

**Change Request for OMB # 0923-0059: Per- or Polyfluoroalkyl Substances Exposure Assessments (PFAS EAs)**

Justification for the Change Request

This is a non-material/non-substantive change request for OMB protocol #0923-0059 (expiration date: June 30, 2022). OMB approval was granted for data collection for “Pre-and Polyfluoroalkyl Substances Exposure Assessments (PFAS EAs).”

We are requesting to make a non-substantive change to the Assent Form (12 to 17 years) for the EAs (Appendix B4 of the PFAS EA protocol). A section of the form is being deleted because the information provided in the section (contact information) is already available on the form and does not need to be repeated. In addition, the section is not present in the Adult Consent form (Appendix B2) or the Parental Permission form (Appendix B3). Removal of the section will make all the consent forms consistent.

Below is the change request cross-walk table. Attached please find the revised document with both a clean version and track-change version. The overall number of respondents and requested burden hours remain the same.

As such, we would appreciate your expedited consideration of this request.
