Re: Extension without change of a currently approved collection

Justification: ICR 201909-2700-002 was erroneously submitted as a revision of a currently approved collection, but no changes to the collection instrument have been made since the collection's previous PRA approval in 2016. ICR 201909-2700-002 should actually be treated as an extension without change of a currently approved collection.
