Topic 4: Requesting Access to EIN Data for Export Reports

Introduction

ACE Portal Account users who created an Exporter Account associated to their Top Account:

- Any Exporter EIN matching the existing Importer of Record numbers in the ACE Importer Account will be automatically authorized to have the EIN data appear in the AES Export reports. The “Authorization for Reports” field on the Exporter Account will reflect the status accordingly; thus those that match will reflect “Authorization for Reports: Authorized”.
- Any Exporter EIN that does not match an existing Importer of Record (IR) number in the ACE Importer Account must request *EIN Authorization for Reports* for the specific EIN(s). The status of the “Authorization for Reports” field will initially reflect “Not Authorized”.

- **NOTE:** The “**Authorization for Reports**” status in the Exporter Account details is initially set to **Not Authorized**. This status will change to ***Pending*** upon selection of the “Request EIN Reports Authorization” button. The exporter must comply with the Census request to provide additional account information before Census will approve the exporter’s EIN for inclusion in ACE AES Reports.
- Once approved by Census, the “Authorization for Reports” status changes to ***Authorized*** for the specified EIN. If “denied” by Census, the “*Authorization for Reports*” status changes to “**Denied**” for the specific EIN. In either case, both the TAO and the Requester will receive emails regarding the approval or denial by Census.
- Note: These *Request EIN Authorization for Reports* steps must be completed for each EIN in order for the export data for that EIN to appear in the AES reports.

IMPORTANT: Requests for EIN Authorization for Export Reports are vetted by **U.S. Census** and not through normal ACE channels. For general questions on **ACE Trade Export Reports**, please contact Census at 800-549-0595, Option 5.
