#### Additional explanation:

The PBP software update includes new screens to offer reduced cost through debit card and other sources in the new Part C Rewards and Incentives screen.

The reason for the Low Impact burden estimate is that there are minimal number of plans that may be affected by the options included with this change and they would have minimal data inputs. The change should not increase the overall burden for the entire industry much if any at all, as it is only a small group that may be using the option included with this change.

10. The PBP software will be updated to a) separate chronic condition(s) from socioeconomic status on an updated Reduced Cost Sharing Target Population screen b) request information about whether the enrollee needs to have all or combination of disease states to qualify and c) capture estimated

enrollees to be targeted and engaged to receive model benefits. SOURCE: CMS Policy PBP SCREEN/CATEGORY: #19a Reduced Cost Sharing for VBID/UF/SSBCI – Target Population: VBID DOCUMENT: Appendix\_C\_PBP2021\_Screenshots-SectionB-VBID-UF-SSBCI-2019-12-09.pdf PAGE(S): Page 8 CITATION: 42 CFR 422.256

REASON WHY CHANGE IS NEEDED: Separate chronic condition(s) from socioeconomic status in specifying targeting methodology and gather additional information on disease state requirements as well as estimated enrollees to be targeted and engaged to receive model benefits. IMPACT ON BURDEN: Low Impact

Additional explanation:

The PBP Software update includes new screens to offer reduced cost through debit cards in the new Part D reductions in cost sharing screen.

The reason for the Low Impact burden estimate is that there are minimal number of plans that may be affected by the options included with this change and they would have minimal data inputs. The change should not increase the overall burden for the entire industry much, as it is only a small group that may be using the option included with this change.

13. The PBP software will be updated to include new screens for combined mandatory supplemental benefits being offered together. These screens will allow the plan to offer groups of mandatory supplemental benefits together with overlapping cost sharing.

Additional Explanation: The PBP Software includes new screens to allow plans to combine supplemental mandatory benefits for Part D.

The reason for the Low Impact burden estimate is that there are minimal number of plans that may be affected by the options included with this change and they would have minimal data inputs. The change should not increase the overall burden for the entire industry much, as it is only a small group that may be using the option included with this change.

### CY 2021 Formulary Changes

1. CMS will be removing the request to upload responses for what comprehensive strategies an organization is using to combat the opioid crisis. This upload was begun for the 2019 submissions.

SOURCE: Internal DOCUMENT: N/A PAGE(S): N/A

CITATION: 42 CFR 423.120

REASON WHY CHANGE IS NEEDED: CMS collected Opioid Strategy documents from Part D sponsors for CY 2019 and 2020. CMS continues to analyze these submissions to identify best practices and potential areas that could be adopted by CMS in its effort to reduce opioid overutilization. We appreciate Part D sponsors' submissions to date and we will not collect additional documentation at this time. IMPACT ON BURDEN: Reduces impact

2. CMS will be updated the layout for the PA/ST Criteria Change Request file. Some fields were removed to streamline the submission process.
