## Be Outfitted with Personal Air Sampler

CDC estimates the average public reporting burden for this collection of information as 5 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0079).

Study staff will outfit participants with personal air monitors during the morning of each study day. Respondents will wear the air monitors throughout the day, and study staff will collect the air monitors at the end of each study day.

Air monitoring equipment will be calibrated and maintained according to the manufacturer's specifications of the specific instruments used.

Filters will be labeled with Study ID, Date, Time on, Time off. They will be handled and processed according to the specifications of the sub-contractor conducting the analyses.
