#### PART I.--GENERAL INFORMATION

**Background**.--On April 1, 1996, the Commission instituted a preliminary antidumping investigation in response to a petition filed by the Florida Tomato Growers Exchange, Orlando, FL; Florida Fruit and Vegetable Association, Orlando, FL; Florida Farm Bureau Federation, Gainesville, FL; South Carolina Tomato Association, Inc., Charleston, SC; Gadsden County Tomato Growers Association, Inc., Quincy, FL; Accomack County Farm Bureau, Accomack, VA; Florida Tomato Exchange, Orlando, FL; Bob Crawford, Commissioner of Agriculture, Florida Department of Agriculture and Consumer Services, Tallahassee, FL; and the Ad Hoc Group of Florida, California, Georgia, Pennsylvania, South Carolina, Tennessee, and Virginia Tomato Growers (61 FR 15968, April 10, 1996). On May 16, 1996, the Commission notified the Department of Commerce ("Commerce") of its affirmative preliminary injury determination. On October 28, 1996, Commerce preliminarily determined that imports of fresh tomatoes from Mexico were being sold at less than fair value in the United States.

On November 1, 1996, Commerce suspended the investigation pursuant to a suspension agreement with growers and processors that accounted for substantially all imports of fresh tomatoes from Mexico. A suspension agreement has been terminated and renegotiated three times previously. The most recent agreement was terminated on May 7, 2019, and on that date, Commerce resumed its investigation. Accordingly, the Commission is resuming the final phase of its antidumping duty investigation on fresh tomatoes from Mexico.

Antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the Commerce makes an affirmative determination of dumping. Questionnaires and other information pertinent to this proceeding are available at

https://www.usitc.gov/investigations/701731/2019/fresh\_tomatoes\_mexico/final.htm

**<u>Fresh tomatoes</u>** covered by this investigation are all fresh or chilled tomatoes (fresh tomatoes) which have Mexico as their origin, except for those tomatoes which are for processing. Processing is defined to include preserving by any commercial process, such as canning, dehydrating, drying, or the addition of chemical substances, or converting the tomato product into juices, sauces, or purees. Fresh tomatoes that are imported for cutting up, not further processing (e.g., tomatoes used in the preparation of fresh salsa or salad bars), are covered by the investigation.

Commercially grown tomatoes, both for the fresh market and for processing, are classified as Lycopersicon esculentum. Important commercial varieties of fresh tomatoes include common round, cherry, grape, plum, greenhouse, and pear tomatoes, all of which are covered by this investigation.

Tomatoes imported from Mexico covered by this investigation are classified under the following subheading of the Harmonized Tariff Schedule of the United States (HTSUS), according to the season of importation: 0702. Although the HTSUS numbers are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

<u>Reporting of information</u>.-- If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

<u>Confidentiality</u>.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of

numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

**Verification**.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

<u>Release of information</u>.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

**D-GRIDS tool**.--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage (<u>https://www.usitc.gov/trade\_remedy/question.htm</u>) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is <u>optional</u>. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool are available within the D-GRIDs tool itself.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12. For the January to March periods, calculate similarly and divide by 3.

*"Hours worked"* includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.
