

(Magnuson-Stevens Act) authorizes the Gulf of Mexico Fishery Management Council (Council) to prepare and amend fishery management plans (FMPs) for any fishery in Federal waters under its jurisdiction. NMFS and the Council manage the commercial shrimp fishery in Federal waters of the Gulf of Mexico (Gulf) under the FMP for the Shrimp Fishery of the Gulf.

Owners or operators of vessels applying for or renewing a commercial vessel permit for the Gulf shrimp fishery must complete an annual Gulf Shrimp Vessel and Gear Characterization Form. NMFS provides the form to each permit holder in January each year, and the form is due to NMFS prior to the submission of a permit application for renewal or transfer. Compliance with this reporting requirement is required for permit issuance and renewal. The regulations for the Gulf Shrimp Vessel and Gear Characterization Form may be found at 50 CFR 622.51(a)(3).

Through this form, NMFS collects census-level information on fishing vessel and gear characteristics in the Gulf shrimp fishery to conduct analyses that will improve management decision-making in this fishery. In addition, these analyses ensure that national goals, objectives, and requirements of the Magnuson-Stevens Act, National Environmental Policy Act, Regulatory Flexibility Act, Endangered Species Act, and Executive Order 12866 are met; and quantify achievement of the performance measures in the NMFS' Operating Plans. This information is vital in assessing the economic, social, and environmental effects of fishery management decisions and regulations on individual shrimp fishing enterprises, fishing communities, and the nation as a whole.

There have been minor adjustments to responses and burden. As of August 29, 2019, there are approximately 1,410 vessels with valid or renewable permits in the Gulf shrimp fishery. The slightly fewer number of vessels has resulted in adjusted estimates of total burden hours and costs as noted below in Section III.

II. Method of Collection

NMFS mails a paper copy of the form to respondents and also provides a pre-paid business reply envelope for permit applicants to submit the form. Permit applicants must complete and mail the form back to NMFS before a permit expires and before NMFS will issue or transfer a permit.

III. Data

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Oceanic and Atmospheric Administration (NOAA) collects vessel license, vessel registration, catch, and unloading information from operators of U.S. purse seine vessels fishing under the provisions of the Treaty on Fisheries between the Governments of Certain Pacific Island States and the Government of the United States of America (Treaty). The Treaty provides access for U.S. purse seine vessels to fish in the exclusive economic zones (EEZs) of Pacific Island Parties to the Treaty (PIPs). The PIPs include Australia, Cook Islands, Federated States of Micronesia, Fiji, Kiribati, Marshall Islands, Nauru, New Zealand, Niue, Palau, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu, and Vanuatu. This collection of information is required to meet U.S. obligations under the Treaty.

The South Pacific Tuna Act of 1988 (16 U.S.C. 973-973r) and U.S. implementing regulations (50 CFR part 300, subpart D) authorize the collection of information from U.S. purse seine vessels fishing in the EEZs of PIPs under the Treaty. Vessel operators must submit annual vessel license and registration (including registration of vessel monitoring system (VMS) units) applications and periodic written reports of catch and unloading of fish from licensed vessels. They are also required to ensure the continued operation of VMS units on board licensed vessels, which is expected to require periodic maintenance of the units. The information collected is submitted to the Pacific Islands Forum Fisheries Agency (FFA) through the U.S.

government, NOAA's National Marine Fisheries Service (NMFS). The license and registration application information is used by the FFA to determine the operational capability and financial responsibility of a vessel operator interested in fishing under the Treaty. Information obtained from vessel catch and unloading reports is used by the FFA to assess fishing effort and fishery resources in the region and to track the amount of fish caught within each PIP's EEZ. Maintenance of VMS units is needed to ensure the continuous operation of the VMS units, which, as part of the VMS administered by the FFA, are used as an enforcement tool. If the information is not collected, the U.S. government will not meet its obligations under the Treaty, and the lack of fishing information will result in poor management of the fishery resources.

II. Method of Collection

All information are to be submitted in hard copy via mail or through electronic reporting.
