TOTAL LABOR BURDEN AND COSTS (rounded)ⁱ				
TOTAL CAPITAL AND O&M COST (rounded)ⁱ				
GRAND TOTAL (rounded)ⁱ				

Assumptions:

^a We estimate an average of 153,463 existing respondents and 1,284 new respondents will be subject to the standard per year. These respondents include 16,025 major source stationary RICE (>500 hp), 4,710 area source stationary RICE, 86,649 CI engines, 410 area source engines, and 45,633 SI engines. This estimate includes 769 non-exempt major stationary RICE (>500 hp), 105 exempt major stationary RICE (>500 hp), and 410 area source engines.

^b This ICR uses the following labor rates: \$141.06 per hour for Executive, Administrative, and Managerial labor; \$120.27 per hour for professional labor; and \$104.40 per hour for production labor. These rates are from the United States Department of Labor, Bureau of Labor Statistics, June 2019, “Table 2. Civilian Worker Compensation by Industry and Occupation, 2018.” The rates have been increased by 110 percent to account for the benefit packages available to those employees.

^c The estimated number of sources for these activities was obtained from EPA ICR Number 1975.04.

^d We assume all non-exempt new sources have to complete these activities (1,284 new sources - 105 major exempt new sources).

^e We assume 127,022 existing sources have to write semiannual reports. This estimate includes 16,025 existing major source engines, 410 existing area source engines, 45,633 existing SI engines, and 25,995 existing CI engines.

^f We assume 25,995 existing CI engines have to complete annual reports. This estimate is based on EPA ICR Number 1975.04.

^g We assume 446 local utilities and 16 hours per annual report, and 70 curtailment service providers with 1,000 hours per report. Reporting requirements for emergencies RICE will begin in 2016 which is the final year covered in this ICR. This estimate is based on EPA ICR Number 1975.04 (which covers reporting requirements for emergencies RICE every three years) for this ICR.

^h These estimates were obtained from EPA ICR Number 1975.04, 1975.05, 1975.07 and 1975.08.

ⁱ Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

Assumptions:

^a We estimate an average of 153,463 existing respondents and 1,284 new respondents will be subject to the standard ¹ respondents include 16,025 major source stationary RICE (>500 hp), 4,710 area source stationary RICE, 86,649 CI engines, and 45,633 SI engines. The new respondents includes 769 non-exempt major stationary RICE (>500 hp), 105 exempt major stationary RICE (>500 hp), and 105 exempt area source stationary RICE.

^b This ICR uses the following labor rates: \$66.62 for managerial, \$49.44 for technical, and \$26.75 for clerical labor. The rates are based on the 2013 General Schedule, which excludes locality rates of pay. The rates have been increased by 60 percent to account for the January 2013 Final Rule amendment.

^c We assume 127,022 existing sources have to write semiannual reports. This estimate includes 16,025 existing major source stationary RICE (>500 hp), 4,710 area source stationary RICE, 86,649 CI engines, and 45,633 existing SI engines.

^d We assume 25,995 existing CI engines, 446 local utilities, and 70 curtailment service providers have to complete an annual compliance report. The estimate includes 105 exempt major stationary RICE (>500 hp), 105 exempt area source stationary RICE, and 70 curtailment service providers.

^e Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
