SUPPLEMENTARY INFORMATION:

Title: FERC–515 (Declaration of Intention).

OMB Control No.: 1902–0079.

Type of Request: Three-year extension of the FERC–515 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission uses the information collected under the requirements of FERC–515 to implement the statutory provisions of Section 23(b) of the Federal Power Act (FPA).¹ Section 23(b) authorizes the Commission to make a determination as to whether it has jurisdiction over a proposed water project² not affecting navigable waters³ but across, along, over, or in waters over which Congress has jurisdiction under its authority to regulate commerce with foreign nations

¹ 16 U.S.C. 817.

² Dams or project works (16 U.S.C. 817).

³ See 16 U.S.C. 796 (8) for the definition of "Navigable Waters."

and among the several States. Section 23(b) requires that any person intending to construct project works on such waters must file a declaration of their intention with the Commission. If the Commission finds the proposed project will have an impact on interstate or foreign commerce, then the entity intending to construct the project must obtain a Commission license or exemption before starting construction.⁴

The information is collected in the form of a written application, containing sufficient details to allow the Commission staff to research the jurisdictional aspects of the project. This research includes examining maps and land ownership records to establish whether or not there is Federal jurisdiction over the lands and waters affected by the project. A finding of non-jurisdictional by the Commission eliminates a substantial paperwork

burden for the applicant who might otherwise have to file for a license or exemption application. The Commission implements these filing requirements under 18 CFR part 24.

Type of Respondents: Persons intending to construct project works on certain waters described above.

*Estimate of Annual Burden.*⁵ The Commission estimates the annual public reporting burden and cost⁶ for the information collection as:

FERC-515—DECLARATION OF INTENTION

Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden hours & cost (\$) per response (4)	Total annual burden hours & total annual cost (\$) (3) * (4) = (5)	Cost per respondent (\$) (5) ÷ (1)
6	1	6	80 hrs.; \$6,400	480 hrs.; \$38,400	\$6,400

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, farm worker, and agricultural advocates; the

⁴ Upon a finding of non-jurisdictional by the Commission, and if the project does not utilize surplus water or waterpower from a government dam and no public lands or reservations are affected, permission is granted upon compliance with State laws.

⁵ Burden is defined as the total time, effort, or financial resources expended by persons to

generate, maintain, retain, or disclose or provide information to or for a federal agency. See 5 CFR 1320 for additional information on the definition of information collection burden.

⁶ The estimates for cost per response are derived using the following formula: Average Burden Hours per Response * \$80.00/hour = Average cost/response. The figure is the 2019 FERC average

hourly cost (for wages and benefits) of \$80.00 (and an average annual salary of \$167,091/year). Commission staff is using the estimate for FERC average wages and benefits because we consider resources completing the FERC-515 to be compensated at rates similar to FERC employees.
