

approximately 82 hours will be required on average to collect, process, and report the data for each non-small insurer; approximately 28 hours will be required to collect, process, and report data for each small insurer; approximately 51 hours will be required to collect, process, and report data for each captive insurer; and approximately 51 hours will be required to collect, process, and report data for each alien surplus lines insurer.

Assuming this breakdown, and when applied to the number of reporting insurers anticipated in light of prior experience, the estimated annual burden would be 44,400 hours ((100 non-small insurers × 82 hours) + (200 small insurers × 28 hours) + (550 captive insurers × 51 hours) + (50 alien surplus lines insurers × 51 hours)). At a blended, fully loaded hourly rate of \$50.50,⁸ the cost would be \$2,242,200 across the industry as a whole, or \$4,141 per each non-small insurer (\$50.50 × 82 hours), \$1,414 per each small insurer (\$50.50 × 28 hours), \$2,576 per each captive insurer (\$50.50 × 51 hours), and \$2,576 per each alien surplus lines insurer (\$50.50 × 51 hours).

the full estimate of an additional 10 hours to complete the worksheet is weighted accordingly across the total number of responding insurers.

⁸Based on data from the Bureau of Labor Statistics, for *Insurance Carriers and Related Activities*, <https://www.bls.gov/iag/tgs/iag524.htm>. The average wage rate for all insurance employees was \$37.52 in March 2020, and the total benefit compensation in the 4th Quarter of 2019 was 34.6%, which is a benefit multiplier of 1.346. Therefore, a fully-loaded wage rate for insurance employees is \$50.50, or \$37.52 × 1.346.
