[**Note to the interviewer:** Text to read will be shown in plain text. Instructions will be shown in *red italics* and should not be read.]

Hi, my name is \_\_\_\_\_ from [FACILITY NAME], a local market research firm! We are working on a research study about tobacco products and would like to include your opinions. I want to assure you that we are not from a tobacco company or a company that sells quit-smoking aids. We just want to find out what people in this area think about tobacco products and nicotine. If you qualify and participate in the discussion group, you will get \$75 as a token of appreciation for your time.

To see if you qualify for the discussion group, we would like you to answer a few questions. The screening survey asks basic questions about yourself and about tobacco. There are no right or wrong answers, and only the researchers will know how you answer these questions, so please be honest. We will try our best to keep your information private. Still, your information could be shared by accident. Your participation is voluntary and you can stop at any time. There is no direct benefit to you for participating in the screening survey.

We will let you know in the next few days if you were selected. If so, you will be asked to attend a 90-minute discussion group nearby.

If you have any questions about the discussion group, you may contact the project staff through Dawnyéa D. Jackson of Rescue at 202-871-6550 ext 251or <u>djackson@rescueagency.com.</u>

- 1. Do you consent to participate in this short screening survey? [Do NOT read answer choices. Select one response.]
