

Amended Final Determination

Because there is now a final court decision, Commerce is amending its *Final Determination* with respect to the WW Group. Commerce finds that for the period July 1, 2015 through December 31, 2015, the following dumping margin exists:

Producer	Exporter	Weighted-average dumping margin (Percent)
WW Group	WW Group	67.66

Cash Deposit Requirements

Because the WW Group does not have a superseding cash deposit rate, *i.e.*, there have been no final results published in a subsequent administrative review for the WW Group. Commerce will issue revised cash deposit instructions to U.S. Customs and Border Protection. Effective December 20, 2019, the cash deposit rate applicable to entries of subject merchandise produced and exported by the WW Group is 67.66 percent.

Notification to Interested Parties

This notice is issued and published in accordance with sections 516A(e), 751(a)(1), and 777(i)(1) of the Act.

Dated: December 18, 2019.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

[FR Doc. 2019-27934 Filed 12-26-19; 8:45 am]

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****Submission for OMB Review; Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Reporting Requirements for Sea Otter Interactions with the Pacific Sardine Fishery; Coastal Pelagic Species (CPS) Fishery Management Plan (FMP).

OMB Control Number: 0648-0566

Form Number(s): None.

Type of Request: Regular submission (Extension of a currently approved collection).

Number of Respondents: 2
Average Hours per Response: 15 minutes.

Burden Hours: 1.

Needs and Uses: Example: On May 30, 2007, the National Marine Fisheries Service (NMFS) published a final rule (72 FR 29891) implementing a requirement under the CPS FMP to report any interactions that may occur between a CPS vessel and/or fishing gear and sea otters.

Specifically, these reporting requirements are:

1. If a southern sea otter is entangled in a net, regardless of whether the animal is injured or killed, such an occurrence must be reported within 24 hours to the Regional Administrator, NMFS West Coast Region.

2. While fishing for CPS, vessel operators must record all observations of otter interactions (defined as otters within encircled nets or coming into contact with nets or vessels, including but not limited to entanglement) with their purse seine net(s) or vessel(s). With the exception of an entanglement, which will be initially reported as described above, all other observations must be reported within 20 days to the Regional Administrator.

When contacting NMFS after an interaction, fishermen are required to provide information regarding the location, specifically latitude and longitude, of the interaction and a description of the interaction itself. Descriptive information of the interaction should include: Whether or not the otters were seen inside or outside the net; if inside the net, had the net been completely encircled; did contact occur with net or vessel; the number of otters present; duration of interaction; otter's behavior during interaction; and measures taken to avoid interaction.

Affected Public: Business or other for-profit.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

This information collection request may be viewed at *reginfo.gov*. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395-5806.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****Submission for OMB Review; Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Basic Requirements for Special Exception Permits and Authorizations to Take, Import, and Export Marine Mammals, Threatened and Endangered Species, and for Maintaining a Captive Marine Mammal Inventory Under the Marine Mammal Protection Act, the Fur Seal Act, and/or the Endangered Species Act.

OMB Control Number: 0648-0084.

Form Number(s): 89-880, 89-881, 89-882.

Type of Request: Regular (revision of a currently approved collection).

Number of Respondents: 963.

Average Hours per Response: The estimated average amount of time it takes to complete each information collection instrument is as follows. Scientific research permit applications, 50 hours; public display permit applications, 50 hours; photography permit applications, 10 hours; General Authorization Letters of Intent, 10 hours; major permit modification requests, 35 hours; minor permit modification requests, 3 hours; scientific research permit reports, 12 hours; scientific research parts only permit reports, 8 hours; General Authorization reports, 8 hours; public display permit reports, 2 hours; photography permit reports, 2 hours; public display inventory reporting, 2 hours; and general record keeping, 2 hours per each type.

Burden Hours: 6,771.

Needs and Uses: The Marine Mammal Protection Act (16 U.S.C. 1361 *et seq.*; MMPA), Fur Seal Act (16 U.S.C. 1151 *et seq.*; FSA), and Endangered Species Act (16 U.S.C. 1531 *et seq.*; ESA) prohibit certain activities affecting marine mammals and endangered and threatened species, with exceptions. Pursuant to Section 104 of the MMPA and Section 10(a)(1)(A) of the ESA, special exception permits may be obtained for scientific research and enhancing the survival or recovery of a species or stock of marine mammals or endangered or threatened species.

Section 104 of the MMPA also provides for Letters of Confirmation under a General Authorization for scientific research and permits for commercial and educational photography of marine mammals that involve only Level B harassment of marine mammals; permits for capture and/or import of marine mammals for public display; and inventory reporting pertaining to marine mammals in public display facilities.

The regulations pertaining to permits and associated reporting requirements under the MMPA and FSA are at 50 CFR part 216; the regulations for permit requirements under the ESA are at 50 CFR part 222. The required information in this collection is used to make the determinations required by the MMPA, FSA, ESA and their implementing regulations prior to issuing a permit; to establish appropriate permit conditions; to evaluate the impacts of the proposed activity on protected species; and, to ensure compliance with the Acts. The marine mammal inventory forms ensure compliance with MMPA reporting requirements and allow NMFS to maintain the National Inventory of Marine Mammals (NIMM), as required by the MMPA.

This information collection applies to certain protected species for which NMFS is responsible: Cetaceans (whales, dolphins and porpoises) and pinnipeds (seals and sea lions); and, for ESA scientific research and enhancement permits: Sawfish (largetooth and smalltooth), sea turtles (in water), sturgeon (Atlantic and shortnose), and certain foreign ESA-listed species. This information collection may be used for future ESA-listed species.

Affected Public: Individuals; Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government; Federal government.

Frequency: Permit applications, once every five or ten years; permit reports, annually or more frequently if incidents occur; amendments and modifications to permits, as frequently as requested by permit holders; public display inventory reporting, 15 days prior to transporting or transferring marine mammals and 30 days after the date of birth or death of a marine mammal.

Respondent's Obligation: \$986.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this

notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

[RTID 0648-XG573]

Endangered and Threatened Species; Recovery Plans

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of availability.

SUMMARY: NMFS announces the adoption of a Final Endangered Species Act (ESA) recovery plan for the threatened Puget Sound steelhead Distinct Population Segment (DPS) (herein referred to as steelhead). The Final Recovery Plan for this species (Final Recovery Plan) is now available.

ADDRESSES: Electronic copies of the Final Recovery Plan are available online at: <https://www.fisheries.noaa.gov/resource/document/esa-recovery-plan-puget-sound-steelhead-distinct-population-segment-oncorhynchus>

FOR FURTHER INFORMATION CONTACT:

David Price, (360) 753-9598, david.price@noaa.gov; or Elizabeth Babcock, (206) 526-4505, elizabeth.babcock@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

The Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 *et seq.*) requires that we develop and implement recovery plans for the conservation and survival of threatened and endangered species under our jurisdiction, unless it is determined that such plans would not result in the conservation of the species. The Puget Sound steelhead (*Oncorhynchus mykiss*) DPS was listed as a threatened species under the ESA in May 11, 2007 (72 FR 26722). We published a Notice of Availability of the Draft Recovery Plan in the **Federal Register** on December 13, 2018 (83 FR 64110) to obtain comments on the Draft Plan. The public comment period for this action was set to end on February 11, 2019; however, we extended the public comment period through March 28,

2019, to provide additional opportunity for public comment (84 FR 1707). We received extensive comments on the Draft Plan, summarized the comments and identified comments that prompted revisions for the Final Recovery Plan. We revised the Draft Plan based on comments received, and this final version now constitutes the Recovery Plan for the Puget Sound steelhead DPS.

The Final Plan

We are responsible for developing and implementing recovery plans for Pacific salmon and steelhead listed under the ESA. Section 4(f)(1) of the ESA requires that recovery plans include, to the extent practicable: (1) Objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the plan's goals; and (3) estimates of the time required and costs to achieve the recovery plan's goal. Our goal is to restore Puget Sound steelhead to the point where they are viable and no longer need the protections of the ESA. The ESA requires the development of recovery plans for each listed species unless such a plan would not promote its recovery.

We believe it is essential to have local support of recovery plans by those whose activities directly affect the listed species and whose continued commitment and leadership will be needed to implement the necessary recovery actions. We therefore support and participate in collaborative efforts to develop recovery plans that involve state, tribal, and federal entities, local communities, and other stakeholders. For this Final Recovery Plan for threatened Puget Sound steelhead, we worked collaboratively with local, state, tribal, and federal partners to produce a recovery plan that satisfies the ESA requirements. We have determined that this ESA recovery plan for Puget Sound steelhead meets the statutory requirements for a recovery plan and are adopting it as the Final Recovery Plan for this threatened species. This notice provides a notice of availability of the Plan.

The geographic area covered by the Final Recovery Plan is the Puget Sound basin, from the Elwha River (inclusive) eastward, including rivers in Hood Canal, South Sound, and North Sound, including steelhead from six artificial propagation programs: the Green River Natural Program; White River Winter Steelhead Supplementation Program; Hood Canal Steelhead Supplementation Off-station Projects in the Dewatto, Skokomish, and Duckabush Rivers; and
