## I. Summary

The ASCA Pilot will be evaluated using data analyses with respect to premarket submissions and survey responses from stakeholders. This document describes the types of survey questions intended for accreditation bodies and testing laboratories. Survey questions were developed using an approach similar to that described in the <a href="Report to Congress: Least Burdensome Training Audit">Report to Congress: Least Burdensome Training Audit</a> and using <a href="Surveys">Surveys</a> 101: A Simple Guide to Asking Effective Questions by Stephanie Beadell.

# II. Background

The evaluation of the ASCA Pilot is intended to support commitment D.8.a. in the MDUFA 4 Commitment Letter- "by the end of FY2022: FDA will have piloted and provided a report on the viability of an ASCA program..."

# III. Accreditation Body Survey

## Objectives

- <u>Objective 1:</u> Determine whether ASCA-recognized accreditation bodies believe the ASCA Pilot is good idea and worth continuing
- <u>Objective 2:</u> Determine the experience that ASCA-recognized accreditation bodies have had with the ASCA Pilot

#### Cohort

All accreditation bodies with ASCA Recognition at the time the survey is sent. This cohort includes accreditation bodies whose ASCA Recognition has been withdrawn.

#### Questions

The below questions are being asked to determine the effectiveness of the ASCA Pilot. Your input is important in determining what the ASCA Pilot looks like in the future.

<u>Objective 1:</u> Determine whether ASCA-recognized accreditation bodies believe ASCA Pilot is good idea and worth continuing

Question	Response Options
The ASCA Pilot supports international	Agree, Neutral, Disagree
harmonization by encouraging stakeholders	
to utilize consensus standards.	
The ASCA Pilot supports conformity	Agree, Neutral, Disagree
assessment activities	
The ASCA Pilot should be continued in	Agree- ASCA Pilot should continue as is (write
MDUFA 5	in box for why)
	Agree, With Changes- ASCA Pilot should
	continue with some changes (write in box for
	changes)
	Neutral
	Disagree- ASCA Pilot should not continue
	even with changes (write in box for why)

I would like to participate in the ASCA Pilot if	Yes, Neutral, No
it continues in MDUFA 5	
The ASCA Pilot would benefit from including	Agree, Neutral, Disagree
additional standards	
I believe the following categories of standards	Open Ended (may update to include specific
would add value to the ASCA Pilot	options as well as open ended response)

Objective 2: Determine experience ASCA-recognized accreditation bodies had with the ASCA Pilot

Question	Response Options
Participating in the ASCA Pilot requires as	Agree, Neutral, Disagree
much work as I expected	
I feel confident that if/when I provide	Agree, Neutral, Disagree
feedback to FDA regarding the ASCA Pilot,	
FDA will address my concerns	
Information about the ASCA Pilot is easy to	Agree, Neutral, Disagree
locate	
The processes and policies of the ASCA Pilot	Agree, Neutral, Disagree
are well described	
FDA follows the processes and policies of the	Agree, Neutral, Disagree
ASCA Pilot Guidance document	

## **Evaluation Method**

Survey results will indicate the frequency of each response for each question. At a minimum, results will be provided separately for (a) all respondents, (b) all respondents currently ASCA-recognized, and (c) all respondents that have ever been withdrawn.

# IV. Testing Laboratory Survey

### Objectives

- <u>Objective 1:</u> Determine whether ASCA-accredited testing laboratories believe the ASCA Pilot is good idea and worth continuing
- <u>Objective 2:</u> Determine the experience that ASCA-accredited testing laboratories have had with the ASCA Pilot
- <u>Objective 3:</u> Determine the extent to which device manufacturers have used an ASCA-accredited testing laboratory
- Objective 4: Determine the perceived impact of the ASCA Pilot on medical device testing

#### Cohort

All ASCA-accredited testing laboratories at the time the survey is sent. This cohort includes testing laboratories whose *ASCA Accreditation* has been suspended or withdrawn.

## Questions

The below questions are being asked to determine the effectiveness of the ASCA Pilot. Your input is important in determining what the ASCA Pilot looks like in the future.

<u>Objective 1:</u> Determine whether ASCA-accredited testing laboratories believe the ASCA Pilot is good idea and worth continuing

Question	Response Options
The ASCA Pilot supports international	Agree, Neutral, Disagree
harmonization by encouraging stakeholders	
to utilize consensus standards.	
The ASCA Pilot supports conformity	Agree, Neutral, Disagree
assessment activities	
The ASCA Pilot should be continued in	Agree- ASCA Pilot should continue as is (write
MDUFA 5	in box for why)
	Agree, With Changes- ASCA Pilot should
	continue with some changes (write in box for
	changes)
	Neutral
	Disagree- ASCA Pilot should not continue
	even with changes (write in box for why)
I would like to participate in the ASCA Pilot if	Yes, Neutral, No
it continues in MDUFA 5	
The ASCA Pilot would benefit from including	Agree, Neutral, Disagree
additional standards	
I believe the following categories of standards	Open Ended (may update to include specific
would add value to the ASCA Pilot	options as well as open ended response)

Objective 2: Determine the experience that ASCA-accredited testing laboratories have had with the ASCA Pilot

Question	Response Options
Participating in the ASCA Pilot requires as	Agree, Neutral, Disagree
much work as I expected	
I feel confident that if/when I provide	Agree, Neutral, Disagree
feedback to FDA regarding the ASCA Pilot,	
FDA will address my concerns	
Information about the ASCA Pilot is easy to	Agree, Neutral, Disagree
locate	
The processes and policies of the ASCA Pilot	Agree, Neutral, Disagree
are well described	
FDA follows the processes and policies of the	Agree, Neutral, Disagree
ASCA Pilot Guidance document	

<u>Objective 3:</u> Determine the extent to which device manufacturers have used an ASCA-accredited testing laboratory

Question	Response Options
To the best of my knowledge, device	Agree, Neutral, Disagree
manufacturers are aware of ASCA	
Accreditation	
To the best of my knowledge, device	Agree, Neutral, Disagree
manufacturers understand what ASCA	
Accreditation means	
I have conducted testing for a device	Yes, No
manufacturer under the ASCA Pilot	
I have conducted testing for the following	0
number of device manufacturer(s) under the	1-5
ASCA Pilot:	5-10
	>10
I have conducted testing for device	Yes, No
manufactures I did not work with prior to the	
ASCA Pilot.	
The testing I conducted for a device	Yes, No, Unknown, N/A (I have not
manufacturer was included in a premarket	conducted testing for a device manufacturer
submission to FDA	under the ASCA Pilot)
The testing I conducted for a device	Yes, No, Unknown, N/A (I have not
manufacturer was used to meet U.S.	conducted testing for a device manufacturer
regulatory requirements beyond FDA (e.g.,	under the ASCA Pilot)
OSHA, etc.)	
The testing I conducted for a device	Yes, No, Unknown, N/A (I have not
manufacturer was used to meet regulatory	conducted testing for a device manufacturer
requirements of countries and/or	under the ASCA Pilot)
jurisdictions outside the U.S. (e.g., CE Mark)	

Objective 4: Determine the perceived impact of the ASCA Pilot on medical device testing

Question	Response Options
Device manufacturers consider whether a	Agree, Neutral, Disagree
testing laboratory has ASCA Accreditation	
when selecting a laboratory	
Having ASCA Accreditation has improved my	Agree, Neutral, Disagree
value proposition to device manufacturers	

## **Evaluation Method**

Survey results will indicate the frequency of each response for each question. At a minimum, results will be provided for (a) all respondents, (b) all testing laboratories with ASCA Accreditation at the time of the survey, (c) all testing laboratories with ASCA Accreditation suspended at the time of the survey, and (d) all testing laboratories with ASCA Accreditation withdrawn at the time of the survey.
