#### **Paperwork Reduction Act Burden Statement**

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Cor collection is 2120-####. Public reporting for this collection of information is estimated to be between 60 and 17 hours per response. voluntary. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestion: Independence Ave., SW, Washington, D.C. 20591, Attn: Information Collection Clearance Officer, ASP-110.

# **US FAA CORSIA MRV I**

# **EMISSIONS REPORT (ER)**

#### **CONTENTS**

- 1 Aeroplane operator identification and description of activities
- 2 Underlying basic information of the Emissions Report
- 3 Aeroplane fleet and fuel types
- 4 Fuel density
- 5. Reporting
- 5.1 Reporting State pairs
- 5.2 Reporting Aerodrome pairs
  - 6 Data gaps

#### **Template Information**

Template provided by:

U.S. Federal Aviation Administration in support of the US FAA CORSIA MRV F

Version (publication date): 2019-10-01

Note: For the purpose of this template, international flight is defined as in Annex 16, Volume 1.1.2, and Chapter 2, 2.1.

for failure to comply with a collection of information ntrol Number. The OMB Control Number for this All responses to this collection of information are s for reducing this burden to the FAA at: 800

# 2 UNDERLYING BASIC INFORMATION OF THE EMISSIONS REPORT

	Reporting year  Please provide the reporting year.	
	End of reporting period  Usually the last day of the reporting year, as long as the operator has not ceased flight operations during the reporting year. Use the format yyyy-mm-dd.	
	Date of issue  Date on which the Emissions Report was compiled. Use the format yyyy-mm-dd.	
_	Version In case of multiple submissions, please enter the Emissions Report version number.	
	Current Emissions Monitoring Plan  Please enter the version number of the approved Emissions Monitoring Plan on which this Emissions Report is based.	
-	Approval of the current Emissions Monitoring Plan  Please enter the date of the approval of the Emissions Monitoring Plan. Use the format yyyy-mm-dd.	
_	Emissions Monitoring Plan is valid from  Please enter the date of validity of the current Emissions Monitoring Plan. Use the format yyyy-mm-dd.	
	Last update of the Emissions Monitoring Plan  Please enter the date of the Emissions Monitoring Plan on which basis this report was created. Use the format yyyy-mm-dd.	
	Was more than one approved Emissions Monitoring Plan version used during the reporting year?  Please choose "yes" if the Emissions Report is based on more than one Emissions Monitoring Plan.	
_	Explanation  Please explain in detail the implications of the use of several Emissions Monitoring Plans during the reporting year.	
-	Previous Emissions Monitoring Plan (if applicable)  Please list the previous Emissions Monitoring Plan version with version number and date of approval (if applicable).	
-	Fuel Use Monitoring Method and I or the ICAO CORSIA CO <sub>2</sub> Estimation and Reporting Tool (CERT)  Please indicate whether the aeroplane operator used the ICAO CORSIA CO <sub>2</sub> Estimation and Reporting Tool (CERT) and whether the tool was used for all international flights or only for international flights not subject to offsetting requirements.	

#### g) Fuel Allocation with Block Hour

Please indicate whether the aeroplane operator used the Fuel Use Monitoring Method "Fuel Allocation with Block Hour" during the reporting year.

#### g1) Underlying aeroplane fuel burn

Please complete the table below with the average fuel burn ratio (AFBR) for each aeroplane type as specified in Doc 8643 — Aircraft Type Designators. AFBR will be provided in tonnes per hour (rounded to at least three decimal places) for the current reporting year.

Additional information about Doc 8643 — Aircraft Type Designators can be found at: http://www.icao.int/publications/DOC8643/Pages/Search.aspx

No.	ICAO aircraft type designator	Specific fuel burn (in tonnes per hour)

#### **3 AEROPLANE FLEET AND FUEL TYPES**

#### a) Registration of all aeroplanes operated in the reporting year

Please list all aeroplanes with an MTOM greater than 5 700 kg (12 566 lbs) operated on international flights, as defined in Annex 16, Volume IV, Part II, Chapter 1, 1.1.2, and Chapter 2, 2.1, during the reporting period. If necessary, please attach a separate list.

Please enter the ICAO aircraft type designator, as specified in Doc 8643 — Aircraft Type Designators, the registration marks and state whether the aeroplane is owned or leased. Please mark with an "X" applicable fuel(s) type(s) for each ICAO aircraft type designator."

Additional information about Doc 8643 — Aircraft Type Designators can be found at:

http://www.icao.int/publications/DOC8643/Pages/Search.aspx

(\*) For the purposes of this template, the fuel total could include the sum of equivalent fuels.

#### **4 FUEL DENSITY**

- 1	Fue	1 -1 -	:	
aı		n ne	ıncı	T۱/

Please specify whether standard and / or actual density was used to determine the fuel uplift in the reporting year.

#### a1) Consistency

Please confirm that the application of density data for CORSIA purposes is fully identical to the actual procedures used for operational and safety reasons.

#### **5 REPORTING**

# a) Aggregation level of reported data

Please select whether the aeroplane operator reports on a State pair or at an aerodrome pair level as advised by the State. If State pair level is chosen, please continue with "5.1 Reporting - State pairs". If aerodrome pair level is selected, please continue with "5.2 Reporting - Aerodrome pairs".

#### **5.1 REPORTING - STATE PAIRS**

Explanation: Please complete the list underneath. All State pairs operated during the reporting year have to be reported.

**Note I:** Please report both directions between State pairs if applicable (A-B and B-A).

Note II: If you used different type of fuels on the same State pair with different fuel conversion factors, you need to create an identical State pair and report this portion of fuel separately. Please note, emissions from CORSIA eligible fuels are calculated with the fuel conversion factor(s) from corresponding aviation fuels.

Note III: Please also complete the CORSIA eligible fuels supplementary information to the Emissions Report, if CORSIA eligible fuels were used during the reporting period.

#### a) Summary of reported international flights and emissions

Total CO <sub>2</sub> emissions from international flights (in tonnes):	
Total CO <sub>2</sub> emissions from flights subject to offsetting requirements (in tonnes):	
Total number of international flights during reporting period:	
Total number of international flights subject to offsetting requirements:	
Total emissions reductions claimed from the use of CORSIA eligible fuels (in tonnes):	

#### b) Summary of fuel quantities(\*) (in tonnes):

(\*) For the purposes of this template, the fuel total could include the sum of equivalent fuels.

Jet-A	
Jet-A1	
Jet-B	
AvGas	

#### b1) CORSIA eligible fuels claimed

If claiming emission reductions from the use of CORSIA eligible fuels, please complete the table below. Supplementary information about the claim is also required, and can be reported using the CORSIA eligible fuels supplementary information template.

(\*) For the purposes of this template, the fuel total could include the sum of equivalent fuels.

	Fuel	type			
Fuel type (e.g. Jet-A) (*)	Feedstock	Conversion process	Total mass of the neat CORSIA eligible fuel (in tonnes)	Approved Life Cycle Emissions values	Emission reductions claimed
		Total emission	A eligible fuel(s) claimed		

#### c) Table of all State pairs

Please list all State pairs on which international flights were performed and enter the number of flights and the amount of CO<sub>2</sub> emissions.

(\*) For the purposes of this template, the fuel total could include the sum of equivalent fuels.

State of departure	State of arrival	CO <sub>2</sub> emissions estimated with CERT?	Or migrits	Fuel type <sup>(*)</sup>	Total mass of fuel (in tonnes)	Fuel conversion factors	Total CO <sub>2</sub> emissions (in tonnes)	Subject to offsetting requirements?

## **5.2 REPORTING - AERODROME PAIRS**

Explanation: Please complete the list underneath. All aerodrome pairs that were operated during the reporting year have to be reported.

Note 1: Please report both directions between aerodrome pairs if applicable (A-B and B-A).

Note II: If you used different type of fuels on the same aerodrome pair with different fuel conversion factors, you need to create an identical aerodrome pair and report this portion of fuel separately. Please note, emissions from CORSIA eligible fuels are calculated with the fuel conversion factor(s) from corresponding aviation fuels.

Note III: Please also complete the CORSIA eligible fuels supplementary information to the Emissions Report, if CORSIA eligible fuels were used during the reporting period.

## a) Summary of reported international flights and emissions

Total CO <sub>2</sub> emissions from international flights (in tonnes):	
Total CO <sub>2</sub> emissions from flights subject to offsetting requirements (in tonnes):	
Total number of international flights during reporting period:	
Total number of international flights subject to offsetting requirements:	
Total emissions reductions claimed from the use of CORSIA eligible fuels (in tonnes):	

# b) Summary of fuel quantities(\*) (in tonnes):

(\*) For the purposes of this template, the fuel total could include the sum of equivalent fuels.

Jet-A	
Jet-A1	
Jet-B	
AvGas	

## b1) CORSIA eligible fuels claimed

If claiming emission reductions from the use of CORSIA eligible fuels, please complete the table below. Supplementary information about the claim is also required, and can be reported using the CORSIA eligible fuels supplementary information template.

(\*) For the purposes of this template, the fuel total could include the sum of equivalent fuels.

	Fuel type	)			
Fuel type (e.g. Jet-A) (*)	Feedstock	Conversion process	Total mass of the neat CORSIA eligible fuel (in tonnes)	Approved Life Cycle Emissions values	Emission reductions claimed
	Total emi	ssion reductions	s from the use of CORSIA elig	ible fuel(s) claimed	

## c) Table of all aerodrome pairs

Please list all aerodrome pairs on which international flights were performed and enter the number of flights and the amount of CO<sub>2</sub> emissions.

(\*) For the purposes of this template, the fuel total could include the sum of equivalent fuels.

D	eparture		Arrival	CO <sub>2</sub> emissions	Total	Fuel	Total	Fuel	CO,	Subject to
ICAO airport code	State	ICAO airport code	State	estimated with CERT?	No. of flights	Fuel type <sup>(*)</sup>	amount of fuel used (in tonnes)	conversion	emissions (in tonnes)	Subject to offsetting requirements?

#### **6 DATA GAPS**

**Explanation:** "Data gaps" occur when an aeroplane operator is missing data which is relevant for the determination of its fuel use for one or more international flights in accordance with Annex 16, Volume IV, Part II, Chapter 2, 2.2.1.1.

### a) Did any data gaps occur during the reporting year?

### b) Is the threshold of 5 per cent for data gaps exceeded?

In 2019 and 2020, 5 per cent refers to international flights, as defined in Annex 16, Volume IV, Part II, Chapter 1, 1.1.2, and Chapter 2, 2.1.

From 2021 onwards, 5 per cent refers to international flights subject to offsetting requirements, as defined in Annex 16, Volume IV, Part II, Chapter 1, 1.1.2, and Chapter 3, 3.1.

The aeroplane operator using a Fuel Use Monitoring Method shall fill data gaps using the ICAO CORSIA CERT, provided that the data gaps during a compliance period do not exceed the thresholds described above.

Estimated emissions should then appear in spreadsheet **5.1 Reporting - State Pairs** as separate State pairs (if reporting is done at State pair level) or in spreadsheet **5.2 Reporting - Aerodrome Pairs** as separate aerodrome pairs (if reporting is done at aerodrome pair level).

#### b1) Per cent of data gaps

Please enter per cent of data gaps (according to criteria defined in Part II, Chapter 2, 2.5.1 and rounded to the nearest 0.1 per cent)

# b2) List of data gaps if the 5 per cent threshold has been exceeded in the reporting year

Please complete the list underneath if the threshold has been exceeded.

No.	Reference (Describe the data gap, either by referencing the aeroplane, aerodrome, flight number, etc. for which the data gap occurred and/or the start and end date of the period where the data gap occured.)	Cause (Please describe the cause why the data gap ocurred.)	Type (Describe the type of data gap, such as "density measurement not available", "fuel uplift not available", etc.)	Replacement method (Describe the method of determining alternative data, such as referencing the procedure in your Emissions Monitoring Plan, "by Tool", etc.)	${ m CO}_2$ emissions (in tonnes) (Provide the amount of ${ m CO}_2$ emissions which are effected by the data gap).	Remarks
