Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory (**Federal Register**, July 16, 1996) as meeting the minimum standards of the Mandatory Guidelines published in the **Federal Register** on January 23, 2017 (82 FR 7920). After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified

laboratories and participate in the NLCP certification maintenance program.

## DEPARTMENT OF HOMELAND SECURITY

### Technical Resource for Incident Prevention (TRIPwire) User Registration and Questionnaire

**AGENCY:** Infrastructure Security Division (ISD), Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

**ACTION:** 30-Day notice and request for comments; revision, 1670-0028.

**SUMMARY:** DHS CISA ISD will submit the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. CISA previously published this ICR for a 60-day public comment period. No comments were received by CISA. The purpose of this notice is to allow an additional 30 days for public comments.

**DATES:** Comments are due by January 29, 2020.

**ADDRESSES:** Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to the OMB Desk Officer, Department of Homeland Security and sent via electronic mail to [dhsdeskofficer@omb.eop.gov](mailto:dhsdeskofficer@omb.eop.gov). All submissions must include the words "Department of Homeland Security" and the OMB Control Number 1670-0028.

Comments submitted in response to this notice may be made available to the public through relevant websites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public

\* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

notwithstanding the inclusion of the routine notice.

**FOR FURTHER INFORMATION CONTACT:**

Dennis Molloy, 703–235–9388, [Dennis.molloy@cisa.dhs.gov](mailto:Dennis.molloy@cisa.dhs.gov).

**SUPPLEMENTARY INFORMATION:** The CISA ISD Office of Bombing Prevention (OBP) has a leading role in implementation of the national counter-IED policy, articulated through Presidential Policy Directive 17 (PPD–17) Countering IEDs), serving as the Deputy Administrator of the federal interagency Joint Program Office for Countering Improvised Explosive Devices (JPO C–IED) and working in close collaboration with the White House National Security Council. The JPO C–IED coordinates and tracks Federal government progress in building national counter-IED capabilities. OBP also leads the DHS in implementation of the national counter-IED policy, serving as the DHS Counter-IED Program Management Office and chairing the DHS IED Working Group.

OBP is instrumental in aligning DHS and national counter-IED efforts through centralized and effective coordination of ongoing programs with national policy and strategy goals, resulting in better resource allocation within OBP and across DHS and our Federal, state, local, tribal, territorial and private sector partners.

TRIPwire (Technical Resource for Incident Prevention) is the DHS online, collaborative information-sharing network for bomb technicians, first responders, military personnel, government officials, intelligence analysts, and select private sector security professionals to increase awareness of evolving IED tactics, techniques, and procedures, as well as incident lessons learned and counter-IED preparedness information.

Users from Federal, State, local, and tribal government entities, as well as business and/or other for-profit industries, can elect to register for TRIPwire access. The TRIPwire portal contains sensitive information related to terrorist use of explosives and therefore user information is needed to verify eligibility and access to the system.

There are three main instruments within this collection: TRIPwire User Registrations, TRIPwire Revalidations, and TRIPwire Questionnaire. The information collected during the TRIPwire user registration process is reviewed electronically by the OBP to validate the user's "need to know," which determines their eligibility for and access to TRIPwire. OBP verifies users need for access by confirming that a valid email address is used to register and checking employment references.

Annually, users are revalidated based on the information provided during their registration. For revalidation, users and employment references receive a system generated email to validate that access is still required and their information is still accurate.

OBP sends registered users a quarterly questionnaire seeking feedback as to how registrants use TRIPwire information, products, and tools. OBP uses the information collected during a quarterly questionnaire to review and improve the effectiveness and adequacy of the TRIPwire content and system features.

TRIPwire registration is user-driven and is completed electronically via the secure TRIPwire interface. Users are required to have a computer and access to the internet. The registration process requires users to provide their full name, assignment, citizenship, job title, employer name, professional address and contact information, as well as an Employment Verification Contact and their contact information. Notifications regarding the user registration are handled via electronic submission responses and/or email. In addition to electronic registration, TRIPwire uses automated notifications to registered users when/if their account or password is set to expire as well as annual re-verification of users' need for access to TRIPwire.

The TRIPwire Questionnaire is also collected electronically via a Survey Monkey link that is emailed to respondents. The Survey Monkey settings selected ensure that submissions are anonymous, and that an IP address is not collected.

The changes to the collection since the previous OMB approval include: updating the collection title, updating the TRIPwire User registration page, clarifying the revalidation burden, and adding a TRIPwire Questionnaire. Overall, these changes result in a decrease in burden estimates and costs.

This is a revision and renewal of an information collection.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

*Title of Collection:* Technical Resource for Incident Prevention (TRIPwire) User Registration and Questionnaire.

*OMB Control Number:* 1670–0028.

*Frequency:* Annually.

*Affected Public:* State, Local, Tribal, and Territorial Governments and Private Sector Individuals.

*Number of Annualized Respondents:* 4,333.

*Estimated Time per Respondent:* 0.17 hours, 0.017 hours, 0.083 hours.

*Total Annualized Burden Hours:* 422 hours.

*Total Annualized Respondent Opportunity Cost:* \$13,736.

*Total Annualized Respondent Out-of-Pocket Cost:* \$0.

*Total Annualized Government Cost:* \$7,447.

**Evette Maynard-Noel,**

*Deputy Chief Information Security Officer.*

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

[Docket No. FWS–R3–ES–2019–0107; FXES11130300000–201–FF03E00000]

#### **Draft Environmental Assessment and Draft Habitat Conservation Plan; Receipt of an Application for an Incidental Take Permit, Blue Creek Wind Farm, Van Wert and Paulding Counties, Ohio**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** We, the U.S. Fish and Wildlife Service, have received an application from Blue Creek Wind Farm, LLC (applicant), for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended, for its Blue Creek Wind Farm project. If approved, the ITP would authorize the incidental take of the Indiana bat and the northern long-eared bat. The applicant has prepared a draft habitat conservation plan (HCP), which is available for public review. We also announce the availability of a draft
