FOREIGN PRODUCERS'/EXPORTERS' QUESTIONNAIRE

STAINLESS STEEL BAR FROM BRAZIL, INDIA, JAPAN, AND SPAIN

This questionnaire must be received by the Commission by <u>May 14, 2018</u>. See last page for filing instructions.

The information called for in this questionnaire is for use by the United States International Trade Commission in connection with its reviews of the antidumping duty orders concerning stainless steel bar from Brazil, India, Japan, and Spain (Inv. Nos. 731-TA-678-679 and 681-682 (Fourth Review)). The information requested in the questionnaire is requested under the authority of the Tariff Act of 1930, title VII.

PART I.--GENERAL INFORMATION

Background.--On February 21, 1995, the Department of Commerce ("Commerce") issued antidumping duty orders on imports of stainless steel bar from Brazil, India, and Japan (60 FR 9661), and subsequently issued an antidumping duty order on imports of stainless steel bar from Spain (60 FR 11656) on March 2, 1995. On July 3, 2017, the Commission instituted reviews pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. § 1675(c)) (the Act) to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. If both the Commission and Commerce make affirmative determinations, the orders will remain in place. If either the Commission or Commerce makes negative determinations, Commerce will revoke the orders. Questionnaires and other information pertinent to this proceeding are available at

https://www.usitc.gov/investigations/701731/2017/stainless steel bar brazil india japan and spain/f ourth review full.htm.

Stainless steel bar covered by these reviews are articles of Stainless steel in straight lengths that have been either hot-rolled, forged, turned, cold-drawn, cold-rolled or otherwise cold-finished, or ground, having a uniform solid cross section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles, hexagons, octagons or other convex polygons. Stainless steel bar includes cold-finished stainless steel bars that are turned or ground in straight lengths, whether produced from hot-rolled bar or from straightened and cut rod or wire, and reinforcing bars that have indentations, ribs, grooves, or other deformations produced during the rolling process.

Except as specified above, the term does not include Stainless steel semi-finished products, cut length flat-rolled products (i.e., cut length rolled products which if less than 4.75 mm in thickness have a width measuring at least 10 times the thickness, or if 4.75 mm or more in thickness having a width which exceeds 150 mm and measures at least twice the thickness), wire (i.e., cold-formed products in coils, of any uniform solid cross section along their whole length, which do not conform to the definition of flat-rolled products), and angles, shapes and sections.

Exclusions for Japan: Effective for entries entered, or withdrawn for warehouse, for consumption on or after February 1, 2010, the term does not include one stainless steel bar product under Grade 304 and two types of stainless steel bar products under Grade 440C.

- (1) The Grade 304 product meets the following descriptions: round cross-section, cold finished, chrome plated (plating thickness 10 microns or greater), hardness of plating a minimum 750 HV on the Vickers Scale, maximum roundness deviation of 0.020 mm (based on circularity tolerance described in JIS B 0021 (1984)), in actual (measured) lengths from 2000 mm to 3005 mm, in nominal outside diameters ranging from 6 mm to 30 mm (diameter tolerance for any size from minus 0.010 mm to minus 0.053 mm). Tolerance can be defined as the specified permissible deviation from a specified nominal dimension; for example if the nominal outside diameter of the product entering is 6 mm, then the actual measured sizes should fall within 5.947 mm to 5.990 mm;
- (2) The first Grade 440C product meets the following descriptions: round cross-section, cold finished, heat treated through induction hardening, minimum Rockwell hardness of 56 Hardness of 56 HRC, maximum roundness deviation of 0.007 mm (based on circularity tolerance described in JIS B 0021 (1984)), in actual (measured) lengths from 500 mm to 3005 mm, in nominal outside diameters ranging from 3 mm to 38.10 mm (diameter tolerance for any size from 0.00 mm to minus 0.150 mm). Tolerance can be defined as the specified permissible deviation from a specified nominal dimension; for example if the nominal outside diameter of the product entering is 3 mm, then the actual measured sizes should fall within 2.850 mm to 3.000 mm;

(3) The second Grade 440C product meets the following descriptions: round cross-section, cold finished, chrome plated (plating thickness 5 microns or greater), heat treated through induction hardening, minimum Rockwell Hardness of 56 HRC, maximum roundness deviation of 0.007 mm (based on circularity tolerance described in JIS B 0021 (1984)), in actual (measured) lengths from 2000 mm to minus 3005 mm, (diameter tolerance for any size from minus 0.004 mm to minus 0.020 mm). Tolerance can be defined as the specified permissible deviation from a specified nominal dimension; for example if the nominal outside diameter of the product entering is 6 mm, then the actual measured sizes should fall within 5.980 mm to 5.996 mm. Except as specified above, the term does not include Stainless steel semi-finished products, cut length flat-rolled products (i.e., cut-length rolled products which if less than 4.75 mm in thickness have a width measuring at least 10 times the thickness, or if 4.75 mm or more in thickness having a width which exceeds 150 mm and measures at least twice the thickness), wire (i.e., cold-formed products in coils, of any uniform solid cross section along their whole length, which do not conform to the definition of flat-rolled products), and angles, shapes and sections.

Stainless steel bar is currently imported under statistical reporting numbers 7222.10.00, 7222.11.00, 7222.19.00, 7222.20.00, and 7222.30.00 of the Harmonized Tariff Schedule of the United States (HTSUS). The HTSUS provisions are for convenience and customs purposes; the written description of the scope is dispositive.

<u>Reporting of information</u>.-- If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, purchaser and/or foreign producer questionnaire), you need not respond to duplicated questions.

<u>Confidentiality</u>.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

<u>Verification</u>.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

<u>Valid number error messages.</u>--If you are completing this form in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 rather than \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. The solution to this data

entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete this form. Detailed instructions on how to resolve this issue is provided at the end of this questionnaire and is available upon request from Kristina Lara (202-205-3386, kristina.lara@usitc.gov).

I-1. <u>OMB statistics</u>.--Please report below the actual number of hours required and the cost to your firm of completing this questionnaire.

Hours	Dollars

The questions in this questionnaire have been reviewed with market participants to ensure that issues of concern are adequately addressed and that data requests are sufficient, meaningful, and as limited as possible. Public reporting burden for this questionnaire is estimated to average 30 hours per response, including the time for reviewing instructions, gathering data, and completing and reviewing the questionnaire.

We welcome comments regarding the accuracy of this burden estimate, suggestions for reducing the burden, and any suggestions for improving this questionnaire. Please attach such comments to your response or send to the Office of Investigations, USITC, 500 E St. SW, Washington, DC 20436.

I-2. <u>Establishments covered.</u>—Provide the name and address of establishment(s) covered by this questionnaire. If your firm is publicly traded, please specify the stock exchange and trading symbol.

" <u>Establishment</u> " Each facility of a firm in Brazil, India, Japan, and Spain involved in the
production or export of stainless steel bar, including auxiliary facilities operated in conjunction
with (whether or not physically separate from) such facilities. Firms operating more than one
establishment in Brazil, India, Japan, and Spain should combine the data for all establishments
into a single report.

I-3. <u>U.S. importers</u>.--Please provide the names, contacts, email addresses, and telephone numbers of the <u>FIVE</u> largest U.S. importers of your firm's stainless steel bar in 2017.

No.	Importer's name	Contact person	Email address	Area code and telephone number	Share of your firm's 2017 U.S. exports (%)

PART II.--TRADE AND RELATED INFORMATION

Further information on this part of the questionnaire can be obtained from Kristina Lara (202-205-3386, kristina.lara@usitc.gov). Supply all data requested on a calendar-year basis.

II-1.	<u>Contact information</u> Please identify the responsible individual and the manner by which
	Commission staff may contact that individual regarding the confidential information submitted
	in part II.

Name	
Title	
Email	
Telephone	
Fax	

II-2. <u>Changes in operations.</u>—Please indicate whether your firm has experienced any of the following changes in relation to the production of stainless steel bar since January 1, 2012.

Chec	k as many as appropriate.	If checked, please describe; leave blank if not applicable.
	Plant openings	
	Plant closings	
	Relocations	
	Expansions	
	Acquisitions	
	Consolidations	
	Prolonged shutdowns or production curtailments	
	Revised labor agreements	
	Other (e.g., technology)	

II-2b. <u>Anticipated changes in operations.</u>—Does your firm anticipate any changes in the character of its operations or organization relating to the production of stainless steel bar in the future?

No	Yes	If yes, supply details as to the time, nature, and significance of such changes and provide underlying assumptions, along with relevant portions of business plans or other supporting documentations that address this issue. Include in your response a specific projection of your firm's capacity to produce stainless steel bar (in short tons) for 2018 and 2019.

II-3a. **Production using same machinery**.-- Please report your firm's production of products made on the same equipment and machinery used to produce stainless steel bar, and the combined production capacity on this shared equipment and machinery.

"Overall production capacity" or "capacity" –The level of production that your establishment(s) could reasonably have expected to attain during the specified periods for all products manufactured in that establishment using the same manufacturing equipment. Assume normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup).

Note.--If your firm does not produce any out-of-scope merchandise on the same machinery and equipment as scope merchandise (i.e., you have reported no data for "other products" in this question) then the "overall production capacity" numbers reported in this question should be exactly equal to the "average production capacity" numbers reported in question II-11. If, however, your firm does produce out-of-scope merchandise using the same machinery and equipment as scope mercandhise (i.e., you have reported data for "other products" in this question), then the "average production capacity" reported in question II-11 should exclude the portion of "overall production capacity" that was used to produce this out-of-scope merchandise (i.e., "average production capacity" in question II-11 should be smaller than "overall production capacity" in this question).

"Production" -- All production in your establishment(s) in Brazil, India, Japan, and Spain, including production consumed internally within your firm.

II-3a. Production using same machinery.—Continued

operations of inventories, research and steel bar in t	or organizati purchases, d developmo the future if	tionWould your firm anticipate any changes in the character of its on, including its production capacity, production, U.S. shipments, employment, revenues, costs, profits, cash flow, capital expenditures ent expenditures, or asset values relating to the production of stainled the antidumping duty orders on stainless steel bar from Brazil, India, to be revoked?	SS
No	Yes	If yes, supply details as to the time, nature, and significance of such changes and provide underlying assumptions, along with relevant portions of business plans or other supporting documentations that address this issue. Include in your response a specific projection of your firm's capacity to produce stainless steel bar (in short tons) for 2018 and 2019.	

II-11. <u>Trade data</u>.--Report your firm's production capacity, production, shipments, and inventories related to the production of stainless steel bar in your establishment(s) in Brazil, India, Japan, and Spain during the specified periods. Do not include resales of stainless steel bar that your firm did not produce in this question; those data to the degree they are exported to the United States should only be reported in question II-13.

<u>Do not submit data by manufacturing facility if they are in the same country.</u> If your firm has multiple manufacturing establishments within one country, you are required to combine data for those establishments within one foreign producer questionnaire response.

<u>Do not submit data on multiple countries combined</u>. The establishments reported here should all be located in the country of the firm's address reported on the certification page. Multinational companies with production in multiple subject countries should submit separate foreign producer questionnaire responses for each subject country.

"Average production capacity" or "capacity" –The level of production that your establishment(s) could reasonably have expected to attain during the specified periods for all products manufactured in that establishment using the same manufacturing equipment. Assume normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup; and a typical or representative product mix).

"Production" -- All production in your establishment(s) in Brazil, India, Japan, and Spain, including production consumed internally within your firm.

"Shipments"—Shipments of products produced in your establishment(s) in Brazil, India, Japan, and Spain. Quantities reported should be net of returns. Report net values (i.e., gross sales values less all discounts, allowances, rebates, prepaid freight, and the value of returned goods) in U.S. dollars, f.o.b. your point of shipment in Brazil, India, Japan, and Spain.

"Home market commercial shipments" -- Shipments, other than internal consumption and transfers to related firms, within Brazil, India, Japan, and Spain.

"Home market internal consumption/transfers to related firms"--Shipments made to related firms in Brazil, India, Japan, and Spain, including product consumed internally by your firm.

"Export shipments" -- Shipments to destinations outside Brazil, India, Japan, and Spain, including shipments to related firms.

"Inventories" -- Finished goods inventory, not raw materials or work-in-progress.

Note: As requested in Part I of this questionnaire, please keep all supporting documents/records used in the preparation of the trade data, as Commission staff may contact your firm regarding questions on the trade data. The Commission may also request that your company submit copies of the supporting documents/records (such as production and sales schedules, inventory records, etc.) used to compile these data.

RECONCILIATION OF SHIPMENTS, PRODUCTION, AND INVENTORY.--Generally, the data reported for the end-of-period inventories (i.e., line T) should be equal to the beginning-of-period inventories (i.e., line B), plus production (i.e., line C), less total shipments (i.e., lines D, F, H, J, L, and N). Please ensure that any differences are not due to data entry errors in completing this form, but rather actually reflect your firm's records; and also provide any likely explanations for any differences (e.g., theft, loss, damage, record systems issues, etc.) if they exist.

III-20.	Other explanationsIf your firm would like to further explain a response to a question in Part III that did not provide a narrative response box, please note the question number and the explanation in the space provided below. Please also use this space to highlight any issues your firm had in providing the data in this section, including but not limited to technical issues with the MS Word questionnaire.

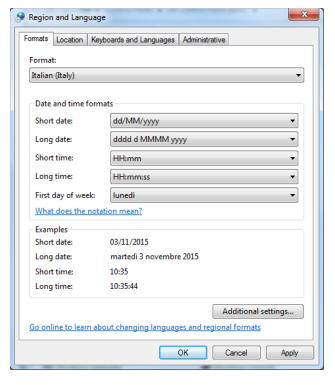

Correcting Valid number error messages.—If you are completing a Commission questionnaire in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 instead of as \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. This issues stem from your computer number formatting setting (e.g., not the MS Word document itself, but the computer from which you are opening up the document). In the United States commas (,) delineate multiples of 1000 and periods (.) delineate fractions less than one. Many EU countries use the reverse where multiples of 1000 are delineated with periods (.) and fractions less than one are delineated with commas (,). The US International Trade Commission's questionnaires are set-up in the United States with the U.S. number formatting. When this formatting interacts with a computer set to EU number formatting, we believe this may cause this issue.

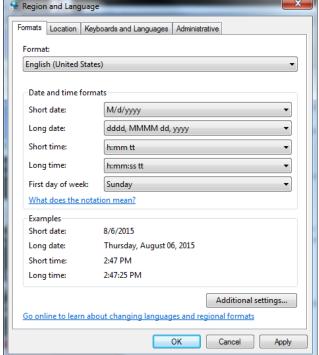

The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete the questionnaire.

To temporarily change your computer's number settings to U.S. settings, please do the following (for Microsoft Windows Operating system):

- START
- Control Panel
- Region and Language (under Clock, Language, and Region category)
- Format tab
- Change the Format from your existing one (e.g. "Italian (Italy)") to "English (United States)" (see screen shots below)

When you do this the number "twelve million dollars and thirty five cents" would change from \$12.000.000,35 (Italy format) to \$12,000,000.35 (U.S. format), and then there will be no conflict with the USITC foreign producer questionnaire form. When you finish reporting the data then you can close the questionnaire and switch back to Italy settings.

HOW TO FILE YOUR QUESTIONNAIRE RESPONSE

This questionnaire is available as a "fillable" form in MS Word format on the Commission's website at:

https://www.usitc.gov/investigations/701731/2017/stainless steel bar brazil india ja pan and spain/fourth review full.htm

Please do not attempt to modify the format or permissions of the questionnaire document. Please submit the completed questionnaire using one of the methods noted below. If your firm is unable to complete the MS Word questionnaire or cannot use one of the electronic methods of submission, please contact the Commission for further instructions.

• <u>Upload via Secure Drop Box</u>.—Upload the MS Word questionnaire along with a scanned copy of the signed certification page (page 1) through the Commission's secure upload facility:

Web address: https://dropbox.usitc.gov/oinv/ Pin: SSBAR

• E-mail.—E-mail the MS Word questionnaire to kristina.lara@usitc.gov; include a scanned copy of the signed certification page (page 1). Submitters are strongly encouraged to encrypt nonpublic documents that are electronically transmitted to the Commission to protect your sensitive information from unauthorized disclosure. The USITC secure drop-box system and the Electronic Document Information System (EDIS) use Federal Information Processing Standards (FIPS) 140-2 cryptographic algorithms to encrypt data in transit. Submitting your nonpublic documents by a means that does not use these encryption algorithms (such as by email) may subject your firm's nonpublic information to unauthorized disclosure during transmission. If you choose a non-encrypted method of electronic transmission, the Commission warns you that the risk of such possible unauthorized disclosure is assumed by you and not by the Commission.

If your firm <u>did not </u>**produce or export this product**, please fill out page 1, print, sign, and submit a scanned copy to the Commission.

Parties to this proceeding.—If your firm is a party to this proceeding, it is required to serve a copy of the completed questionnaire on parties to the proceeding that are subject to administrative protective order (see 19 CFR § 207.7). A list of such parties may be obtained from the Commission's Secretary (202-205-1803). A certificate of service must accompany the completed questionnaire you submit (see 19 CFR § 207.7). Service of the questionnaire must be made in paper form.
