PART I.—GENERAL INFORMATION

Background.-- This proceeding was instituted in response to a petition filed on March 7, 2018, by the Laminated Woven Sacks Fair Trade Coalition, which is comprised of Polytex Fibers Corporation (Houston, Texas) and ProAmpac, LLC (Cincinnati, Ohio). Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at https://www.usitc.gov/investigations/title_7/2018/laminated_woven_sacks_vietnam/preliminary.htm

Laminated woven sacks covered by these investigations are bags consisting of one or more plies of fabric consisting of woven polypropylene strip and/or woven polyethylene strip, regardless of the width of the strip; with or without an extrusion coating of polypropylene and/or polyethylene on one or both sides of the fabric; laminated by any method either to an exterior ply of plastic film such as biaxially-oriented polypropylene ("BOPP") or to an exterior ply of paper that is suitable for high-quality print graphics (i.e., it has an ISO brightness of 82 or higher and a Sheffield Smoothness of 250 or less); printed; displaying, containing, or comprising three or more colors, regardless of the type of printing process used; with or without lining; whether finished or unfinished; whether or not closed on one end; whether or not in roll form (including, but not limited to, sheets, lay-flat tubing, and sleeves); with or without handles; with or without special closing features; not exceeding one kilogram in weight. Laminated woven sacks subject to the scope are typically used for retail packaging of consumer goods such as pet foods and bird seed. Laminated woven sacks produced in Vietnam are subject to the scope regardless of the country of origin of the fabric used to make the sack.

Effective July 1, 2014, laminated woven sacks are classifiable under Harmonized Tariff Schedule of the United States ("HTSUS") subheading 6305.33.0040. If entered with plastic coating on both sides of the fabric consisting of woven polypropylene strip and/or woven polyethylene strip, laminated woven sacks may be classifiable under HTSUS subheadings 3923.21.0080, 3923.21.0095, and 3923.29.0000. If entered not closed on one end or in roll form (including sheets, lay-flat tubing, and sleeves), laminated woven sacks may be classifiable under other HTSUS subheadings, including 3917.39.0050, 3921.90.1100, 3921.90.1500, and 5903.90.2500. If the polypropylene strips and/or polyethylene strips making up the fabric measure more than 5 millimeters in width, laminated woven sacks may be classifiable under other HTSUS subheadings including 4601.99.0500, 4601.99.9000, and 4602.90.0000. Although HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Importer.--Any person or firm engaged, either directly or through a parent company or subsidiary, in importing laminated woven sacks (as defined above) into the United States from a foreign manufacturer or through its selling agent.

Reporting of information.-- If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of

numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification.-- The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

Valid number error messages.--If you are completing this form in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 rather than \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete this form. Detailed instructions on how to resolve this issue is provided at the end of this questionnaire and is available upon request from Drew Dushkes (202-205-3229, drew.dushkes@usitc.gov).

In-scope laminated woven sacks.--As defined on page 2, laminated woven sacks are bags consisting of one or more plies of fabric consisting of woven polypropylene strip and/or woven polyethylene strip, regardless of the width of the strip; with or without an extrusion coating of polypropylene and/or polyethylene on one or both sides of the fabric; laminated by any method either to an exterior ply of plastic film such as biaxially-oriented polypropylene ("BOPP") or to an exterior ply of paper that is suitable for high-quality print graphics (i.e., it has an ISO brightness of 82 or higher and a Sheffield Smoothness of 250 or less); printed; displaying, containing, or comprising three or more colors, regardless of the type of printing process used; with or without lining; whether finished or unfinished; whether or not closed on one end; whether or not in roll form (including, but not limited to, sheets, lay-flat tubing, and sleeves); with or without handles; with or without special closing features; not exceeding one kilogram in weight. Laminated woven sacks subject to the scope are typically used for retail packaging of consumer goods such as pet foods and bird seed. Laminated woven sacks produced in Vietnam are subject to the scope regardless of the country of origin of the fabric used to make the sack.

Out-of-scope non-laminated woven sacks.—Non-laminated woven sacks are bags consisting of one or more plies of fabric consisting of woven polypropylene strip and/or woven polyethylene strip, regardless of the width of the strip; with or without an extrusion coating of polypropylene and/or polyethylene on one or both sides of the fabric, but ***not*** laminated either to an exterior ply of plastic film such as biaxially-oriented polypropylene ("BOPP") or to an exterior ply of paper that is suitable for high-quality print graphics; whether or not printed (and regardless of the type of printing process used); with or without lining; whether finished or unfinished; whether or not closed on one end; whether or not in roll form (including, but not limited to, sheets, lay-flat tubing, and sleeves); with or without handles; with or without special closing features; not exceeding one kilogram in weight.

Out-of-scope multi-walled paper sacks.— Multi-walled paper sacks are bags, other than grocers bags, consisting of more than one ply of material made from paper, paperboard, cellulose wadding or webs of cellulose fibers; whether or not laminated or coated; whether or not printed (and regardless of the type of printing process used); with or without lining; whether finished or unfinished; whether or not closed on one end; whether or not in roll form (including, but not limited to, sheets, lay-flat tubing, and sleeves); with or without handles; with or without special closing features. Multi-walled paper sacks are typically used in retail packaging of consumer goods.

Note.--The alternative product comparison question (i.e., V-1 below) is being asked in multiple questionnaire types (U.S. producers' and U.S. importers' questionnaires). If your firm is completing more than one of these questionnaire types in relation to this proceeding, please respond to the alternative product comparisons question in only **one questionnaire type**. In general, your firm should make these comparisons in the questionnaire type that is most relevant to your firm's role in the market.

Correcting Valid number error messages.--If you are completing a Commission questionnaire in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 instead of as \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. This issues stem from your computer number formatting setting (e.g., not the MS Word document itself, but the computer from which you are opening up the document). In the United States commas (,) delineate multiples of 1000 and periods (.) delineate fractions less than one. Many EU countries use the reverse where multiples of 1000 are delineated with periods (.) and fractions less than one are delineated with commas (,). The US International Trade Commission's questionnaires are set-up in the United States with the U.S. number formatting. When this formatting interacts with a computer set to EU number formatting, we believe this may cause this issue.

The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete the questionnaire.

To temporarily change your computer's number settings to U.S. settings, please do the following (for Microsoft Windows Operating system):

- START
- Control Panel
- Region and Language (under Clock, Language, and Region category)
- Format tab
- Change the Format from your existing one (e.g. "Italian (Italy)") to "English (United States)" (see screen shots below)

When you do this the number "twelve million dollars and thirty five cents" would change from \$12.000.000,35 (Italy format) to \$12,000,000.35 (U.S. format), and then there will be no conflict with the questionnaire. When you finish reporting the data then you can close the questionnaire and switch back to Italy settings.
