**PART I.—GENERAL INFORMATION**

**Background.**--This proceeding was instituted in response to a petition filed on February 4, 2019, by the American Institute of Steel Construction LLC, Chicago, IL. Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at [https://www.usitc.gov/investigations/701731/2019/fabricated\\_structural\\_steel\\_canada\\_china\\_and/preliminary.htm](https://www.usitc.gov/investigations/701731/2019/fabricated_structural_steel_canada_china_and/ preliminary.htm).

**Fabricated structural steel** covered by these investigations includes carbon and alloy (including stainless) steel products such as angles, columns, beams, girders, plates, flange shapes (including manufactured structural shapes utilizing welded plates as a substitute for rolled wide flange sections), channels, hollow structural section ("HSS") shapes, base plates, plate-work components, and other steel products that have been fabricated for assembly or installation into a structure (fabricated structural steel). Fabrication includes, but is not limited to, cutting, drilling, welding, joining, bolting, bending, punching, pressure fitting, molding, adhesion, and other processes.

Fabricated structural steel products included in the scope of these investigations are products in which: (1) iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is two percent or less by weight.

Fabricated structural steel is covered by the scope of the investigations regardless of whether it is painted, varnished, or coated with plastics or other metallic or non-metallic substances. Fabricated structural steel may be either assembled; disassembled, but containing characteristics or items, such as holes, fasteners, nuts, bolts, rivets, screws, tongue and grooves, hinges, or joints, so that the product(s) may be joined, attached, or assembled to one or more additional product(s); or partially assembled, such as into modules, modularized construction units, or sub-assemblies of fabricated structural steel. Products under investigation include carbon and alloy steel products that have been fabricated for erection or assembly into structures, including but not limited to, buildings (commercial, office, institutional, and multi-family residential); industrial and utility projects; parking decks; arenas and convention centers; medical facilities; and ports, transportation and infrastructure facilities.

Subject merchandise includes fabricated structural steel that has been assembled or further processed in the subject country or a third country, including but not limited to painting, varnishing, trimming, cutting, drilling, welding, joining, bolting, punching, bending, beveling, riveting, galvanizing, coating, and/or slitting or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the fabricated structural steel. Fabricated structural steel may be attached, joined, or assembled with non-steel components at the time of importation. The inclusion, attachment, joining, or assembly of non-steel components with fabricated structural steel does not remove the fabricated structural steel from the scope.

All products that meet the written physical description are within the scope of these investigations unless specifically excluded. Specifically excluded from the scope of these investigations is certain fabricated steel concrete reinforcing bar ("rebar"). Fabricated rebar is excluded from the scope only if (i) it is a unitary piece of fabricated rebar, not joined, welded, or otherwise connected with any other steel product or part; or (ii) it is joined, welded, or otherwise connected only to other rebar.

Also excluded from this scope is fabricated structural steel used for bridges and bridge sections. For the purpose of this scope, fabricated structural steel used for bridges and bridge sections is defined as fabricated structural steel that is used in bridges and bridge sections and that conforms to American Association of State and Highway and Transportation Officials ("AASHTO") bridge construction requirements or any state or local derivatives of the AASHTO bridge construction requirements.

Also excluded from this scope are pre-engineered metal building systems. For the purposes of this scope, pre-engineered metal building systems are defined as complete metal buildings that integrate steel framing, roofing and walls to form one, pre-engineered building system and are designed and manufactured to Metal Building Manufacturers Association guide specifications. Pre-engineered metal building systems are typically limited in height to no more than 60 feet or two stories.

Also excluded from this scope are steel roof and floor decking systems designed and manufactured to Steel Deck Institute standards.

Also excluded from the scope are open web steel bar joists and joist girders that are designed and manufactured to Steel Joist Institute specifications.

Fabricated structural steel is currently imported under statistical reporting numbers 7308.90.9590, 7308.90.3000, and 7308.90.6000 of the Harmonized Tariff Schedule of the United States ("HTSUS"). They may also be imported under HTSUS statistical reporting numbers 7216.91.0010, 7216.91.0090, 7216.99.0010, 7216.99.0090, 7228.70.6000, 7301.10.0000, 7301.20.1000, 7301.20.5000, 7308.40.0000, 7308.90.9530, and 9406.90.0030. The HTSUS provisions are for convenience and customs purposes; the written description of the scope is dispositive.

**Reporting of information.**-- If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

**Confidentiality.**--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

**Verification.**--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

**Release of information.**--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals. In addition, if your firm is a U.S. producer, the information you provide on your production and imports of fabricated structural steel and your responses to the questions in Part I of the producer questionnaire will be provided to the U.S. Department of Commerce, upon its request, for use in connection with (and only in connection with) its requirement pursuant to section 702(c)(4)/732(c)(4) of the Act (19 U.S.C. § 1671a(c)(4)/1673a(c)(4)) to make a determination concerning the extent of industry support for the petitions requesting this proceeding. Any information provided to Commerce will be transmitted under the confidentiality and release guidelines set forth above. Your response to these questions constitutes your consent that such information be provided to Commerce under the conditions described above.

**D-GRIDS tool.**--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage ([https://www.usitc.gov/trade\\_remedy/question.htm](https://www.usitc.gov/trade_remedy/question.htm)) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is *optional*. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDs tool are available within the D-GRIDs tool itself.

I-1a. **OMB statistics.**--Please report below the actual number of hours required and the cost to your firm of completing this questionnaire.

II-11. **Employment data.**--Report your firm's employment-related data related to the production of fabricated structural steel and provide an explanation for any trends in these data.

**"Production and Related Workers" (PRWs)** includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12. For the January to September periods, calculate similarly and divide by 9.

If your firm had the same number of PRWs in all calendar years and had not experienced any changes in PRWs in the most recent interim period, you would have the same number of PRWs for the interim periods, regardless of whether the interim periods are Jan-Mar (Q1), Jan-June (Q1+Q2), or Jan-Sept (Q1+Q2+Q3).

**"Hours worked"** includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

**"Wages paid"** --Total wages paid before deductions of any kind (e.g., withholding taxes, old-age and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

II-12. **Related firms.**--If your firm reported transfers to related firms in question II-7, please identify the firm(s) and indicate the nature of the relationship between your firm and the related firms (e.g., joint venture, wholly owned subsidiary), whether the transfers were priced at market value or by a non-market formula, whether your firm retained marketing rights to all transfers, and whether the related firms also processed inputs from sources other than your firm.

II-13. **Purchases.**--Has your firm purchased fabricated structural steel produced in the United States or in other countries since January 1, 2015? (Do not include imports for which your firm was the importer of record. These should be reported in an importer questionnaire).

**"Purchase"** – A transaction to buy product from a U.S. corporate entity such as another U.S. producer, a U.S. distributor, or a U.S. firm that has directly imported the product.

**"Import"** –A transaction to buy from a foreign supplier where your firm is the importer of record.

<b>No</b>	<b>Yes</b>	<b>If yes-- Report such purchases in the table below and explain the reasons for your firms' purchases.</b>

III-9b. **Financial data reconciliation.**--The calculable line items from question III-9a (i.e., total net sales quantities (row D) and values (row H), total COGS (row L), gross profit (or loss) (row M), total SG&A (P), operating income (or loss) (row Q), and net income (or loss) (row U)) have been calculated from the data submitted in the other line items. Do the calculated fields return the correct data according to your firm's financial records ignoring non-material differences that may arise due to rounding?

		<p><b>If no</b>--For items reported after operating income (loss) in row Q, check the signs reported (rows R, S, and T). The two expense items in rows R and S should report positive numbers (i.e., expenses are positive and incomes or reversals are negative--instances of the latter should be rare in rows R and S) while the other income reported in row T should have positives values in most instances (i.e., income is positive, expenses or reversals are negative). III-12. **Asset values.**--Report the total assets (i.e., both current and long-term assets) associated with the production, warehousing, and sale of fabricated structural steel. If your firm does not maintain some or all of the specific asset information necessary to calculate total assets for fabricated structural steel in the normal course of business, please estimate this information based upon a method (such as production, sales, or costs) that is **consistent with relevant cost allocations in question III-9a**. Provide data as of the end of each calendar year specified below.

**Note:** Total assets should reflect net assets after any accumulated depreciation and allowances deducted.

Total assets should be allocated to the subject products if these assets are also related to other products. Please provide a brief explanation if there are any substantial changes in total asset value during the period; e.g., due to asset write-offs, revaluation, and major purchases.

*RECONCILIATION OF TRADE VS FINANCIAL DATA.*--Please ensure that the quantities and values reported for total shipments in part II (question II-7) equal the quantities and values reported for total net sales in part III, question III-9a of this questionnaire in each time period unless the financial data from part III (question III-9a) are reported on a fiscal year basis, in which case only the interim periods must reconcile. If the calculated fields below return values other than zero (i.e., "0") and both are being reported on a calendar basis, please explain the discrepancy below.
