Question

Answer

1 OPDIV:

2 PIA Unique Identifier:

2a Name:

3 The subject of this PIA is which of the following?

- General Support System (GSS)
 Major Application
 Minor Application (stand-alone)
 Minor Application (child)
 Electronic Information Collection
 Unknown

3a Identify the Enterprise Performance Lifecycle Phase of the system.

3b Is this a FISMA-Reportable system?

- Yes
 No

4 Does the system include a Website or online application available to and for the use of the general public?

- Yes
 No

5 Identify the operator.

- Agency
 Contractor

6 Point of Contact (POC):

POC Title

POC Name

POC Organization

POC Email

POC Phone

7 Is this a new or existing system?

- New
 Existing

8 Does the system have Security Authorization (SA)?

- Yes
 No

8b Planned Date of Security Authorization

 Not Applicable

11 Describe the purpose of the system.

The Anonymous Instance - Research Electronic Data Capture (AIREDC) is being implemented as a data collection tool offered to CDC programs to support public health research and public health emergency response. It will be a primary data collection and research management system for all NCEZID divisions and branches, providing users a tool-set to manage clinical intervention trials in the field while collecting data on the efficacy of such trials. AIREDC will also assist epidemiological investigations in the field through the creation of dynamic data collection instruments.

12 Describe the type of information the system will collect, maintain (store), or share. (Subsequent questions will identify if this information is PII and ask about the specific data elements.)

AIREDC will not collect or request PII or any sensitive information for clinical or epidemiological follow-up and intervention. There are no forms or fields for PII collection, nor is PII collection necessary for the system to be utilized.

The information in AIREDC will vary, as the data requirements will vary based upon the public health event and associated projects that will be managed; e.g., public health research, laboratory research, emergency response, longitudinal studies, vaccine trials, and various other public health events.

13 Provide an overview of the system and describe the information it will collect, maintain (store), or share, either permanently or temporarily.

AIREDC is being designed for use in creating, fielding, and managing large or small data collection projects. Data collection projects encompass all facets of maintaining a research or public health response effort in the field. This includes data collection, management, analysis, and visualization purposes.

The information in AIREDC will vary, as the data requirements will vary based upon the public health event and associated projects that will be managed; e.g., public health research, laboratory research, emergency response, longitudinal studies, vaccine trials, and various other public health events. However, AIREDC will not collect or request PII or any sensitive information for clinical or epidemiological follow-up and intervention. There are no forms or fields for PII collection, nor is PII collection necessary for the system to be utilized.

14 Does the system collect, maintain, use or share PII? Yes No
