Select Agent Confirmation

Is this a Select Agent Application?

The Agricultural Bioterrorism Protection Act of 2002, as part of the Public Health Security and Bioterrorism Preparedness Response Act of 2002, requires entities that possess, use, or transfer agents or toxins deemed a severe threat to animal or plant health or products must notify and register with APHIS. This law is designed to improve the ability of the United States to prevent, prepare for, and respond to bioterrorism and other public health emergencies that could threaten public health and safety or American agriculture.

A list of select agents and toxins which the Department of Health and Human Services (HHS) and USDA consider select agents can be viewed at:

<http://www.cdc.gov/od/sap/docs/salist.pdf>

A list of select agents and toxins which the USDA has considered select agents can be viewed at:

http://www.aphis.usda.gov/programs/ag_selectagent/ag_bioterr_toxinlist.shtml

Additional information regarding the USDA Select Agent Program can be found at:

http://www.aphis.usda.gov/programs/ag_selectagent/

- No.** This is NOT an application to move or import select agents, the genes expressing select agents, or the toxins made by the select agents.
- Yes.** This is an application to move or import select agents, the genes expressing select agents, or the toxins made by the select agents.

CREAPP-0038

[Home](#)**Create/Renew/Amend Application - Choose Application Type for BRS**

You have selected **Biotechnology Regulatory Services (BRS)** as the program office. If this is correct, please select the correct application type for the permit you are applying for, then select **Continue**. If you have selected an incorrect program office you may go back by using the browser "Back" button.

 BRS Notification of Introduction of Genetically Engineered Plants

A Notification is an alternative streamlined procedure to permitting for the introduction (interstate movement, importation, environmental release) of certain genetically engineered plants that are regulated articles. To make use of the notification alternative, you must introduce a plant species that meets all of the six eligibility criteria, and you must introduce it in accordance with specified performance standards. In addition to the comments below, please refer to the regulations published on March 31, 1993 (see Section VI) and/or contact the Permit Staff, Biotechnology Regulatory Services to determine whether a regulated article is eligible for notification.

 BRS Permit for the Introduction of Genetically Engineered Organisms

Any company, institution, or public sector scientist that wants to import, move or release a genetically modified organisms expressing a plant pest structural sequence, or whose host is a plant pest, or which does not qualify for a Notification process, such as microorganisms and Plant-made Pharmaceutical and Industrial Products require a full APHIS permit. More detailed information about these movements and release are required during the application process, and APHIS evaluations are lengthier than those required under Notifications.

If you are uncertain as to whether the organism qualifies for a Notification or Permit see the links below:

For general information regarding Notifications:

<http://www.aphis.usda.gov/biotechnology/notifications.shtml>

For general information regarding Permits:

<http://www.aphis.usda.gov/biotechnology/permits.shtml>

If you are uncertain as to whether the organism is a plant pest or a regulated article, please contact:

biotechquery@aphis.usda.gov

or call: 301-851-3935.

BRSPMT-012-103

has occurred. If you are changing the type of land use by establishing this release, please explain the nature of the change. Also describe the areas surrounding the release site.

Release Site History: *

(Max. 1000 characters)

Is the proposed release site and/or the area requiring monitoring (or the area within the boundaries of the possible release/monitoring area for sites where the release has yet to be determined) within designated critical habitat for a listed threatened or endangered species or within habitat proposed for designation under the Endangered Species Act (16 U.S.C., Section 1531, Endangered Species Act (ESA) of 1973, as amended)? (For information see: http://www.aphis.usda.gov/brs/pdf/BRS_critical_hab_guide_permit.pdf)

Please answer accordingly: * Yes No

If "Yes" to above question, provide the genus/species name and common name for all species that have designated critical habitat or habitat proposed for designation within the release site and monitoring area.

If "Yes" to above question, provide an analysis of the effects of the proposed release on designated critical habitat and habitat proposed for designation. Indicate if the proposed release will have "no effect on" or "may affect" the designated critical habitat and/or habitat proposed for designation. (See guidance at: http://www.aphis.usda.gov/brs/pdf/BRS_critical_hab_guide_permit.pdf)
