

Medication Safety Self Assessment® for Perioperative Settings

May 26, 2020

⚠ Coming early 2021!

The **ISMP Medication Safety Self Assessment® for Perioperative Settings** offers hospitals, freestanding ambulatory centers, and other facilities that perform outpatient medical and/or surgical procedures a unique opportunity to:

- Heighten awareness of best practices associated with safe medication systems in the perioperative setting
- Assist your interdisciplinary team with proactively identifying and prioritizing facility-specific gaps in perioperative medication systems to avoid patient harm
- Create a baseline of your efforts to evaluate perioperative medication safety and measure your progress over time
- Help analyze the current state of medication safety in perioperative settings and create a baseline measure of national efforts

Funding Source: This assessment tool, which was developed by the Institute for Safe Medication Practices (ISMP), was funded by the **US Food and Drug Administration (FDA)** under contract #75F40119C1020. All materials associated with this project represent the position of ISMP and not necessarily that of the FDA.

PRA Burden Statement: According to the Paperwork Reduction Act (PRA) of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid Office of Management and Budget (OMB) control/number. The valid OMB control/number for this information collection is 0910-0847 and the expiration date is 12/31/2022. The time required to determine eligibility to use the assessment is estimated to average 2 minutes per person, and the time required for small teams to complete this information collection is estimated to be 8.54 hours for Ambulatory Surgical Centers and 25.67 hours for Hospitals.

Security of Participant Information: Participant information will remain secure to the extent permitted by law.
