GENERAL INFORMATION

Background.-- This proceeding was instituted in response to a petition filed on January 17, 2018, by American Cast Iron Pipe Company (Birmingham, Alabama), Berg Steel Pipe Corp. (Panama City, Florida), Berg Spiral Pipe Corp. (Mobile, Alabama), Dura-Bond Industries, Inc. (Export, Pennsylvania), Skyline Steel (Newington, Virginia), and Stupp Corporation (Baton Rouge, Louisiana). Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at https://usitc.gov/investigations/701731/2018/large_diameter_pipe_canada_china_greece_india/preliminary.htm.

LDWP covered by these investigations is welded carbon and alloy steel pipe, more than 406.4 mm (16 inches) in nominal diameter (large diameter welded pipe), regardless of wall thickness, length, surface finish, grade, end finish, or stenciling. Large diameter welded pipe may be used to transport oil, gas, steam, slurry, or other liquids. It may also be used for structural purposes, including piling. Specifically not included is large diameter welded pipe produced only to specifications of the American Water Works Association ("AWWA") for water and sewage pipe.

Large diameter welded pipe used to transport oil, gas, or natural gas liquids is normally produced to the American Petroleum Institute ("API") specification 5L. Large diameter welded pipe may also be produced to American Society for Testing and Materials ("ASTM") standards A500, A252, or A53. Large diameter welded pipe can be produced to comparable foreign specifications or to proprietary grades, or can be non-graded material. All pipe meeting the physical description set forth above is covered by the scope of these investigations, whether or not produced according to a particular standard.

Subject merchandise also includes large diameter welded pipe that has been further processed in a third country, including but not limited to coating, painting, notching, beveling, cutting, punching, welding, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope large diameter welded pipe.

The large diameter welded pipe that is subject to these investigations is currently classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) under subheadings 7305.11.1030, 7305.11.1060, 7305.11.5000, 7305.12.1030, 7305.12.1060, 7305.12.5000, 7305.19.1030, 7305.19.1060, 7305.19.5000, 7305.31.4000, 7305.31.6090, 7305.39.1000, and 7305.39.5000. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.
