

OMB SUPPORTING STATEMENT

Regulations Governing Reemployment of Annuitants in the Federal Service

A. Justification

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.

Sections 8344 and 8468 of title 5, United States Code, govern the reemployment of Civil Service Retirement System (CSRS) and Federal Employees Retirement System (FERS) annuitants in the Federal service. Some types of annuity terminate on reemployment, while other types of annuity continue during reemployment, with all or a portion of the annuity being offset from the reemployed annuitant's basic pay. Consequently, the reemploying agency needs timely information regarding the reemployed annuitant's type of separation for retirement and amount of annuity. Only then can the agency correctly establish the net rate of pay. The agency is also responsible for notifying the retirement system that the annuitant is reemployed.

Section 837.103(c) of title 5, Code of Federal Regulations, requires the reemployed annuitant to provide certain specific information to the employing agency. The information may be provided orally, or in writing, at the employing agency's discretion. No special form is required. The information which must be provided is –

- Whether the annuitant is then in receipt of annuity;
- The gross monthly amount of annuity the annuitant is then receiving;
- Whether the annuitant is retired on disability; and if so, whether the Office of Personnel Management (OPM) has found the annuitant recovered from the disability or restored to earning capacity; and
- If the annuitant is retired under CSRS, whether the annuitant's retirement was based on an involuntary separation, not for charges of misconduct or delinquency.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

The reemploying agency uses this information to determine whether annuity should be offset from the reemployed annuitant's pay, and if so, how much. If this information collection were not made the agencies could not comply with the law. A Privacy Act Statement has been included.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.

A written or oral request by the employing agency at the time of reemployment is the most efficient means of obtaining this information. The form is available in a PDF fillable format on our website and meets our Government Paperwork Elimination Act requirements.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

Every effort is made to identify and avoid duplication. The information is collected individually. There is no other way to obtain this information.

5. If the collection of information impacts small businesses or other small entities (Item 5 of OMB Form 83-I), describe any methods used to minimize.

This information collection request has no impact on small businesses and organizations.

6. Describe the consequence to Federal/DHS program or policy activities if the collection of information is not conducted, or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

If this information is not collected, OPM may pay persons who are no longer eligible. The information is collected only once in each case.

7. Explain any special circumstances that would cause an information collection to be conducted in a manner:
 - requiring respondents to report information to the agency more often than quarterly;
 - requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
 - requiring respondents to submit more than an original and two copies of any document;
 - requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records, for more than three years;
 - in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;
 - requiring the use of a statistical data classification that has not been reviewed and approved by OMB;
 - that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or
 - requiring respondents to submit proprietary trade secrets, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.

There are no special circumstances involved in the collection of this information.

8. Federal Register Notice: Provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice soliciting comments on the information collection prior to submission to OMB

On March 12, 2019, a 60 Day Federal Register Notice was published at 84 FR 8916 requesting comment. No comments were received.

9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.

No payment or gift is provided to the respondents based on return of this collection.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

This information collection is protected by the Privacy Act of 1974 and OPM regulations (5 CFR 831.106). The routine uses for disclosure appear in the *Federal Register* for OPM/Central-1 (73 FR 15013, *et seq.*, March 20, 2008).

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

This information collection does not include questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

12. Provide estimates of the hour burden of the collection of information. The statement should:

- a. Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desired. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.
- b. If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB Form 83-I.
- c. Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included in Item 14.

The number of annual reemployed annuitants by the Government is approximately 3,000. The information is collected only upon reemployment. No special form is required. We estimate that providing this information takes five minutes. The annual burden is 250 hours and is not expected to vary.

Form Name	Form Number	No. of Respondents	No. of Responses per Respondent	Average Burden per Response (in hours)	Total Annual Burden (in hours)	Average Hourly Wage Rate	Total Annual Respondent Cost
Reemployment of Annuitants	N/A	3,000	1	.08333	250	\$21.50	\$6,750

The cost to the respondent is \$6,750.

13. Provide an estimate of the total annual cost burden to respondents or record keepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14.)

The cost estimate should be split into two components: (1) a total capital and start-up cost component (annualized over its expected useful life); and (b) a total operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information. Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.

If cost estimates are expected to vary widely, agencies should present ranges of cost burdens and explain the reasons for the variance. The cost of purchasing or contracting out information collection services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection as appropriate.

Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information to keep records for the government, or (4) as part of customary and usual business or private practices.

There is no change in the respondent burden.

14. Provide estimates of annualized cost to the Federal Government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing and support staff), and any other expense that would have been incurred without this collection of information. You may also aggregate cost estimates for Items 12, 13, and 14 in a single table.

The annualized cost to the Federal government is \$71,967. This cost was determined by employee salary hours devoted to the program and overhead.

15. Explain the reasons for any program changes or adjustments reported in Items 13 or 14 of the OMB Form 83-I. Changes in hour burden, i.e., program changes or adjustments made to annual reporting and recordkeeping **hour** and **cost** burden. A program change is the result of deliberate Federal government action. All new collections and any subsequent revisions of existing collections (e.g., the addition or deletion of questions) are recorded as program changes. An adjustment is a change that is not the result of a deliberate Federal government action. These changes that result from new estimates or actions not controllable by the Federal government are recorded as adjustments.

There are no changes.

16. For collections of information whose results will be published, outline plans for tabulation and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.

The results of this information collection are not published.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain reasons that display would be inappropriate.

Pursuant to title 5 CFR 1320.8(b)(1), it would not be appropriate to display the OMB clearance expiration date because there is no form that captures all possible required data elements from every reemployed annuitant. Reemployment of Annuitants, requires agencies to collect information from retirees who become employed in Government positions. This regulation allows the agency to make a unique collection of only the information needed for a particular customer case and not over-burden our entire customer base by sending a generic information collection request (ICR) that requires them to possibly review and complete information that we may already have access to.

18. Explain each exception to the certification statement identified in Item 19 "Certification for Paperwork Reduction Act Submissions," of OMB Form 83-I.

There are no exceptions to the certification statement.
