Abstract: NPS policy requires that research studies and specimen collection conducted by researchers, other than NPS employees on official duty, require an NPS scientific research and collecting permit. The permitting process adheres to regulations codified in 36 CFR 2.1 which prohibit the disturbing, removing, or possessing of natural, cultural, and archeological resources. Additionally, regulations codified in 36 CFR 2.5 govern the collection of specimens in parks for the purpose of research, baseline inventories, monitoring, impact analysis, group study, or museum display.

As required by these regulations, a permitting system is managed for scientific research and collecting. NPS forms 10–741a, “Application for a Scientific Research and Collecting Permit” and 10–741b, “Application for a Science Education Permit,” are used to collect information from persons seeking a permit to conduct natural or social science research and collection activities in individual units of the National Park System. Individuals who receive a permit must report annually on the activities conducted under the permit using form 10–226, “Investigator’s Annual Report.”

The information in this collection is used to manage the use and preservation of park resources, and to report on the status of permitted research and collecting activities. We encourage respondents to use RPRS to complete and submit applications and reports. Additional information about existing applications, reporting forms, guidance and explanatory material can be found on the RPRS website (<https://irma.nps.gov/RPRS/>).

With this renewal we are requesting clearance for the use of a new form, the “Permittee Field Check-In/Field Check-Out Report.” Information requested will give parks real time knowledge of what activities are taking place and where, ensuring field work conducted conforms with the permitted activity. For form users on the RPRS, the majority of the new form will be prepopulated using responses from the permit application.
