08/17/2007	1.1	<p>Updates based on 08/13/2007 review meeting. Changes highlighted in yellow.</p> <ul style="list-style-type: none"> In all tables that are based on a table in another spec, added the name of the origin spec. Globally, removed many references in Module Settings (last section of table), as these were copied from previous specs and often did not apply to current context. Globally, filled in vocabulary and dtmf keys in options. Globally, updated all "Entering From" links. In 7020, during the rest of the year, changed link to go to 7038-FT-NewAddressYN-DM In 7025, corrected typo in name of Prompt-1, and added Developer note explaining relation of this table to 7035-FT-NowWhatYN-DM In 7026, corrected prompt names In 7030, clarified purpose of DM in internal note, fixed "Entering from" (now 7038-FT-NewAddressYN-DM), and added Developer note explaining relation of this table to 7035-FT-NowWhatYN-DM In 7035, "Replacement" option, changed so goes to 7036-FT-WhichYear-DM (new DM). Added new DM, 7036-FT-WhichYear-DM, to disambiguate the year of the replacement 1099. In 7037, changed "Yes" action to go to 7070-FT-Need2Ask-Msg; updated attestation wording with privacy/paperwork text, and added in secondary prompts. In 7038, corrected "Entering from" as 7020-FT-CurrentDate-BC, corrected Initial prompt to say "Social Security" in full, and added in secondary prompts. The "No" condition now has an exit prompt and goes to 7030-FT-NotJanuary-Msg. In 7070, adjusted Prompt-1 wording to say "several" questions. In 7080, adjusted name collection parameter to collect first name first and then last name. In 7090, adjusted Failure condition to go to 7095-FT-DOB-DM. In 7115, added additional conditions and actions. (Results of Aug 1 meeting with L. Moore and email from C. Walton.) In 7125, added reference to corresponding return code. In 7150, changed Prompt-1 to say that we're starting with the FIRST name. In 7165, added/changed prompt names for HighConf conditions. In 7195, added/changed prompt names for "Yes" option. Created new DMs 7121, 7122, and 7123 (Results of Aug 1 meeting with L. Moore and email from C. Walton.) In 7125, added "Auth" to the DM title, changed prompt wording, and added developer note. (Results of Aug 1 meeting with L. Moore and email from C. Walton.) In 7130, added "Auth" to the DM title, changed prompt wording, and added developer note. (Results of Aug 1 meeting with L. 	Daniel Engelberg

		<p>Moore and email from C. Walton.)</p> <ul style="list-style-type: none"> In 7230, modified Initial prompt for clearer wording and added secondary prompts. In 7235, added secondary prompts and option vocabulary. In 7240, changed prompts to read "...deceased person's..." and corrected prompt names. In 7255, added return codes to OffSeason and other conditions and actions. (Results of Aug 1 meeting with L. Moore and email from C. Walton.) In 7260, corrected prompt terminology to read "replacement 1099". In 7265, added exit prompt for "No" option. In 7270, added secondary prompts and exit prompt for "Main Menu" option. In 7275, added additional conditions and actions. (Results of Aug 1 meeting with L. Moore and email from C. Walton.) In 7280, corrected prompt terminology to read "replacement 1099", and corrected condition name. In 7285, added Retry and ExitSuccess prompts. In 7290, added Retry and ExitSuccess prompts. In 7300, clarified Initial prompt wording and added secondary prompts. Created new DMs 7301, 7302, 7303, 7304 (Results of Aug 1 meeting with L. Moore and email from C. Walton.) In 7310, added prompt wording and developer note. (Results of Aug 16 meeting with L. Moore and email from C. Walton.) After 7310, deleted note that referred to N8NN spec for return codes 151, 152, and others. These are handled in the new DMs within this spec. (Results of Aug 16 meeting with L. Moore and email from C. Walton.) Throughout: Added Developer Notes about all parameter values that are shown here, stating that developer should validate these values against the parameters that are in currently deployed code.

09/04/2007	1.6	<p>(In addition to the changes listed below, see the v1.5 list above.)</p> <p>Changes highlighted in green.</p> <ul style="list-style-type: none"> • Changed authentication sequence. <ul style="list-style-type: none"> o Was SSN – First Name – Last Name – Alt Name – DOB o Is now SSN – DOB – First Name – Last Name – Alt Name • Changed name collection approach from method used in KBA spec to method used in TPPW spec. See below for details. Functionally the approaches are almost identical, with the exception that now we confirm first name as soon as we collect it, rather than waiting to confirm first name and last name together. The main improvement is the simplification of the spec through reduction in the number of DMs; in addition the approach is more linear and no longer uses subroutines. • Globally, added dtmf options in Retry2, Timeout2 and Help prompts when missing. (Added in Retry1 in cases where there was no Retry2.) • Removed 7080, 7090, 7150, 7180, 7185, 7205 • Changed numbering to retain sequential order following change in call-flow sequence: <ul style="list-style-type: none"> o 7070 changed to 7055 o 7075 changed to 7060 o 7095 changed to 7065 o 7200 changed to 7085 	Daniel Engelberg

Chapter 1: Introduction

This document is one part of a set of documents that describe the user interface for the Social Security Administration (SSA) N8NN SARA 2 application. This document describes only the interaction for ordering a replacement 1099/1042s form. The call flow has passed through Call Steering (in the N8NN application) before getting to this section.

Privacy

The following information is considered confidential; **SSN, First Name, Last Name, Other Last Name** (as it appears on their Social Security card), and **Date of Birth**. The confidential flag should be set to true for all dialog modules collecting this information from the caller.

Timeouts and Retries

Retry prompts are specified in the DialogModule tables, and they are preceded by the appropriate apology prompt.

Message Number 110	retry 1	upon rejection of speech	apology_re1	I'm sorry, I didn't understand you.
Message Number 111		upon confirmation	apology_re1 –	My mistake.
Message Number 112	retry 2	upon rejection of speech	apology_re2	I'm sorry, I still didn't understand you.
Message Number 113		upon confirmation	apology_re2 –	My mistake again.
Message Number 132	Timeout 1	upon no input	apology_re1	I'm sorry, I didn't hear anything.
Message Number 111		upon confirmation	apology_re1 –	My mistake.
Message Number 133	Timeout 2	upon no input	apology_re2	I'm sorry, I still didn't hear anything.
Message Number 113		upon confirmation	apology_re2 –	My mistake again.
	excess retries		[...]	<timeout / retry prompt(s) specified in DialogModule table>

Note that Timeout prefixes for the *collection* phase (rejection of speech) are included as part of the Timeout prompts in each DM,

whereas Timeout prefixes for the *confirmation* phase are usually not specified in the DM tables.

Unless otherwise noted in the module, maximum timeouts and retries are set to two, for both regular and confirmation prompting. When a caller reaches Max Timeout or Max Retry, the call flow should go to [6200-GiveUpSendSomewhere-BC](#).

Developer Notes

The following notes apply throughout this document.

1. For all recognition modules in this spec, the return string for coding is the string that follows the last dash in the Option name.

For example (from DM 7035):

<i>Option (shown in the DM tables in this spec)</i>	<i>Return string (specified in the grammar)</i>
7035-FT-NowWhatYN-Option-Repeat	Repeat
7035-FT-NowWhatYN-Option-Replacement1099	Replacement1099
7035-FT-NowWhatYN-Option-MainMenu	MainMenu
7035-FT-NowWhatYN-Option-Agent	Agent

2. For each DM that contains a Help prompt in this spec, the grammar will provide a “help” return string. When **help** is returned, the app should play the DM-specific Help prompt and wait for a response.

Speech Science note: For the “Help” option, the grammar should include the phrase “more information.” The grammar should not include the word “help” itself because it can often be a false attractor.

3. On 3rd timeout or retry, the DM can be considered to have failed. Default behavior in this case is specified in DM 1130-GiveUpSendSomewhere-Check of the N8NN spec. All SARA1 and SARA2 behavior downstream of N8NN’s speak-freely menu is considered as part of that app, and all of its defaults apply to the downstream apps, unless otherwise specified.

4. All other default behavior acts as specified in N8NN Main.

Developer notes

The parameter values above are taken from 1350-Form1099NowWhat-DM in the N8NN spec. These are the latest ones we have on record. Please validate these against the ones that you have in the deployed code.

For tuning 1, update grammars: Add synonyms for "Replacement 1099" to 7035-FT-NowWhat.grxml. Examples: "ten ninety nine", "replace ten ninety nine", "replacement ten ninety nine for <year>".

Developer notes

For tuning 1, grammar updates: Add single digits for years 2000+, e.g. "two oh oh seven", and two digits for 01 to 09 to 7036-FT-WhichYear-DM.grxml.

As of v.3.13.0 (Tuning 2), Increase the weight of the 7036-FT-WhichYear-DM.grxml in relation to GlobalCommands.grxml. The method for doing this is explained in the OSR Reference Manual, pages 35-38. We recommend applying a grammar weight of 2 to 7036-FT-WhichYear-DM.grxml and 1 to the other grammars.
