Providing {your/SP's} social security number will help researchers match NHANES data with other health-related records like Medicare and Medicaid. By combining these data, researchers can study health conditions like heart attacks and diabetes in depth. They can also better understand health care use and health care costs for all Americans. These findings will help doctors assist patients in making smart choices. Here are other examples (HAND CARD DMQ8) of things we have learned when we matched records from different sources.

- g. Amount of food eaten - The amount of food consumed by the respondent.
- h. Food source - The place where the food was obtained is selected from a list of options

24-Hour Dietary Recall Interview Scripts - In-Person Interview:

A. Introduction script

First, we'll make a list of the foods you/SP ate and drank yesterday, *Monday*. It may help you remember what you/SP ate by thinking about where you/he/she were, who you/he/she were with, or what you were/he was/she was doing, like working, eating out, or watching television.

Please tell me everything you/SP had to eat and drink all day yesterday, Monday, from midnight to midnight. Include everything you/he/she had at home and away, even snacks, water, soft drinks, and alcoholic beverages. I'll ask you for specific details and amounts of the foods in a few minutes. At this time, just tell me what you/SP had.

B. Forgotten food probes script

Your answers are important, so we'd like this list to be as complete as possible. In addition to the foods you have/SP has already told me about, did you have any coffee, tea, soft drinks, milk or juice?

- Beer, wine, cocktails or other drinks?
- Cookies, candy, ice cream or other sweets?
- Chips, crackers, popcorn, pretzels, nuts, or other snack foods?
- Fruits, vegetables, or cheese?
- Bread, rolls or tortillas?
- Anything else?

C. Food detail probes script

Now we're going to fill in your list with more detail. When I ask how much *{you/SP}* ate, you can estimate the amount by using the models on the table and in the racks.

You may use the grid or ruler for rectangular or square shapes and the circles for circular or round shapes. Use the wedge for wedge shaped foods.

You can use the thickness bars to show me the thickness of a food and the bean bags and mounds to describe the amounts of solid foods.

When you use the cups, bowls, and glasses, please show me which line best describes the portion *{you/SP/he/she}* ate or drank. When you use any of the spoons, please tell me the quantity in LEVEL spoonfuls.

STANDING BALANCE (AGES 40+)

Exclusion Criteria

Participants will be excluded from the Modified Romberg Balance Test (MRT) if:

- 1) pregnant (either by self-report or ERB-approved lab test in the MEC (Safety exclusion)
- 2) weigh more than 315 pounds, since the foam used to stand on during the test may become too compressed to provide a suitable surface (Test protocol exclusion);
- 3) unable to stand on their own (Safety exclusion);
- 4) has an amputation of the leg or feet (other than toes) (Test protocol exclusion);
- 5) has a prosthetic device below the waist (Test protocol exclusion);
- 6) wearing shoes with heels 3 inches or more (Test protocol exclusion)
- 7) has a body size either too small or too large to accommodate proper fitting of the safety harness (Safety exclusion);
- 8) has experiencing **BOTH** current symptoms of dizziness, lightheadedness or presyncope **AND** has fallen in the past 12 months because of problems with dizziness or balance (Safety exclusion);
- 9) recovering from a recent injury to their legs (Safety exclusion);
- 10) has vision so poor they need assistance to find their way to the test room (Test protocol exclusion).

Participants will be excluded only from Condition 5 of the MRT if the participant:

- 1) currently has neck pain, has ever had neck surgery, or has ever had a neck problem that lasted more than six weeks (Safety exclusion);
- 2) cannot move their head and neck comfortably in the range of motion required for this condition (Safety exclusion);
- 3) has a cochlear implant. (Test protocol exclusion)

Participants will be excluded from the second part of the DVA test (i.e. involving head rotation) if the participant:

- 1) is pregnant (either by self-report or lab testing in the MEC (Safety exclusion);
- 2) reports that they currently have neck pain, have ever had neck surgery, or have ever had a neck problem that lasted more than six weeks? (Safety exclusion);
- 3) cannot move their head and neck comfortably in the range of motion required for this condition (Safety exclusion);
- 4) has contrast sensitivity less than 30% (Test protocol exclusion);
- 5) has measured binocular static visual acuity (with corrected lenses as needed) worse than 20/125. This situation causes ceiling effect for the exam findings when measuring the difference between static and dynamic visual acuity. (Test protocol exclusion)

Exclusions from one test in the balance component will not automatically affect participation in the other tests, unless it is a mutual exclusion, such as neck problems. If any participant, provides an unsolicited comment, prior to this exam, that s/he is currently dizzy or lightheaded then that person is immediately referred to the MEC physician for evaluation. If a person becomes dizzy during one of the balance exam components, that exam will be halted; it will be noted in the record; and the person will be instructed to sit on a chair (without wheels) until s/he

is now longer dizzy or lightheaded. If the person feels s/he needs to be seen by the MEC physician, the health tech will immediately refer the participant to the MEC physician; otherwise the person can proceed with their remaining MEC components.

Participants will stand with their feet together and their arms crossed at their waist, holding their elbows (see Figure 1). Participants will hold that stance for as long as they can under five separate conditions to a maximum of 15 seconds for condition 1 - 2 and 30 seconds for conditions 3 - 5):

- Condition 1: Firm surface (no pad), eyes open
- Condition 2: Firm surface (no pad), eyes closed
- Condition 3: Compliant surface (foam pad), eyes open
- Condition 4: Compliant surface (foam pad), eyes closed
- Condition 5: Compliant surface (foam pad), eyes closed,
head moving side to side at 3 Hz

Findings will be considered

Normal if

- 40-60 years old and score is: (1.72 or higher)
- >60 years old and score is: (1.52 or higher)

Below normal if

- 40 - 60 years old and score is: < 1.72
- >60 years old and score is: < 1.52

Dynamic Visual Acuity (DVA) Test

Protocol

Participants will sit at a set distance of 6 feet away from a computer monitor. Participants will wear a head-mounted device (similar to that shown in Figure 1) which will monitor speed of head movement during the dynamic portion of the test.

We plan to ask participants to identify optotypes (i.e., tumbling Cs) displayed in the center of a computer screen. The participant will be given two practice trials, with the C's displayed at a size equivalent to 20/400 vision (1.00 logMAR), to ensure that s/he understands the test instructions. If the participant does not perform the task correctly, the health technician will provide the instructions again, and the participant will repeat a practice trial with two tumbling C's. If the participants still cannot perform the task, s/he will be excluded from DVA testing.

COGNITIVE FUNCTIONING (MOCA-SA)

Target Group: SPs 60+

The next questions are about problem solving and memory. The questions may seem unusual, but they are routine questions we ask everyone. Some of the questions are very easy and some are difficult, so don't be surprised if you have trouble with some of them. Try your best to answer all of the questions without using clues from around the room. If you wear glasses for reading, please use them.

IF THE SP USUALLY WEARS READING GLASSES, ASK HIM/HER TO USE THEM FOR THE TEST.

IF THE SP DOES NOT HAVE HIS/HER GLASSES AVAILABLE, GIVE THE SP A PAIR OF OUR SAMPLE GLASSES.

READ SENTENCE: The cat always hid under the couch when dogs were in the room.

(PROMPT: Repeat the sentence.)

CFQ.NEW12 Tell me as many words as you can think of that begin with a certain letter of the alphabet that I will tell you in a moment. You can say any kind of word you want, except for proper nouns and names like Bob or Boston, and numbers or words that begin with the same sound, but have a different ending, for example, love, lover, loving. I will tell you to stop after 1 minute. I will record your answers in this booklet. Are you ready?

WHEN R IS READY: Now, tell me as many words as you can think of that begin with the letter F.

ISIS INSTRUCTION: ONE MINUTE TIMER ON SCREEN SHOULD COUNT DOWN.

CFQ.NEW13 For this exercise, tell me how an orange and a banana are alike.

IF THE SUBJECT ANSWERS IN A CONCRETE MANNER, THEN SAY ONLY ONE ADDITIONAL TIME: "Tell me another way in which those items are alike."

IF THE SUBJECT **DOES NOT** GIVE THE APPROPRIATE RESPONSE (FRUIT), SAY: "Yes, and they are also both fruit." DO NOT GIVE ANY ADDITIONAL INSTRUCTIONS OR CLARIFICATION.

Now, tell me how a ruler and a watch are alike?

DO NOT GIVE ANY ADDITIONAL INSTRUCTIONS OR PROMPTS.
