PART I.—GENERAL INFORMATION

Background.--This proceeding was instituted in response to a petition filed on March 7, 2018, by the Laminated Woven Sacks Fair Trade Coalition, which is comprised of Polytex Fibers Corporation (Houston, Texas) and ProAmpac, LLC (Cincinnati, Ohio). Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at https://www.usitc.gov/investigations/701731/2018/laminated_woven_sacks_vietnam/final.htm

Laminated woven sacks covered by these investigations are bags consisting of one or more plies of fabric consisting of woven polypropylene strip and/or woven polyethylene strip, regardless of the width of the strip; with or without an extrusion coating of polypropylene and/or polyethylene on one or both sides of the fabric; laminated by any method either to an exterior ply of plastic film such as biaxially-oriented polypropylene (BOPP), polyester (PET), polyethylene (PE), nylon, or any film suitable for printing, or to an exterior ply of paper; printed; displaying, containing, or comprising three or more visible colors (e.g., laminated woven sacks printed with three different shades of blue would be covered by the scope), not including the color of the woven fabric; regardless of the type of printing process used; with or without lining; with or without handles; with or without special closing features (including, but not limited to, closures that are sewn, glued, easy-open (e.g., tape or thread), re-closable (e.g., slider, hook and loop, zipper), hot-welded, adhesive-welded, or press-to-close; whether finished or unfinished (e.g., whether or not closed on one end and whether or not in roll form, including, but not limited to, sheets, lay-flat, or formed in tubes); not exceeding one kilogram in actual weight. Laminated woven sacks produced in the Socialist Republic of Vietnam are subject to the scope regardless of the country of origin of the fabric used to make the sack.

The scope of these investigations excludes laminated woven sacks having each of the following physical characteristics: (1) no side greater than 24 inches, (2) weight less than 100 grams, (3) an open top that is neither sealable nor closable, the rim of which is hemmed or sewn around the entire circumference, (4) carry handles sewn on the open end, (5) side gussets, and (6) either a bottom gusset or a square or rectangular bottom. The excluded items with the above-mentioned physical characteristics may be referred to as reusable shopping bags.

Subject laminated woven sacks are currently classifiable under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 6305.33.0040 and 6305.33.0080. If entered with plastic coating on both sides of the fabric consisting of woven polypropylene strip and/or woven polyethylene strip, laminated woven sacks may be classifiable under HTSUS subheadings 3923.21.0080, 3923.21.0095, and 3923.29.0000. If entered not closed on one end or in roll form (including, but not limited to, sheets, lay-flat tubing, and sleeves), laminated woven sacks may be classifiable under other HTSUS subheadings, including 3917.39.0050, 3921.90.1100, 3921.90.1500, and 5903.90.2500. If the polypropylene strips and/or polyethylene strips making up the fabric measure more than 5 millimeters in width, laminated woven sacks may be classifiable under other HTSUS subheadings including 4601.99.0500, 4601.99.9000, and 4602.90.0000. Although HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Quad seal bags are laminated non-woven bags, consisting of a flexible plastic inner layer, laminated to a reverse printed BOPP or polyester outer layer, with or without a metallized layer, and with four hermetically heat-sealed vertical edges.
