The DOE Zero Energy Ready Home offers leading builders a timely solution for differentiating their product from existing homes as well as minimum code new homes. The DOE Zero Energy Ready Home label – the symbol of excellence in home building - makes it easy for consumers to identify zero energy ready homes that are so efficient a small renewable energy system can offset most or all annual energy consumption.

This generally corresponds to a Home Energy Rating System (HERS) Index Score in the low to mid-50s, depending on the size of the home and region in which it is built.
 - b. **Zero energy ready homes** are so efficient a small renewable energy system can offset most or all annual energy consumption.
 - c. **DOE Zero Energy Ready Home logo** distinguishes certified homes as being among the top performing homes in the nation.
 - d. **DOE Zero Energy Ready Home certificate** is automatically generated from compliance software. It includes energy savings information as well as a HERS Index Score.
 - e. **DOE Zero Energy Ready Home verification form** provides information needed to calculate program savings. It can be generated from compliance software.
