

**Justification for Non-Substantive Changes for mySNO  
Request for Accommodation in Communication Method  
45 CFR 85.51  
OMB No. 0960-0777**

**Justification for Non-Substantive Changes to the Collection or Resubmission of the Collection within One Year of OMB Approval**

We currently offer the iAccomodate Internet screens through our website; however, we do not have direct access to it from the *my Social Security* portal. The mySNO application provides users the ability to select their Special Notice Option preference from within their authenticated account through the *my Social Security* portal. The preference selections offered throughout the new mySNO application are the same options currently available through iSNO and other modalities for this collection.

**Revisions to the Collection Instrument:**

- **Change #1:** Allow blind or visually impaired users the ability to select their preference for Special Notice Options from the *my Social Security* portal.

**Justification #1:** This change complies with authentication requirements according to Federal guidelines.

- **Change #2:** Allow blind or visually impaired users the ability to change their preference for Special Notice Options through the *my Social Security* portal.

**Justification #2:** This change complies with authentication requirements according to Federal guidelines.

- **Change #3:** Display selected Special Notice Option to blind or visually impaired users for immediate confirmation of selection through the *my Social Security* portal.

**Justification #3:** This will result in a decrease in the number of beneficiaries coming to field offices or calling the National 800 Number.

SSA will implement these changes upon OMB approval. This action does not affect the public reporting burden.
