomaterial awareness	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Where to locate information about the safety and health practices regarding engineered nanomaterials	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Routes of exposure to engineered nanomaterials	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Use or maintenance of exposure controls (elimination, substitution, engineering, administrative, PPE) for engineered nanomaterials	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Use or maintenance of respirators for engineered nanomaterials	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Procedures for spill cleanup, waste management, or disposal procedures of engineered nanomaterials	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Method for reporting hazards, illnesses and injuries related to engineered nanomaterials	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
