## **SUPPLEMENTARY INFORMATION:**

*Title*: FERC-920 [Electric Quarterly Reports (EQR)]

OMB Control No.: 1902-0255

*Abstract:* The Commission originally set forth the EQR filing requirements in Order No. 2001 (Docket No. RM01-8-000, issued April 25, 2002, at

http://elibrary.ferc.gov/idmws/search/intermediate.asp?link\_file=yes&doclist=2270047).

Order No. 2001 required public utilities to electronically file EQRs summarizing

transaction information for short-term and long-term cost-based sales and market-based rate sales and the contractual terms and conditions in their agreements for all jurisdictional services. The Commission established the EQR reporting requirements to help ensure the collection of information needed to perform its regulatory functions over transmission and sales, while making data more useful to the public and allowing public utilities to better fulfill their responsibility under FPA section 205(c) to have rates on file in a convenient form and place. As noted in Order No. 2001, the EQR data is designed to "provide greater price transparency, promote competition, enhance confidence in the fairness of the markets, and provide a better means to detect and discourage discriminatory practices."

Since issuing Order No. 2001, the Commission has provided guidance and refined the reporting requirements, as necessary, to reflect changes in the Commission's rules and regulations. <sup>2</sup> The Commission also adopted an Electric Quarterly Report Data

To increase transparency broadly across all wholesale markets subject to the Commission's jurisdiction, the Commission issued Order No. 768 in 2012.<sup>4</sup> Order No. 768 required market participants that are excluded from the Commission's jurisdiction under the Federal Power Act section 205 (non-public utilities) and have more than a *de minimis* market presence to file EQRs with the Commission. In addition, Order No. 768 revised the EQR filing requirements to build upon the Commission's prior improvements to the reporting requirements and further enhance the goals of providing greater price transparency, promoting competition, instilling confidence in the fairness of the markets, and providing a better means to detect and discourage anti-competitive, discriminatory, and manipulative practices.

EQR information allows the public to assess supply and demand fundamentals and to price interstate wholesale market transactions. This, in turn, results in greater market confidence, lower transaction costs, and ultimately supports competitive markets. In addition, the data filed in the EQR strengthens the Commission's ability to exercise its wholesale electric rate and electric power transmission oversight and enforcement responsibilities in accordance with the Federal Power Act. Without this information, the

Commission would lack some of the data it needs to examine and approve or modify electric rates.

*Type of Respondent:* Public utilities, and non-public utilities with more than a *de minimis* market presence.

Estimate of Annual Burden<sup>5</sup>: The Commission estimates the annual public reporting burden for the information collection as:

FERC-920: Electric Quarterly Reports (EQR)				
	Annual Number		Average Burden	Total Annual Burden
Number of	of Responses per	Total Number of	Hrs. & Cost (\$) Per	Hours & Total Annual
Respondents	Respondent	Responses	Response	Cost (\$)
(1)	(2)	(1)*(2)=(3)	(4)	(3)*(4)=(5)
2,595	4	10,380	18.1 hrs.;	187,878 hrs.;
			\$1,448	\$15,030,240

Nathaniel J. Davis, Sr., Deputy Secretary.

<sup>&</sup>lt;sup>5</sup> "Burden" is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to Title 5 Code of Federal Regulations 1320.3.

The cost is based on FERC's 2019 average FTE (full-time equivalent) cost (wages plus benefits) of \$80.00/hour. The Commission staff believes the FERC FTE cost for wages plus benefits is representative of the corresponding cost for the industry respondents.
