Developer Notes
NOTE that the emergency messages associated with the 'activeFlagx' variables are NOT mutually exclusive. Any or all of the messages might be played, in any combination, based on the values of the variables. That said, care should be taken to use these messages judiciously in order to avoid front-loading the call with off-topic messaging, and to use these emergency messages only for legitimate emergencies (as opposed to less critical informational messaging). All callers will hear the SSA.gov website info (mm0160), regardless of whether any broadcast/emergency messages are played to the caller.

10/10/14 - Both is being added as an option. The 'both' path will currently transfer to an agent. Once the Change of Address (COA) module is enabled, "both" would require an update to include prompting (First, let's change your address") followed by Change of Address, followed by name collection or transfer to agent for name collection.

				can show a birth certificate. If you're changing your name, you'll need to show either a Marriage document; a Divorce decree; a Certificate of Naturalization showing a new name; or a Court order for a name change. Your name change document has to show both your old AND new names. If it doesn't have enough identifying information, you'll need to provide an identity document with your old name (like a drivers' license or passport) AND another one with your new legal name, in addition to the name change document.

If you were born outside the U.S., we can also accept a Consular Report of Birth, a Certificate of Citizenship, or a Certificate of Naturalization. If you're NOT a U.S. citizen, we need to see a current document issued to you by the Department of Homeland Security showing your immigration status, such as form 'I five five one,' 'I nine four,' 'I six eight eight B,' or 'I seven six six.' If you are not authorized

				to work in the U.S., then you'll need to provide a document from a U.S. federal, state, or local government agency, that explains WHY you need a social security number and which proves that you meet all the requirements for receiving benefits. If you're not sure if your reason qualifies, please speak with one of our agents. Note that we can only accept original documents, but we'll return your documents after we've seen them.

Changes in the law will make it easier for some people to qualify for extra help. Social Security won't count the help you receive with your household expenses as income, or any life insurance policies, as a resource when determining your eligibility. You may also be able to get help with Medicare costs from your state under a Medicare Savings Program. Applications for extra help can initiate the application process for the Medicare Savings Programs in your state. Type	Condition	Name	Wording
initial	Always	mm2200_ini_01	There are three ways someone can become a representative payee: a payee may be appointed by the Social Security Administration; a payee may be requested by a beneficiary - whether they currently have one or not - or someone who already has a payee may become their own payee. When we find that a beneficiary needs help managing their Social Security or SSI benefits, we appoint a Representative Payee for them. Appointed payees must be interviewed in person, and complete a form at a Social Security office. There, the appointed payee will need their social security number, proof of identification (like a driver's license), as well as the name and contact information of the beneficiary's doctor. If, on the other hand, a beneficiary wants to obtain a payee, or wants to change their current payee, the potential payee must be interviewed in person, and complete a form at a Social Security office. Again, the potential payee will need their social security number, proof of identification, as well as the name and contact information of the beneficiary's doctor. In addition, although a potential payee may have 'power of attorney,' Social Security does not recognize 'power of attorney' for purposes of managing benefit payments. Finally, if you want to become your OWN payee, you need to show evidence (a doctor's statement, for example) that you're now able to handle your money yourself.

2.2 AddressOSDM Dialog

This module collects an address from a caller. This module is likely to be incorporated into a larger application. NOTE TO CUSTOMER: This is a packaged application, and both the flow and code can not be altered as it is sold and delivered as a packaged piece of code. We will have some flexibility in terms of prompt wording (within boundaries, as we don't want to change grammars) and there are some configurable parameters that we can change from their defaults. Please keep this in mind as you review the document.

Config Parameters	

Parameter	*Value*
--	--

Developer Notes
This DM needs to confirm pretty much all the time. In this case use default confirmation prompts. Set confidencelevel to .8 or higher Alternatively, we might specify a parameter that controls confirmation for this DM alone. Suppress successsprompts and failureprompt. Please note that as with the behavior of all the other OSDMs the sequence of Retry prompts is as follows: If caller's utterance is low confidence, play noanswerapologies followed by reprompts. If caller said "no" after confirmation, play wronganswerapologies followed by reprompts. NOTE: this state recognized only VALID zipcodes (i.e. not any numerical string)

bv0140_SubmitBEVERequest_DB

	Database Call 🗄

Database query that lets us know the status of the data submission request and whether the caller's address needs to be collected.

Entering From
bv0130_KBAuthentication_SD, bv0150_AddressOSDM_SD

Input parameters	
Parameter	**Value**
processID	A string to tell KBA module which process to handle.
requestID	A numeric value used to track this particular request and should not contain the SSN.
timestamp	Timestamp value, which indicates the exact time and date that this request was initiated.
version	A string value containing a four-tiered version numbering system.
serverID	A string value that the vendor uses to distinguish the server that is processing the transaction (should be unique)
actionType	String to tell the type of action invoked. This should always be "SUBMIT".
SSN	a 9-digit ssn
Address	An address a noBeve caller may provide to receive their verification letter. The IVR platform will perform validation to ensure that an address is a valid address.

addressLine1	Ex: Warehouses, Inc.
addressLine2	Ex: 123 Main Street
addressLine3	Ex: Unit 1265
addressLine4	Ex: Mail Stop 2
city	Ex: Baltimore
state	Ex: MD
zipcode	21117
ani	A phone number that the user uses to reach Verizon. The IVR platform will perform validation to ensure that an ANI is submitted and is exactly 10 digits. If an ANI is not available, fill the field with 10 zeros.

Output parameters

Variable	Description
bv_statusCode	0000 - for "data submission" request: data is valid and processed/ BEVE letter request queued. 0001 - For "data submission" request: No Beve, address not found, must be collected. "NOBEVE Data Processed" 0004 - For "data submission" request: address not found, must be collected. initial	Always	ca0240_ini_01	Sure, here's some more information. You can only change your address if you're currently receiving Social Security retirement, disability, or survivor benefit payments. If you're NOT receiving benefits, the Social Security Administration doesn't keep your address on file (so even an agent can't do it). In this case, to change the address where we send your Social Security statements, you'll need to contact the Internal Revenue Service. The easiest way to do that is just enter your new address on your tax return, but if you need to do it sooner, you can use IRS form 8-8-2-2, which you can get by calling 1-800-829-3676.

Developer Notes
Code must calculate the three specific months based on current date and SSA business practices. The prompt MonthChoices is then the concatenation of the first and second month in medial inflection, and the third month in final inflection. "One Step Correction" strategy should be available to the Caller (e.g., "No, February") -- This means both the collection grammar and the confirmation grammar are active during the confirmation phase. (This can be done as a parallel grammar.) The grammar that should be accepted includes "as soon as possible" (ASAP) and its synonyms, the three specific months calculated above, and any additional months between the current month and the first of the calculated months. For example, if a call is received toward the end of September, the valid months are October, November and December, but the grammar should include September, October, November, December, and the ASAP synonyms, and September and October should be mapped the same as ASAP. The current month is not prompted, but it should be recognized and handled the same as ASAP.

Developer Notes
Prompt ka0220_out_06 should never actually be reached in this state because if they've already gone through kba once then the SSN should have already been collected and a caller with task = screen pop would not reach this state. Same with prompt ka0220_out_06 and second time through main menu because all other elements already collect SSN and DOB.
