

Dear [LEA POC Name],

I am writing to request your approval for your Local Education Agency (LEA) to participate in the Healthy Schools Program Evaluation. The Centers for Disease Control and Prevention (CDC) has partnered with ICF to conduct this important program evaluation in a small number of states. The Healthy Schools Program is designed to create healthier nutrition environments, improve the quality of physical education and physical activity, and improve student management of chronic health conditions in schools. ICF is working with CDC to evaluate the program to understand how support from states to local districts and schools impacts schools.

Your state's education agency is funded by CDC to implement the Healthy Schools Program to create healthier school environments, and your LEA is one of the districts participating in this program. Your district is being invited to participate in this evaluation at two time points: in school year 2019-2020 and again in school year 2021-2022. If your district agrees to participate, we would like your assistance to identify **one staff** member to participate in a web-based implementation survey and **two staff** members to participate in individual key-informant interviews in round one (school year 2019-2020). Your district will be contacted again in two years to confirm the names of staff members who will participate in the second round of the survey and interviews. These should preferably be the same staff participating in round one, but can be different staff if needed.

The purpose of the survey and the interviews is to learn about LEAs strategies and activities to achieve healthy schools. **The survey and interviews should be completed by staff persons within your district who are most knowledgeable about your district's activities to promote school health in schools.** The survey and interviews should each take about 60-75 minutes to complete. All data collected will remain private throughout the entire project and staff personal identifiable information will not be associated with any information shared for the purpose of this evaluation. Results from this evaluation will be presented in aggregate form only.

A representative from ICF will contact you to confirm receipt of this email, confirm willingness to participate in the evaluation, gather contact information for the staff designated to complete the survey and interviews, and answer any questions you may have. You may also contact Dr. Isabela Lucas (ICF) at [Isabela.lucas@icf.com](mailto:Isabela.lucas@icf.com) or 404-592-2155 with any immediate questions. The results of the evaluation will be used to improve support and implementation of school health programs. Your support to this evaluation is greatly appreciated.

Sincerely yours,  
[Recruiter], ICF
