(2) Cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply.)

(a) Whenever possible, cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.

(b) If a specific statute or EO does not exist, determine if an indirect statutory authority can be cited. An indirect authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

(c) DoD Components can use their general statutory grants of authority ("internal housekeeping") as the primary authority. The requirement, directive, or instruction implementing the statute within the DoD Component should be identified.

g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.

(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

The purpose of PAWS is to process Privacy Act (PA) requests and administrative appeals in accordance with the Privacy Act of 1974. Individuals submitting Privacy Act requests to the DoD CAF provide their Personally Identifiable Information (PII) in order for the DoD CAF Privacy Act Office to verify identity and retrieve responsive records from available systems of record. The requests generally contain a person's full name(s), social security number (SSN), Address(es), Phone Number (optional), E-mail Address (optional), Data and Place of Birth, and Attorney or representative name/contact information, and a brief description of requested records.

Other types of information the system contains include personal, medical, and financial information pertaining to the individual.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

Risks include, but are not limited to, identity theft, loss of employment, unwarranted public revelation of private data, targeting, etc.

To mitigate risk, access to records is role base and one must have user name/password to gain access. The only users authorized access to the system are DoD CAF Privacy Office staff and IT professionals. To prevent unwarranted disclosure of personal information, system users are provided initial and follow-up training to comply with established privacy and security policies and procedures. In addition, the building is protected by alarm systems, and armed guards, 24 x 7 access control measures. Hardcopy documents are maintained in a locked container when not in use.

The use of manual and automated redaction, along with security based attribute/special markings at the user and object level, safeguards PII data.
