Origin of the United States Sugar Import Tariff-Rate Quota Shares

by Nydia Suarez

The current U.S. tariff-rate quota (TRQ) on sugar imports had its origins in 1982. Presidential Proclamation No. 4941 of May 5, 1982, established a system of country-by-country sugar quotas to replace a previous quota system. Under the Proclamation, the U.S. Trade Representative (USTR) was responsible for making all announcements and determinations concerning country quota allocations, while the Secretary of Agriculture was responsible for making all announcements and determinations concerning quota periods and global quota amounts.

Procedure Used To Obtain Country Allocations

The following procedure was used to determine country sugar quota allocations. First, data on U.S. sugar imports (by country) for calendar years 1975-1981 were obtained from the U.S. Customs Service (tables 1 and 2). Second, refined sugar imports were converted to a raw value equivalent by multiplying refined sugar imports by 1.07. Total sugar imports are the sum of raw imports plus the raw value equivalent of refined imports. Third, the highest and lowest observations for each country were discarded and the remaining five observations for each country totaled. Fourth, the five-observation totals for each country were added to obtain a total for all countries. The fifth and final step was to divide each country's five-observation total by the total for all countries (table 3), creating the basis for each country's share.

Initial Modifications to the Country-by-Country Quota System

In the case of quota allocations for "other specified countries and areas," regulations were issued by the Secretary of Agriculture on August 11, 1982, to: 1) make specific allocations to a group named "other specified countries and areas" allowing each country classified in this group to ship either its pro rata share of .3 percent of the base import quota or 16,500 short tons, whichever was greater; 2) establish a certificate of quota eligibility (CQE) system; 3) shift from quarterly to annual quotas; and 4) modify the quota allocations. At the same time, Barbados, Trinidad-Tobago, Bolivia, India, Fiji, Zimbabwe, and Malawi were given individual percentage quota allocations. France, Anguilla, Antigua, Dominica, Grenada, Saint Lucia, Saint Vincent and the Grenadines, Montserrat, British Virgin Islands, Tonga, and Nauru were completely removed from the quota allocation system. This left Mexico, Haiti, Paraguay, Saint Christopher-Nevis, Madagascar, and Cote D'Ivoire as the remaining countries classified as "other specified countries and areas."

It was found that the quota system established on May 5, 1982, had prevented the importation of certain refined sugars used for specialized purposes and originating in countries which did not have quota allocations. This led the Secretary of Agriculture on June 23, 1983, to announce in the Federal Register that the base import quota for the period October 1, 1982-September 30, 1993 was increased from 2,800,000 short tons, raw value to 2,802,000 short tons, raw value, to allow the importation of 2,000 short tons, raw value of specialty sugars.

The USTR announced that the quota for imports of specialty sugar would be allocated at 80 short tons, raw value, for each of the following 25 countries: Belgium; Burma; Cameroon; People's Republic of China; the Congo (Brazzaville); Denmark; France; Federal Republic of Germany; Hong Kong; Indonesia; Ireland; Italy; Japan; Kenya; Luxembourg; Uruguay; Netherlands; Netherlands Antilles;

South Korea; Surinam; Sweden; Switzerland; United Kingdom; Venezuela, and Yemen.

There have been occasional adjustments, mostly temporary, in the country quota allocations during the last 15 years, for example for Nicaragua, South Africa, and Haiti. In September 1983, the USTR added the Congo (Brazzaville) and Uruguay to the category known as "other specified countries and areas," increasing the number of countries in this category from six to eight, and removed these two countries from the list of countries with a specialty sugar import quota allocation. Later in September 1983, Gabon and Papua New Guinea were added to the list of "other specified countries and areas," bringing to 10 the number of countries in that group. This set of countries is sometimes referred to as the "minimum boatload" group.

It was found that the origin of some of Malawi's shipments to the United States during calendar years 1975-1981 was not correctly identified. The error resulted in a percentage allocation for Malawi which is .3 percent less than it would otherwise have been, and Malawi's share was subsequently adjusted.

Modifications to the Sugar Quota System in the 1990's
Effective October 1, 1990, the United States modified the previous absolute quota system, replacing it with a TRQ. Under the TRQ, a limited level of imports is allowed to enter the United States at a low (first tier) tariff; any imports beyond that level are assessed a high (second tier) tariff which is practically a prohibitive rate. The country allocation system was left in place.

In the tariff schedule submitted by the United States, which implemented the results of the Uruguay Round GATT negotiations, effective January 1, 1995, the country allocations were not specified in the U. S. Harmonized Tariff Schedule. The United States agreed in the Uruguay Round to provide low-duty access for a minimum of 22,000 metric tons, raw value, of sugars which are usually referred to as "refined sugar," and 1.117 million metric tons, raw value, of raw cane sugar.

A country-by-country allocation system continues to be used for the raw cane sugar TRQ imports. For the refined sugar TRQ, the country-by-country allocations were dropped beginning in fiscal year 1996 in favor of a globalized (first-come, first-served) system. Beginning in fiscal 1997, imports of specialty sugar under the refined sugar TRQ, previously allocated to 23 countries, were also globalized. Beginning with fiscal 1998, Canada and Mexico have been given individual allocations of the refined sugar TRQ, the rest of which remains globalized.
