**SUPPLEMENTARY INFORMATION:** Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines. The Mine Act authorizes the National Institute for Occupational Safety and Health (NIOSH) to study the causes and consequences of coal-related respiratory disease, and in cooperation with MSHA, to carry out a program for early detection and prevention of pneumoconiosis. NIOSH administers the National Coal Workers’ Health Surveillance Program, “Specifications for Medical Examinations of Underground Coal Miners,” as specified in 42 CFR part 37. Title 30 CFR 72.100 contains collection requirements for these activities in paragraphs (d) and (e).

Section 72.100(d) requires that each mine operator must develop and submit for approval to NIOSH a plan in accordance with 42 CFR part 37 for providing miners with the required periodic examinations specified in § 72.100(a) and a roster specifying the name and current address of each miner covered by the plan. Section 72.100(e) requires that each mine operator must post on the mine bulletin board at all times the approved plan for providing the examinations specified in § 72.100(a). Sections 72.100(d) and (e) are requirements that mirror NIOSH information collection requirements under 42 CFR 37.4 (existing OMB No. 0920–0020). Including these requirements allows MSHA to use its inspection and enforcement authority to ensure that operators comply with these provisions. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on March 25, 2020 (85 FR 16960).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

MSHA issues certifications, qualifications, and approvals to the nation's miners to conduct specific work within the mines. Miners requiring qualification or certification from MSHA will register for an MIIN. MSHA uses this unique number in place of individual Social Security numbers (SSNs) for all MSHA collections. The MIIN identifier fulfills Executive Order 13402, Strengthening Federal Efforts Against Identity Theft, which requires Federal agencies to better secure government held data. Only current or prospective recipients of LSC Basic Field Grants may apply for approval to subgrant these funds.

LSC encourages applicants to use LSC's Subgrant Agreement Template as a model subgrant agreement. If the applicant does not use LSC's Template, the proposed agreement must include, at a minimum, the substance of the provisions of the Template.

Once submitted, LSC will evaluate the application and provide applicants with instructions on any needed modifications to the submitted documents or Draft Agreement provided with the application. The applicant must then upload a final and signed subgrant agreement through GrantEase by the date requested.

As required by 45 CFR 1627.4(b)(1)(ii), LSC will inform applicants of its decision to disapprove or approve the subgrant no later than the date LSC informs applicants of LSC's 2021 Basic Field Grant funding decisions.
