ENUMERATOR QUALITY CHECK

All states making field weighings

Weights

If there is a 5 percent or more difference in total unit weight between the Enumerator's and Supervisor's weight, the Supervisor should weigh the unit up to 3 times (2 reweighs) to determine the correct weight for the unit.

UNIT 1

| | Weight | Percent |
|---|--------|---------|
| 1. Enumerator's weight of hills 8, 9, and 10 (Copied from weight tab sheet). | 939 | |
| Supervisor's weight and percent of enumerator's weight (1 st time). | 940 | % |
| Supervisor's weight and percent of enumerator's weight (2 nd time). | 941 | % |
| Supervisor's weight and percent of enumerator's weight (3 rd time). | 942 | % |

UNIT 2

| | Weight | Percent |
|---|--------|---------|
| 2. Enumerator's weight of hills 8, 9, and 10 (Copied from weight tab sheet). | 958 | |
| Supervisor's weight and percent of enumerator's weight (1 st time). | 959 | % |
| Supervisor's weight and percent of enumerator's weight (2 nd time). | 960 | % |
| Supervisor's weight and percent of enumerator's weight (3 rd time). | 961 | % |

Over, Please

Form Q-1W: Potatoes (continued)

3. Were weighings within ± 5 percent?

Yes [Go to item 4.] **No** – [Continue]

a. How much difference? Grams 965
