Pricing Variables

1. What was the price of peanuts during this time last year? Please leave blank if non-applicable.

\$0.193 / lbs

\$0.193 / lbs, based on 2018 September Peanut Pricing Report

2. Of the following, which did you consider when determining peanut prices for September?

- Acreage utility
- Distribution costs
- Harvesting rates
- Competitor pricing
- Product saturation

3. During peak seasons, peanut pricing can increase by up to 33% in sparse markets while decreasing by 12% in saturated markets. How do these trends effect pricing of peanuts within your operation?

We do research on prices in the neighboring area and fix our prices for the season based on rates local to us.
