NOTE that the emergency messages associated with the 'activeFlagx' variables are NOT mutually exclusive. Any or all of the messages might be played, in any combination, based on the values of the variables. That said, care should be taken to use these messages judiciously in order to avoid front-loading the call with off-topic messaging, and to use these emergency messages only for legitimate emergencies (as opposed to less critical informational messaging).			
All callers will hear the SSA.gov website info (mm0160), regardless of whether any broadcast/emergency messages are played to the caller.

10/10/14 - Both is being added as an option. The 'both' path will currently transfer to an agent. Once the Change of Address (COA) module is enabled, "both" would require an update to include prompting (First, let's change your address") followed by Change of Address, followed by name collection or transfer to agent for name collection.

Changes in the law will make it easier for some people to qualify for extra help. Social Security won't count the help you receive with your household expenses as income, or any life insurance policies, as a resource when determining your eligibility. You may also be able to get help with Medicare costs from your state under a Medicare Savings Program. Applications for extra help can initiate the application process for the Medicare Savings Programs in your state. initial	Always		mm2110_ini_01	When a beneficiary needs help managing their Social Security or SSI benefits, we appoint a Representative Payee for them. The payee can be a relative or friend, or a nursing home or hospital. The payee receives the monthly benefits and uses them to pay for the beneficiary's needs. The payee must keep accurate records of how the money is spent, and report this to Social Security using the Representative Payee Report form. The payee must also report any changes to a beneficiary's situation (like a change of address, medical condition, or income). initial	Always		mm2200_ini_01	There are three ways someone can become a representative payee: a payee may be appointed by the Social Security Administration; a payee may be requested by a beneficiary - whether they currently have one or not - or someone who already has a payee may become their own payee. When we find that a beneficiary needs help managing their Social Security or SSI benefits, we appoint a Representative Payee for them. Appointed payees must be interviewed in person, and complete a form at a Social Security office. There, the appointed payee will need their social security number, proof of identification (like a driver's license), as well as the name and contact information of the beneficiary's doctor. If, on the other hand, a beneficiary wants to obtain a payee, or wants to change their current payee, the potential payee must be interviewed in person, and complete a form at a Social Security office. Again, the potential payee will need their social security number, proof of identification, as well as the name and contact information of the beneficiary's doctor. In addition, although a potential payee may have 'power of attorney,' Social Security does not recognize 'power of attorney' for purposes of managing benefit payments. Finally, if you want to become your OWN payee, you need to show evidence (a doctor's statement, for example) that you're now able to handle your money yourself. --

2.2 AddressOSDM Dialog

This module collects an address from a caller. This module is likely to be incorporated into a larger application. NOTE TO CUSTOMER: This is a packaged application, and both the flow and code can not be altered as it is sold and delivered as a packaged piece of code. We will have some flexibility in terms of prompt wording (within boundaries, as we don't want to change grammars) and there are some configurable parameters that we can change from their defaults. Please keep this in mind as you review the document.

Developer Notes

This DM needs to confirm pretty much all the time. In this case use default confirmation prompts. Set confidencelevel to .8 or higher. Alternatively, we might specify a parameter that controls confirmation for this DM alone. Suppress successprompts and failureprompt. Please note that as with the behavior of all the other OSDMs the sequence of Retry prompts is as follows: If caller's utterance is low confidence, play noanswerapologies followed by reprompts. If caller said "no" after confirmation, play wronganswerapologies followed by reprompts.

NOTE: this state recognized only VALID zipcodes (i.e. not any numerical string)

initial	Always	ca0240_ini_01	Sure, here's some more information. You can only change your address if you're currently receiving Social Security retirement, disability, or survivor benefit payments. If you're NOT receiving benefits, the Social Security Administration doesn't keep your address on file (so even an agent can't do it). In this case, to change the address where we send your Social Security statements, you'll need to contact the Internal Revenue Service. The easiest way to do that is just enter your new address on your tax return, but if you need to do it sooner, you can use IRS form 8-8-2-2, which you can get by calling 1-800-829-3676. --

Developer Notes

Code must calculate the three specific months based on current date and SSA business practices. The prompt MonthChoices is then the concatenation of the first and second month in medial inflection, and the third month in final inflection. "One Step Correction" strategy should be available to the Caller (e.g., "No, February") -- This means both the collection grammar and the confirmation grammar are active during the confirmation phase. (This can be done as a parallel grammar.) The grammar that should be accepted includes "as soon as possible" (ASAP) and its synonyms, the three specific months calculated above, and any additional months between the current month and the first of the calculated months. For example, if a call is received toward the end of September, the valid months are October, November and December, but the grammar should include September, October, November, December, and the ASAP synonyms, and September and October should be mapped the same as ASAP. The current month is not prompted, but it should be recognized and handled the same as ASAP.
