Acting Director, Statistics of Income Division

Overview

The Fall 2019 edition of IRS Publication 6292, *Fiscal Year Return Projections for the United States*, provides U.S.-level projections of the number of tax returns expected to be filed in Fiscal Year (FY) 2019 through FY 2026 by: (1) major return categories; and (2) business operating divisions.

Statistics of Income (SOI) staff within the IRS Research, Applied Analytics, and Statistics (RAAS) organization prepare these projections semiannually to incorporate changes in filing patterns, economic and demographic trends, legislative requirements, and IRS administrative processes.

The Fall 2019 projections are based on information available as of early-August 2019, including enacted tax law changes and confirmed administrative plans. However, the projections do not incorporate pending legislative or administrative initiatives under consideration.

Data Sources and Projection Methodology

SOI staff used the reported actual number of returns filed in FY 2018 for each filing category to estimate the expected FY 2019 through FY 2026 return counts. The source data came from the IRS Master File, which reports the historical number of returns processed and recorded each year. In cases where master file return counts were not available, SOI staff relied on counts provided by program staff in the IRS operating divisions.

In general, the projections presented in this publication are computed for the calendar year of filing, and then converted to the corresponding fiscal year based on the historical quarterly filing experience. The projections are derived from various statistical models that capture and extrapolate historical filing trends by unique form types and filing mediums. Most models use time series extrapolation methods, such as trended exponential smoothing. However, some return types, particularly individual income tax filings, are based on regression models that use economic and demographic variables, such as total employment and gross domestic product, as key input factors. In these instances, forecasts of the economic and demographic data series used by the SOI staff as predictor variables were provided by IHS Global Inc. Additionally, where historical data were limited or nonexistent, such as for new e-file products, the filing pattern for a comparable return type was applied. Customers interested in obtaining more details about this publication's projection methodologies are welcome to contact us. (See "Principal Contacts" on page iii for subject areas and contact information.)

Summary of Significant Trends and Revisions

A summary of the major trends and other significant factors related to the return forecasts for this edition of Publication 6292 are noted below:

Trend in Grand Total Return Filings

As presented in Table 1, grand total return filings were 254.0 million in FY 2018, an increase of 2.5 percent over FY 2017. After FY 2018, grand total return filings are projected to grow at an average annual rate of 0.7 percent, reaching 269.4 million by FY 2026. The paper grand total return filings were 74.5 million in FY 2018, a decrease of 0.2 percent from the FY 2017 total. The electronic grand total return filings were 179.5 million in FY 2018, an increase of 3.7 percent over FY 2017. After FY 2018, electronic grand total return filings are projected to grow at an average annual rate of 2.4 percent.

Detail by Business Operating Division

Table 2 presents estimates of selected return filings by IRS “Business Operating Division” (BOD). The selected returns include total individual income tax returns, corporation income tax returns, partnership returns, employment returns, excise returns, and exempt organization returns. As applicable, these volumes are broken out by their operating division components: “Wage and Investment” (W&I), “Small Business/Self-Employed” (SB/SE), “Large Business and International” (LB&I), and “Tax Exempt/Government Entities” (TE/GE). Also included are the projected total filings of employee plan (EP) returns, including those processed by the Department of Labor, which comprise major return filings by taxpayers served by the TE/GE operating division.

Tax Cuts and Jobs Act

The Tax Cuts and Jobs Act (TCJA), enacted on December 22, 2017, changed the way tax is calculated for both individual and business tax return filers. Most of the changes affecting these filers became effective January 2018. While some changes sunset at the end of 2025, others are permanent. Highlights of the new tax law changes include revised business expense deductions, increased standard deduction, removed personal exemptions, changed tax rates and brackets, increased child tax credit, and limited or discontinued deductions.

Taxpayer First Act

The Taxpayer First Act (TFA), enacted on July 1, 2019, would make filing electronically a more widespread practice for business taxpayers. Two of the TFA provisions would directly affect the forecasts provided in this publication. First, the TFA lowers the thresholds needed for corporations and partnerships to file electronically starting in Calendar Year 2021. Second, the TFA makes electronic filing mandatory for exempt organizations (Form 990 series) and political organizations (Form 8872) starting in Tax Year 2021, with a temporary waiver for small business filers. Both provisions would increase the number of electronic filings for the various forms and would either decrease, or eliminate all together, the amount of paper filings.

Accuracy of Prior Projections

To measure the quality of our products and services, this section, along with Table 3, provides a brief analysis of the accuracy of prior projections. Using 4 years of actual data, from 2015 through 2018, Table 3 presents the accuracy of our national-level projections by major return categories. This analysis covers only the major return categories projected on a calendar-year basis and serves as a general measure for approximating the overall reliability of our U.S.-level return projections.

The table presents two measures of projection accuracy: (1) the mean absolute percent error (MAPE); and (2) the number of overprojections. The MAPE is computed as the average percentage projection error for the 4-year period, regardless of whether the projections were over or under the actual filings in each of the 4 projection cycles. In addition, the number of overprojections can show whether projections are consistently over- or underprojected. A value of “2” indicates balanced forecasts over the four cycles.

The table groups these two measures by time horizon. The time horizon is determined based on the year a forecast was made and the year projected. For example, a forecast for 2017 made in 2014 would be part of the “3-years-ahead” time horizon.

Table 1. Fiscal Year Projections of the Number of Returns To Be Filed with IRS, 2019–2026

* Forms 1040, 1040-A, and 1040-EZ for Fiscal Year 2018; beginning in January 2019, a new, streamlined Form 1040 replaced Forms 1040, 1040-A, and 1040-EZ.

** Form 990-N must be filed electronically. There is no paper form.

*** Form 990-T must be filed by paper. However, this will change starting with Tax Year 2021 when the form must be filed electronically (see Taxpayer First Act of 2019).

**** Form 8871 must be filed electronically. There is no paper form.

NOTES: Table does not contain non-master file counts. Each of the forms listed under "Type of Return" is defined in the "Table Notes" of Publication 6292.

Detail may not add to subtotal/total due to rounding.

MAPE		0.30%	1.70%	1.60%	6.96%	9.51%
Number of Overprojections		2	2	1	0	0

*Some actuals shown in this table may differ from official counts reported elsewhere because they exclude certain return series only recently projected and whose accuracy cannot yet be evaluated.

NOTE: See the "Accuracy of Prior Projections" section of this publication for an explanation of the two measures of projection accuracy.

SOURCE: Internal Revenue Service, Statistics of Income Division, Fall 2019 Publication 6292.

Table Notes

- Detail may not add to total due to rounding.
- Projected return counts are rounded to the nearest hundred; therefore, counts of 49 or fewer are rounded to 0. However, some forms may report zero filings because they are associated with only selected areas, or because their filing options were recently established or eliminated.
- Actual and projected return counts for the major categories are based on IRS Master File processing, as recorded in the electronic versions of the *Report of Returns Posted to the IRS Master Files*.

Table 1:

- “Grand Total” is the sum of “Total Primary Returns” and “Supplemental Documents.” The “Total Primary Returns” category is the sum of all forms shown in the table, excluding “Supplemental Documents.”
- “Individual Income Tax, Total” is the sum of paper and electronic Forms 1040, 1040-A, 1040-EZ, 1040-NR, 1040-NR-EZ, 1040-PR, 1040-SS, and 1040-C. Beginning with Filing Year 2019, Forms 1040, 1040-A, and 1040-EZ were replaced with a new, streamlined Form 1040.
- “Individual Estimated Tax, Form 1040-ES” includes both paper and electronic Form 1040-ES. Various return categories, such as Form 1040-ES and other business and individual returns, include line items to account for alternative tax-filing methods. The “paper-only” components can be derived by subtracting the electronic counts from their respective return totals.
- “Fiduciary, Form 1041, Total” includes both paper and electronic Form 1041.
- “Fiduciary Estimated Tax, Form 1041-ES” is the *Estimated Income Tax for Estates and Trusts*.
- “Partnership, Forms 1065/1065-B, Total” includes both paper and electronic Forms 1065 and 1065-B.
- “Corporation Income Tax, Total” includes Forms 1120 (paper and electronic), 1120-C, 1120-F (paper and electronic), 1120-H, 1120-FSC, 1120-L, 1120-ND, 1120-PC, 1120-REIT, 1120-RIC, 1120-SF, and 1120-S (paper and electronic). Form 1120-POL volumes are reported separately under the forms for “Political Organizations.” Form 1120-IC-DISC is not included in these corporation projections.
- “Form 2553” is the *Election by a Small Business Corporation* (to file Form 1120-S).
- “Form 1066” is the *U.S. Real Estate Mortgage Investment Conduit (REMIC) Income Tax Return*.
- “Estate” includes Forms 706, 706-NA, 706-GS(D), and 706-GS(T).
- “Gift, Form 709” is the *United States Gift (and Generation-Skipping Transfer) Tax Return*.
- “Employment Tax, Total” includes paper and electronic Forms 940, 940-EZ, 940-PR, 941, 941-PR, 941-SS, 943, 943-PR, 943-SS, 944, 945, and CT-1. CT-2 is excluded since the return counts were only available on the non-master file.

- “Form 1042” is the *Annual Withholding Tax Return for U.S. Source Income of Foreign Persons*. This form is assigned to the International area. It is sometimes considered an employment tax return but is listed separately here.
- “Exempt Organizations, Total” includes Forms 990 (paper and electronic), 990-EZ (paper and electronic), 990-N (only available electronically), 990-PF (paper and electronic), 990-T, 4720, and 5227. Beginning in Tax Year 2021, the Form 990 series must be filed electronically. Temporary waivers will be available for small business filers.
- “Form 1041-A” is the *U.S. Information Return, Trust Accumulation of Charitable Amounts*.
- “Government Entities/Bonds” includes Forms 8038, 8038-CP, 8038-G, 8038-GC, 8038-T, 8038-TC, and 8328.
- “Political Organizations, Total” includes Forms 1120-POL (paper and electronic), 8871 (only available electronically), and 8872 (paper and electronic). Beginning in Tax Year 2021, Form 8872 must be filed electronically. Temporary waivers will be available for small business filers.
- “Excise, Total” includes Forms 11-C, 720 (paper and electronic) 730, 2290 (paper and electronic), and 8849 (paper and electronic).
- “Form 5330” is the *Return of Excise Taxes Related to Employee Benefit Plans*.
- “Form 5500-EZ” is the *Annual Return for One-Participant (Owners and Their Spouses) Retirement Plan*.
- “Form 8752” is the *Required Payment or Refund Under Section 7519*.
- “Supplemental Documents” consists mainly of applications for extensions of time to file and amended tax returns, which include Forms 1040-X, 4868 (both paper and electronic), 1120-X, 5558, 7004 (both paper and electronic), and 8868 (both paper and electronic).

Table 2:

- Individual filers classified as “Small Business/Self-Employed” reflect those taxpayers filing a Form 1040 return with a Schedule C, Schedule F, Schedule E, and/or Form 2106 attached, or with mailing addresses or forms considered “International.” All other individual filers are classified as “Wage and Investment.”
- In general, corporation filers (Form 1120 series returns including Form 1120-S) and partnership filers are classified as “Large Business and International” if their reported total assets are \$10 million or more. Corporation and partnership returns with assets below \$10 million are generally classified as “Small Business/Self-Employed.” However, there are also some partnership and corporation returns classified as part of the “Tax Exempt/Government Entities” operating division.
- Nonprofit organizations, pension plan filers, tribal authorities, and governmental units comprise the “Tax Exempt/Government Entities” classification.
- “Employee Plans” returns include paper and electronic Forms 5500, 5500-EZ, and 5500-SF. Counts by operating division in this table are based primarily upon the IRS Master File “BOD indicator.” This indicator is a single, point-in-time, taxpayer-level identifier (in contrast to a return-by-return identifier).

Other Projection Publications
