1.5 Definition of Population Included in the Measure

Definition of Population Included in the Measure

Collapse

Definition of Denominator *

- Denominator includes CHIP (Title XXI) population only
- Denominator includes Medicaid (Title XIX) population only
- Denominator includes CHIP and Medicaid (Title XIX)

If the denominator is a subset of the definition selected above, please further define the denominator, and indicate the number of children excluded

Does this denominator represent your total measure-eligible population as defined by the Technical Specifications for this measure? *

- Yes
- No

Explain which populations are excluded and why *

What is the sample size? *

What is the measure-eligible population? *

Specify Total Measure Eligible Population *

Which delivery systems are represented in the Denominator? *

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure-eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

- Fee-for-Service
- Primary Care Case Management (PCCM)
- Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)
- Integrated Care Models (ICM)
- Other

Percentage of total state FFS population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Percentage of total state PCCM population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Number of Health Plans *

Percentage of total state MCO/PIHP population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Percentage of total state ICM population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Describe *

Percentage of total other population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented

Figure 5: Definition of Population Included in the Measure

1.6 Performance Measure - Path 1

Performance Measure

Collapse

Among women ages 15 to 20 who had a live birth, the percentage that:

1. Were provided most effective or moderately effective methods of contraception within 3 and 60 days of delivery.
2. Were provided a long-acting reversible method of contraception (LARC) within 3 and 60 days of delivery.

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Rate 1: Most effective or moderately effective method of contraception

Three Days Postpartum Rate

Please explain why data was not entered for this numerator/denominator/rate set *

Character count: 0/4000

Sixty Days Postpartum Rate

Please explain why data was not entered for this numerator/denominator/rate set *

Character count: 0/4000

Rate 2: Long-acting reversible method of contraception (LARC)

Three Days Postpartum Rate

Please explain why data was not entered for this numerator/denominator/rate set *

Character count: 0/4000

Sixty Days Postpartum Rate

Please explain why data was not entered for this numerator/denominator/rate set *

Character count: 0/4000

Performance Measure Collapse

Among women ages 15 to 20 at risk of unintended pregnancy, the percentage that:

1. Were provided a most effective or moderately effective method of contraception.
2. Were provided a long-acting reversible method of contraception (LARC).

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Rate 1: Most effective or moderately effective method of contraception

Ages 15-20

Numerator	Denominator	Rate
0	0	0

Rate 2: Long-acting reversible method of contraception (LARC)

Ages 15-20

Numerator	Denominator	Rate
0	0	0

Figure 7: Performance Measure – Path 2

1.8 Deviations from Measure Specifications

Deviations from Measure Specifications Collapse

Did your calculation of the measure deviate from the measure specification in any way? *

Yes
 No

Rate 1: Most effective or moderately effective FDA-approved method of contraception

Ages 15-20

Numerator Explain *

Denominator Explain *

Other Explain *

Rate 2: Long-acting reversible method of contraception (LARC)

Ages 15-20

Numerator Explain *

Denominator Explain *

Other Explain *

Collapse

If this measure is also reported by additional classifications/sub-categories, e.g. racial, ethnic, language, disability status, or geography, complete the following as applicable.

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Check all that apply

- Race (Non-Hispanic)
 - White

Rate 1: Most effective or moderately effective FDA-approved method of contraception

Classification/Sub-category	Numerator	Denominator	Rate	
Ages 15-20	0	0	0	Clear Row

+ Additional/Alternative Classification/Sub-category

Rate 2: Long-acting reversible method of contraception (LARC)

Classification/Sub-category	Numerator	Denominator	Rate	
Ages 15-20	0	0	0	Clear Row

+ Additional/Alternative Classification/Sub-category

- Black or African American
- American Indian or Alaska Native
- Asian
- Native Hawaiian or Other Pacific Islander
- + Additional Race(s)
- Ethnicity
- Primary Spoken Language
- Disability Status
- Geography
