

process Aleutian Islands Pacific cod from either the City of Adak or the City of Atka by October 31, NMFS establishes an Aleutian Islands catcher vessel Pacific cod harvest set-aside, along with other Pacific cod allocations by area, sector, and gear type. These harvest limits will be in effect in the following year.

NMFS implemented this collection of information in 2016 under Amendment 113 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area. Amendment 113 modified management of the BSAI Pacific cod fishery to set aside a portion of the Aleutian Islands Pacific cod total allowable catch for harvest by vessels directed fishing for Aleutian Islands Pacific cod and delivering their catch for processing to a shoreside processor located on land west of 170° W longitude in the Aleutian Islands (“Aleutian Islands shoreplant”). This harvest set-aside applies only if specific notification and performance requirements are met, and only during the first few months of the fishing year. This harvest set-aside provides the opportunity for vessels, Aleutian Islands shoreplants, and the communities where Aleutian Islands shoreplants are located to receive benefits from a portion of the Aleutian Islands Pacific cod fishery. The notification and performance requirements preserve an opportunity for the complete harvest of the BSAI Pacific cod resource if the set-aside is not fully harvested.

In March 2019, the U.S. District Court for the District of Columbia vacated the rule implementing Amendment 113 and remanded Amendment 113 to NMFS for reconsideration. In May 2019, the U.S. Department of Justice filed a notice of appeal.

As the notification of intent is based on the vacated regulations that implemented Amendment 113, this information will not be collected unless the regulations are reinstated on appeal.

NMFS is requesting renewal of this collection of information in the event of a successful appeal.

Affected Public: Local government.

Frequency: Annually; on occasion.

Respondent's Obligation: Required to obtain or retain benefits.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this

notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Wage Mariner Hiring Portal

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before January 6, 2020.

ADDRESSES: Direct all written comments to Adrienne Thomas, Government Information Specialist, NOAA, 151 Patton Avenue, Room 159, Asheville, NC 28801 (or via the internet at PRAComments@doc.gov). All comments received are part of the public record. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to: CAPT Joseph P Baczkowski, Office of Marine and Aviation Operations, 8403 Colesville Rd, RM500, Silver Spring, MD 20910, telephone number ((301) 713-7673), email address: joseph.baczkowski@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

Type of Review: Regular Submission (New Collection)

The Wage Mariner Hiring Portal (WMHP) is an internet-based system (website) that is designed to allow an

applicant to apply for a “wage mariner” position within the National Oceanic and Atmospheric Administration (NOAA) fleet of maritime vessels. The WMHP system collects basic user information, wage mariner licensing, certifications, and relevant current and or past work history. The Department of Commerce (DOC), through NOAA, Office of Marine and Aviation Operations (OMAO) has special hiring authority under Code of Federal Regulations (CFR), Title 5, Chapter 1, Subchapter A, Part 3, § 3.2 and under the DOC Department Administrative Order (DAO) 202-302 Section 2, Subsection .02a. specific to the hiring of federal wage mariner employees. The regulations allow OMAO to hire wage mariners into excepted service positions within the NOAA fleet of ocean going vessels in order to maintain adequate operations, maintenance, and safe staffing of the maritime ships.

No physical forms are used in this collection, it is all online. Applicants fill out basic personal, licensure, and work history information into a profile resume. Once their basic profile is complete, applicants can submit this resume to available wage mariner positions as shown on the WMHP website. The application information received is used to determine if the applicant meets the basic job qualification. The applicant's information is then passed on to the hiring official or it is placed in a pool of prospective candidates for future openings. Application information includes: First and last name, contact number and email address, wage mariner licenses and certifications, relevant work history.

II. Method of Collection

Information will be collected electronically through an online web based interactive system.

III. Data

OMB Control Number: 0648-xxxx.

Form Number(s): None.

Type of Review: Regular submission of a new information collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 1000.

Estimated Time per Response: 60 minutes. 5 minutes to fill our applicant's first and last name and contact mobile and or home number and email address. 5 minutes to fill out wage mariner license specific information. 40 minutes to enter wage mariner certifications and relevant past work history. 10 minutes to fill out relevant educational history.

Estimated Total Annual Burden Hours: 6000 hours.

Estimated Total Annual Cost to Public: 0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

Departmental Lead PRA Officer, Office of the Chief Information Officer, Commerce Department.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to a Low-Energy Geophysical Survey in the South Atlantic Ocean

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; Issuance of an Incidental Harassment Authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued an incidental harassment authorization (IHA) to the Scripps Institute of Oceanography (SIO) to incidentally harass, by Level B harassment only, marine mammals during a low-energy marine geophysical survey in the South Atlantic Ocean.

DATES: This Authorization is applicable from November 3, 2019 through November 2, 2020.

FOR FURTHER INFORMATION CONTACT: Stephanie Egger, Office of Protected Resources, NMFS, (301) 427-8401.

Electronic copies of the application and supporting documents, as well as a list of the references cited in this document, may be obtained online at: <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the "take" of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed incidental take authorization may be provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other "means of effecting the least practicable adverse impact" on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to in shorthand as "mitigation"); and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

Summary of Request

On May 15, 2019, NMFS received a request from SIO for an IHA to take marine mammals incidental to conducting a low-energy marine geophysical survey in the South Atlantic Ocean. The application was deemed adequate and complete on August 12, 2019. SIO's request was for take of a small number of 48 species of

marine mammals by Level B harassment. Neither SIO nor NMFS expects serious injury or mortality to result from this activity and, therefore, an IHA is appropriate.

Description of Planned Activity

SIO plans to conduct low-energy marine seismic surveys in the South Atlantic Ocean during November-December 2019. The seismic surveys would be conducted to understand the volcanic and tectonic development of Walvis Ridge and Rio Grande Rise in the South Atlantic Ocean. The seismic surveys would be conducted in International Waters with water depths ranging from approximately 500 to 5700 m. The surveys would involve one source vessel, R/V *Thomas G. Thompson* (*Thompson*). The *Thompson* would deploy up to two 45-in³ GI airguns at a depth of 2-4 m with a maximum total volume of ~90 in³ along predetermined tracklines. Seismic surveys would occur in five survey areas including Libra Massif in the Southwest Atlantic and Valdivia Bank, Gough, Tristan, and Central survey areas in the Southeast Atlantic.

SIO proposes to conduct low-energy seismic surveys low-energy seismic surveys in five areas in the South Atlantic Ocean. Reconnaissance Surveys are planned for three survey areas (Gough, Tristan, Central) and High Quality Surveys are planned to take place along the planned seismic transect lines in the main survey area (Valdivia Bank) and Libra Massif survey area (Figure 1). However, High-Quality Surveys may be replaced by Reconnaissance Surveys depending on weather conditions and timing (*e.g.*, 10 percent of survey effort at Valdivia Bank is expected to consist of Reconnaissance Surveys). All data acquisition in the Tristan survey area would occur in water >1000 m deep; all other survey areas have effort in intermediate (100-1,000 m) and deep ($\leq 1,000$ m) water. Most of the survey effort (97 percent) would occur in water >1000 m deep. The planned surveys would be in support of a potential future International Ocean Discovery Program (IODP) project and to improve our understanding of volcanic and tectonic development of oceanic ridges and to enable the selection and analysis of potential future IODP drill sites. To achieve the program's goals, the Principal Investigators propose to collect low-energy, high-resolution multi-channel seismic (MCS) profiles. The planned cruise would consist of digital bathymetric, echosounding, and MCS surveys.
