

## Invitation to Participate in UCSF Research Study Usability Testing of Virtual Reality

**What:** We are gathering user feedback on virtual reality for pain management. Participants will try on a virtual reality headset and answer questions about pain management and technology. Usability tests will last approximately 60 minutes.

**Where:** Private offices at Zuckerberg San Francisco General Hospital

**Who:** You can participate if you meet the following criteria. Participation is voluntary.

- 18 years or older
- Visited the ZSFG pain clinic within the last 6 months
- No history of seizure disorder, vertigo, or claustrophobia

If you participate you will receive \$25 as a token of appreciation.

**Why:** We want to improve technology so it is more usable for diverse patients.
