10 Describe in further detail any changes to the system that have occurred since the last PIA.	n/a
11 Describe the purpose of the system.	<p>In September 2018, the Division of Adolescent and School Health (DASH) funded 25 Local Education Agencies (LEAs) under Promoting Adolescent Health through School-Based HIV Prevention (PS18-1807). PS18-1807 supports a multi- component, multi-level effort to support youth reaching adulthood in the healthiest possible way. DASH is developing the Program Evaluation and Reporting System (PERS), a program evaluation and monitoring system for LEAs to report process and outcome measures. PERS will collect data about LEAs and their priority schools related to three strategies, Sexual Health Education (SHE), Sexual Health Services (SHS), and Safe and Supportive Environments (SSE).</p>
12 Describe the type of information the system will collect, maintain (store), or share. (Subsequent questions will identify if this information is PII and ask about the specific data elements.)	<p>LEAs will enter process and outcome data into the PERS system semi-annually, using a set of three questionnaires. The questionnaires ask for programmatic information about the LEAs and their priority schools. Data collection involves collecting programmatic reporting data from the project manager at each of the funded NOFO 1807 Local Education Agencies (LEAs). LEAs are the school districts funded to implement this programmatic initiative.</p> <p>The data that is collected from the program managers does not involve the collection of sensitive, or personal information.</p> <p>Although the name and work email address of the program managers at each LEA entering, viewing, and submitting data stored for each responding organization, the system only collects programmatic data about LEAs and priority schools.</p>
13 Provide an overview of the system and describe the information it will collect, maintain (store), or share, either permanently or temporarily.	<p>Data entry into PERS is structured as a series of questionnaires which are answered by each LEA for their own work and the work of their priority schools. In addition, LEAs can upload relevant curriculum documents into the system. LEAs will have the option for multiple staff members have log-ins. To facilitate the data collection process for LEAs, copies of the questionnaires in PDF format are available for download from PERS.</p> <p>The data that is collected from the program managers does not involve the collection of sensitive, or personal information.</p> <p>Although the name and work email address of the program managers at each LEA entering, viewing, and submitting data stored for each responding organization</p>
14 Does the system collect, maintain, use or share PII?	<p><input checked="" type="radio"/> Yes <input type="radio"/> No</p>

32 Describe the procedures in place to determine which system users (administrators, developers, contractors, etc.) may access PII. Administrators, developers, and contractors that are responsible for maintaining and developing the system and conducting data analysis will have a "Systems/Database Administrator" user-type which will allow them to access User Names and Email addresses. Other PERS users will only have access to their own user name, email, and data.

33 Describe the methods in place to allow those with access to the system only access the minimum amount of information necessary to perform their job. Those with access to PII need to be able to access names, email addresses, and corresponding funded agency.

34 Identify training and awareness provided to personnel (system owners, managers, operators, contractors and/or program managers) using the IT system to make them aware of their responsibilities for protecting the information being collected and course. maintained. All CDC employees and contractors must complete the Records Management and Security Awareness training. In addition, Administrators must take the Information Security course. Administrators

36 Do contracts include Federal Acquisition Regulation and other appropriate clauses ensuring adherence to privacy provisions and practices? Yes No

37 Describe the process and guidelines in place with regard to the retention and destruction of PII. Cite and specific records retention schedules. Records are retained and disposed of in accordance with CDC Records Control Schedule 04-4-22 Family of Division of HIV/AIDS Prevention/Surveillance Epidemiology.

38 Describe, briefly but with specificity, how the PII will be secured in the system using administrative, the technical, and physical controls. Administrative controls: The information collection involves use of web-based data collection methods. The website does use cookies, and access to the web-based questionnaire, which is password-protected and given only to the staff of the CDC/ DASH-funded LEAs who will complete the questionnaires. Once the contractor is notified that business partners no longer are participating, an Administrator will delete individuals contact information from the list of users. Technical controls: CDC will maintain information in secure electronic files that will only be accessible to authorized members of the team. Electronic files will be stored on secure network servers, and access will be restricted to approved team members identified by user ID.
