Send comments regarding this burden estimate or suggestions for reducing this burden to: National Marine Fisheries Service, Permit Office, 55 Great Republic Drive, Gloucester, MA 01930. The Paperwork Reduction Act requires that potential respondents for a fishing vessel permit be notified of certain information regarding their rights and the burden associated with applying for Federal fisheries permits.

One of the regulatory steps taken by the National Marine Fisheries Service to carry out its conservation and management objectives is the requirement of a permit for users of the resources. All the fisheries included on this application require a permit to fish for or retain these species in or from the EEZ. Section 303(b)(1) of the Magnuson-Stevens Fishery Conservation and Management Act specifically recognizes the need for permit issuance. The purpose and use of these permits are to: (1) Register industry participants and fishing vessels; (2) list the characteristics of fishing vessels; (3) exercise influence over compliance; (4) provide a mailing list for the dissemination of important information to the industry; (5) register participants to be considered for limited access; and (6) provide a pool of participants for data collection samples. Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number. Owner names, vessel characteristics, address, phone, and permit information will be posted on a public NOAA Fisheries website or released upon request. All other data submitted will be handled in accordance with NOAA Administrative Order 216-100, Protection of Confidential Fishery Statistics and Section 402(b) of the MSA.
