10) Total			

- 1-6) The categories above (Equities, FX, Rates, etc.) are NOT meant to denote lines of business or desks, but rather firmwide totals by risk stripe.
- 5) "Securitized Products" is defined as the contribution to P/L from exposures detailed on the Securitized Products and Agencies worksheets.
- 6) "Other Credit" is defined as the contribution from all credit products other than those specified on the "Securitized Products" or "Agencies" worksheets.
- 9) Cross-Asset Terms are those intra-asset risks attributable to the co-movement of mulitple asset classes. For example, an equity option paying off in a foreign currency would have both Equity and FX risk. The P/L due to this co-dependence would be entered into row 9.
- (B) Higher order risks are those inter-asset risks attributable to terms not represented in the FR-Y14Q. The highest order term represented in the 14Q will vary based on the specific asset class. For example, the commodity spot vol grids do not capture risks attributable to the co-movement of multiple underlying commodities.

When reporting P/L numbers above, report profits as positive numbers and losses as negative numbers.

Footnotes to the PPNR Metrics Worksheet

- (1) Provide metrics data for all quarters, but only if International Retail and Small Business Segment revenues exceeded 5% of Total Retail and Small Business Segment and Total Retail and Small Business revenue exceeded 5% of total revenues in any of the last four actual quarters requested in the PPNR schedule.
- (2) Provide regional breakouts for all quarters but only if international revenue exceeded 5% of the total revenue in any of the last four actual quarters requested in the PPNR schedule.
- (3) Average oustanding principal balance fo residential mortgage loans the bank services for others.
- (4) The Weighted Average Life should reflect the current position, the impact of new business activity, as well as the impact of behavioral assumptions such as prepayments or defaults, based on the expected remaining lives, inclusive of behavioral assumptions. It should reflect the weighted average of time to principal actual repayment (as modeled) for all positions in that portfolio, rounded to the nearest monthly term. For revolving products, the WAL should reflect the underlying repayment behavior assumptions assumed by the institution, which would include contractual repayments, any assumed excess payments or prepayments, and defaults.
- (5) A rate movement in an environment where the repricing assumption assumed by each of the major deposit products is not restricted by a cap, floor, or zero. Beta should be reported as a balance-weighted average of the betas of the line items that contribute to the roll up point requested, with an as-of date equal to the reporting date.
- (6) Reference PPNR Net Interest Income worksheet for product definitions.
- (7) Corresponds to line item 7C on the Net Interest Income worksheet.
- (8) Include both direct and allocated expenses.
- 9) "Metrics by Business Segment/Line" correspond to Business Segments/Lines on PPNR Submission worksheet, unless explicitly stated otherwise. See Instructions for definitions of standardized Business Segments/Lines. Unless specified otherwise, all numbers are global. Only line items with "Industry Market Size" in the name are industry/market-wide items; all other items are bank-specific.
- (10) Assets under Management
- (11) Provide a relevant headcount number (e.g., financial advisors, portfolio managers) to facilitate the assessment of revenue productivity in the Wealth Management/Private Banking business line.
- (12) Regions outside the US and Puerto Rico.
- (13) Report the grossed up "interest" balances that result from prime brokerage activities.
- (14) List items on PPNR Projections worksheet that include this item if any:
- (15) Full-time equivalent employees at end of current period (RIAD4150) for a given segment only.
- (16) Asia and Pacific region (incl. South Asia, Australia, and New Zealand)
- (17) Europe, Middle East, and Africa
- (18) Latin America, including Mexico
- (19) List Business Segments reported on PPNR Projections Worksheet that include this item if any

The total in line item 49 should correspond to the amount provided in Call Report Schedule RC-F Line 6, item 14 in the instructions. The amount included should only reflect collateral rented under operating leases and not include collateral subject to capital/ financing type
- (21) Credit cards (including charge cards). List which line item(s) on PPNR Submission worksheet contain(s) the Cards Rewards/Partner Sharing contra-revenues and/or expenses.

Applicate line items 4.0. US and Doubt Pinnagh

- (22) Applies to line items 1-9; US and Puerto Rico only.
- (23) Total domestic mortgages originated during the quarter.
- (24) Call Report name is "Residential Mortgages Sold During the Quarter"; this metric need not be limited to Mortgages and Home Equity business line.
- (25) New business pricing for time deposits refers to the anticipated average rate on newly issued domestic time deposits, including renewals. Given that time deposits have a stated maturity, all time deposits issued for that time period are considered new business.
- (26) The term "curve" refers to the reference rate used to price time deposits. Given that the pricing of time deposits is dependent on the term, the institution should provide the overall curve used to price time deposits. If the institution only assumes a single maturity term for new issuances, complete line 85B and 85C only, otherwise complete line 85A only.
- (27) If the institution only assumes a single maturity term for new issuance, then the institution should provide the relative index and spread used to estimate new business pricing in lieu of the curve.
- (28) A backlog should be based on probability weighted fees. The data should be consistent with historical internal reporting, not by market measurement. The last quarter should be the Bank's latest backlog estimate.
